FOREWORD

It is with great pleasure that I write this foreword to the late Professor Abhay Kumar Majumdar's work on the Sāṃkhya Philosophy. We are greatly indebted to his son Dr. J. K. Majumdar, himself a very competent student of Philosophy, for editing this work and making it accessible to the public. His act of filial piety has not only enriched Indian philosophical literature but has also shown that there are among us some who have the freedom of mind and boldness of thought to rethink ancient theories and develop them to new conclusions.

The interest of this work is not so much historical as metaphysical. The author has a definite view of metaphysics and it is too much to hope that his convictions have not coloured his interpretation of the Sāṃkhya system. As a matter of fact, the author develops by way of a critical restatement of the Sāṃkhya position his own metaphysical view that the world is a system of spirits, superpersonal, personal and subpersonal. Strange as such a view of the Sāṃkhya may appear to those wedded to tradition, it is sustained by a wealth of historical learning and power of philosophical criticism.

In the first two chapters the author takes up the problem of the supreme reality and argues that the prevalent opinion about the nontheistic character of the system cannot be main-

tained. The views of the Mahābhārata and the Bhagavadgītā which regard purusa and prakṛti as modes of the ultimate reality are pressed into service. The difficulty of the dualistic position which is unable to account for the harmony between the needs of purusa and the acts of prakrti is utilised to great advantage and the suggestions of theism scattered in the texts which are regarded as supporting atheism are worked out with great skill. It cannot be denied that there is a good deal of ·historical support for the theistic view of the Sāmkhya. Apart from the evidence of the Epic, we have also the later commentators Vācaspati, Vijnānabhiksu and Nāgeśa. Vācaspati assigns to God the mysterious function of guiding the development of prakrti by removing the obstacles to its manifestation (Īśvarasyāpi dharmādhişthānārtham pratibandhāpanaya eva vyāpārah). That the Vedānta Sūtra regards the Sāmkhya as upholding a line of thought which is opposed to its own monistic idealism cannot however be ignored. It is in Vijñānabhikşu that we find an open attempt to reconcile the Sāmkhya dualism with the monism of the Vedānta.

The author adopts the theistic interpretation of the Sāmkhya and holds that it alone can free the Sāmkhya system from inconsistencies. We may illustrate his general method by a reference to the question of the plurality of selves. The self, (purușa) is "infinite, unchangeable, all-pervasive, eternal, rational, etc." Each self has the same set of attributes and yet the Samkhya admits the multiplicity of selves. The whole position becomes untenable if we do not assume the reality of one supreme self and the multiplicity of the many empirical selves which are only individualisations or differentiations of the one supreme self. The author's view-point is not wrong. The Samkhya establishes the multiplicity of the embodied souls which do not rise or sink together. The transition from the plurality of empirical souls (jīva) to the plurality of eternal selves (purușa) is not a logical one. If the self (purușa) is without attributes and qualities, absolutely inactive and

impassive, unaffected by any emotion, pleasure or pain, then any definite characterisation of selves is the outcome of confusion of thought. There does not seem to be any non-empirical basis for the attribution of distinctness to the selves. If each self has the same features of consciousness and all-pervadingness, if there is not the slightest difference between one self and another, since they are all free from variety, what is there to distinguish one self from another? Multiplicity without some kind of distinction is unthinkable. A plurality of all-pervading selves is an impossible conception. While this criticism is a sound one, it is difficult to believe that the authors of the Sāṃkhya were aware of it and so adopted the theory of a single supreme self to avoid the danger.

The absolute self is viewed as a self-conscious Isvara who has as one of his constituent elements prakṛti by means of which he manifests himself in the empirical world. As a self-conscious system and the source of all activity, the absolute is regarded as a person. Since the unity is of a perfect nature, he is regarded as superpersonal. The individual soul is a differentiation of the absolute who is present entire and undivided in each jīva.

The third chapter is devoted to a discussion of the problem of human personality. The latter is not a mechanical juxtaposition of two independent entities, for such a view will involve a division of the consciousness of man from the other elements of his nature and thus make thought and life baffling mysteries. As the Sāṃkhya assumes the unity of human nature, puruṣa and prakṛti are organically related in the human self. Subject and object are aspects of a higher unity, distinctions within a whole. A pan-psychistic interpretation of prakṛti is developed in Chapter V.

FOREWORD

The work gives us a fresh interpretation of the Sāmkhya system. Whether or not we agree with the many textual interpretations of the writer, there is no doubt that the book offers us a deeper understanding of the problems which the Sāmkhya attempted to solve.

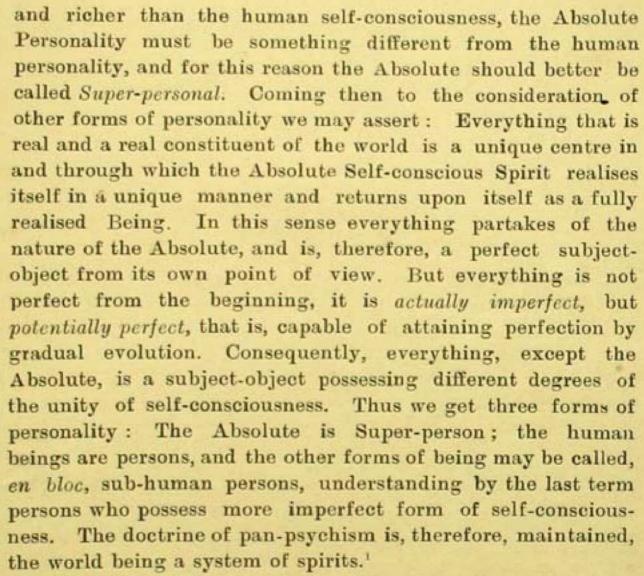

S. RADHAKRISHNAN.

(D)

INTRODUCTION

The word 'personality' has been used in different senses and different meanings have generally been assigned to it. But the truth seems to lie in this: The essential characteristic of a person is self-consciousness; but self-consciousness is not a bare or undifferentiated unity of an essence or of a substance, but a complex or differentiated unity of a system or a world. Thus, a person is a self-conscious system or world of diversified elements. Again, this system or world is not stationary, but progressive, so that a better definition would be that a person is "an active form of the whole"-a unique living centre of activity on the part of the Absolute which strives to attain its absolute unity and completeness by absorbing and assimilating, through an infinite process, the apparently foreign element of multiplicity. He is a free voluntary agent in so far only as his freedom and initiative is nothing but "the inherent effort of mind, considered as a 'world,' in the direction of unity and self-completeness, i.e., individuality."

Such is the meaning that we may assign to 'personality.' Our next problem is to determine the different forms that it admits of. And for that we have to determine, in the first place, whether and in what sense the Absolute may be called a person. We may assert that the Absolute is a self-conscious, and not merely a feeling, Being. But the Absolute self-consciousness being immensely higher

Now, the above conclusions have been brought to bear upon our discussions which form the subject-matter of the present treatise. What view does the Sānkhya maintain with regard to the meaning and forms of personality?—This forms the subject-matter of our present discussions. And at the outset of our venture it has been thought necessary to dispel a very widespread impression that the Sānkhya teaches atheism, or at least, agnosticism, since the establishment of a theistic Sānkhya is a necessary preliminary to proving that God is a person according to the same. It has been conclusively proved that the impression is entirely unfounded and based

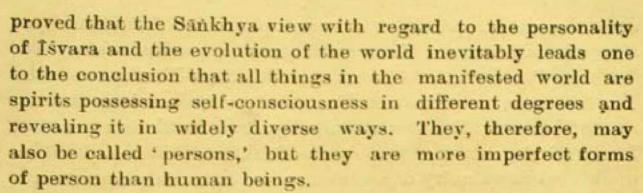

The above has been fully discussed by the author in his treatise : " The Meaning and Forms of Personality," to be published later.

upon the misinterpretation of some aphorisms of the Sankhya-Pravachana-Sûtram. Numerous texts are cited from the Sāńkhya-Pravachana-Sûtram, the Sāńkhya-Kārikā and the Yoga-Sûtram, to prove that the Sānkhya System is as theistic as the Vedanta. Next an attempt has been made to show that Îsvara (God), as understood by the Sānkhya, is not a bare or undifferentiated unity of an essence or of a substance, but a complex or differentiated unity of a system or world: It has been shown beyond all doubt that Purusa and Prakrti are not two independent realities lying side by side, as the commentators suppose them to be, but that the latter is included in the contents of the former. This leads to the conclusion that Îśvara is an all-pervading self-conscious system. It has also been shown from textual evidence that He is the ultimate Source of all activity or effort. Thus, Îśvara, as understood by the Sānkhya, is a Person, or rather, a Super-person, for He is a perfect Self-conscious System.

Coming next to the consideration of the human personality it has been shown that man, as understood by the Sānkhya, is also a self-conscious system or world; for, he is nothing but a perfect differentiation or individualisation of the Absolute Purusa or îsvara. In this connexion the Sānkhya doctrines of Evolution, Non-discriminative knowledge. Bondage and Release, have been discussed at considerable length to show that Purusa in man, or the individualised Puruşa, is none but the Absolute Puruşa or Îśvara working and realising Himself under limitations imposed by the physical organism and its adjuncts, and striving to return upon Himself as a perfectly liberated Being. So long as He works under those self-imposed limitations He is in the state of bondage, and when by overcoming those limitations He returns upon Himself, He is said to be released. Thus, man being an individualised Purusa, is a person himself.

Next, the Sankhya view with regard to the other forms of personality has been considered. It has been satisfactorily

Thus, the Sānkhya System speaks of three forms of personality: The Super-human Personality, which is possessed by God or īśvara; the human personality, which is possessed by jîvas called men; and the sub-human personality, which belongs to all other beings and things. Therefore, according to the Sānkhya, the universe is a system of different grades of persons, in which īśvara or God is the Super-person or the Person of persons, and all other persons—men and other beings and things—are His individualisations, modes or moments.

(O)

THE

SĀNKHYA CONCEPTION OF PERSONALITY

CHAPTER I.

THE EXISTENCE OF GOD.

Does the Sānkhya System admit the existence of God? This is the most important question which we have to determine at the outset, seeing that there is a widespread impression that the Sānkhya teaches atheism; that it does not not only offer any positive proof of, but positively denies, the existence of God. This impression is directly based upon some aphorisms which appear, on a superficial view, positively to declare the non-existence of God; and this impression becomes confirmed when it is found that no attempt has been made in the whole system to explain and prove any of its themes by reference to the Godhead. But such an impression seems to me to be entirely false and based upon the mis-interpretation of those aphorisms; and on a right interpretation the system would appear to be as theistic as the Vedānta.

The non-theistic character of the Sānkhya is made to rest on two series of aphorisms—the first series consisting of the aphs. 92-99 in Chap. I of the Sānkhya Pravacana ·Sūtram, and the second series, aphs. 2-12 in Chap. V, ibid. We propose to examine, in what follows, these aphorisms one by one in order to see whether they, or at least some of them, support the impression that the Sānkhya denies existence to God, or confirm the opposite view.

A. (1) "On account of the non-proof of Îśvara or Lord," or, more fully, "(it is no fault in the definition of perception that it does not extend to the perception of îsvara), because Isvara in not a subject of proof." This is perhaps the most important of all the aphorisms referred to above on which much stress has been laid by the upholders of the theory that the Sankhya teaches the non-existence of Isvara or God, or that, at least, there is no proof of the existence of îśvara or God. For instance, Vijnāna Bhikşu interprets it in this way: "On account of the absence of proof in regard to Isvara, it is no fault, the last four words following from the 90th aphorism (as the complement of the present one)."2 And he adds: "This negation of Îśvara is, as has been already established, only in accordance with the bold assertion made by certain partisans in order to shut up the mouth of the opponents. For, if it were not so, the aphorism would have been worded thus: on account of the non-existence (and not, on account of the non-existence of proof of îśvara, as we have it)." Aniruddha Bhatta gives a similar interpretation. He holds: "If there were evidence or proof to establish (the existence of) îśvara, then the consideration of the perception of Him would properly arise. But no such proof exists."4 Both of these commentators, therefore, maintain that there is no proof of the existence of Isvara, though they do not deny positively His existence. So that, according to them, though the aphorism does not positively affirm atheism, it, at least, affirms agnosticism. But it is curious that they do not expressly say what sort of proof of the existence of God the aphorism denies. The Sankhya admits three kinds of proof, of which Testimony or Authoritative Statement (Aptavacanam)

^{। &}quot;देखरासिडें:।" सी. प्र. स्. १ थ. ८२

 ^{&#}x27;द्विर प्रभाणाभावात्र दीय इत्यनुवर्त्तते।"

 [&]quot;अर्थ चेत्ररप्रतिवेध एकदेशिनां प्रौद्वादैनैविति प्रानिव प्रतिपादितम्। चन्यवा हीत्रराभावादित्वे-बीच्यति।"

^{• &}quot;यदीयरसिदी प्रमाणमसि, तदा तत्राव्यचिन्ता उपपदाते। तदेव तु नासि।"

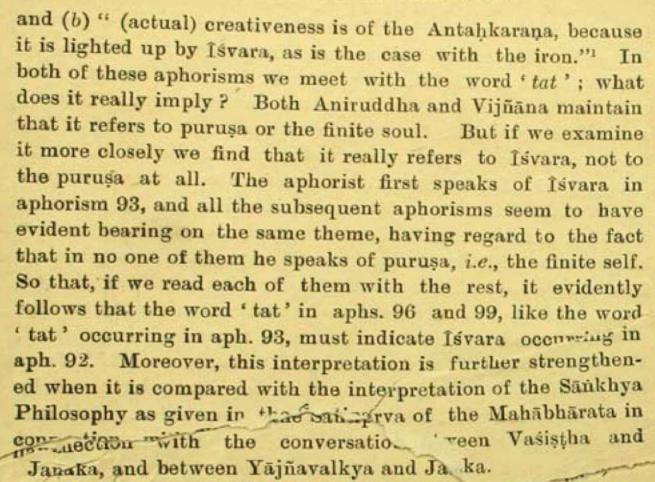

is one; and it asserts that whatever cannot be proved by perception and inference may be proved by Testimony. (Vide, Sānkhya Kārikā, ver. 6.) It is well known that the testimony of the Sruti proves the existence of Iśvara; so that when the Sānkhya says that there is no proof of His existence, it must mean some other proof. What is, then, that proof? If we carefully examine the context of the aphorism we find that it has been introduced only to show that by sense-perception (pratyaksa) God's existence cannot be proved. Vijnāna Bhiksu himself says that this aphorism is introduced as a reply to the contention: "But, still, (an opponent may say) the definition does not extend to the perception of Isvara by yogins, devotees, etc., because, being eternal, the perception of Him is not produced through contact."1 From this it is evident that, it is not proof in general, but proof by sense-perception only, that is said to be impossible. And it is undoubtedly true that svara or God, who is a are leitherd svara or God, who is a are leitherd figite, cannot be the true interpretation of the aphorism is, "there being no proof by sense-perception of the existence of 'svara."2 Although Vijnana Bhiksu has tried to obviate the inconsequence of his erroneous interpretation by adding that the aphorism affirms, not the non-existence of God, but the nonexistence of the proof of the existence of God, these two interpretations come practically to the same thing, or at best, as I have said, lead to agnosticism, though not to positive atheism.

That Vijñāna Bhikṣu's interpretation is mistaken may be shown more clearly, if we compare it with two other aphorisms, viz., (a) "the purposive creativeness of Prakṛti is through proximity to Îśvara, as is the case of a loadstone;" s

^{&#}x27; ''ननु तथापीत्ररप्रत्यचेऽव्याप्तिः तस्य नित्यलेन सम्निकषांजन्यलात्।''

[&]quot; "देवरस वसिंह": इन्द्रियप्रत्यचप्रमाणाभावात्।"

³ "तत्त्विधानादधिष्ठातृत्वं, मणिवत्।" सा. प्र. म्. १ ५, ८६

(2) "As we do not know any other Purusa by sense-perception except the released and the confined, the existence of Iśvara, who is above sense-perception, is not proven." Vijñana has explained it differently; he maintains that as Iśvara can be neither released from afflictions nor bound by them, nor be anything of a different character, there is no proof of His existence. Aniruddha also offers a similar explanation. But what do they mean by the expression, 'Iśvara cannot be anything of a different character'? Is He not eternally free (nityamukta), and therefore something of a different character? The real meaning is, that there is no something of a different character which can be known by sense-perception, because every perceivable purusa is either released or confined. Hence what the aphorism really means to prove

 [&]quot;बन्त:करणस्य तदुःच्चितत्वाबीइवदिधिष्ठाव्यतम्।" सां. प्र. मृ. १ प. १८

[&]quot; स्ताबद्वयोरन्यतराभावात्र तिसिद्धः। " सां. प्र. स्. १ च. ८३

CINTRAL LIBRARY

is that the existence of îsvara cannot be proved by senseperception. And this explanation only is consistent with that given to the preceding aphorism. This aphorism, therefore, confirms our previous conclusion.

(3) "As every perceptible embodied purusa is either released or confined, Isvara is above the proof of sense-perception." This aphorism evidently bears the same meaning as the preceding one. According to Vijnāna the word 'asatkaratvam,' occurring in this aphorism, means 'akṣamatvam,' i.e., incapacity to effect anything. But it is difficult to understand how this meaning arises. It should mean 'asiddhatvam,' i.e., absorbed of proof, and this meaning only is consistent with egard to creation (lunce), because that will make it quite unaphorism with the p', receding one, and will raise a new aphorism on a sudder of the preceding one, and will raise a new aphorism on a sudder of the problem of of the pro

(4) "(The sacred texts, which speak of Isvara, are) either glorifications of the free Self, or how as paid to the perfect Ones (Vijnāna); or glorifications either of the sacred texts in the Self, or of one made perfect by yoga." This aphorism is introduced as a reply to such queries as these: In numerous texts in the Sruti, the Smrti and the Purānas there are stories to the effect that the devotees and yogins saw Isvara, uttered words in His praise and adored Him; and also of the worship of Brahmā, Viṣṇu, Mahesvara and all the incarnations regarded as Isvara: if He is really imperceptible, how were these possible? The reply does not mean to say that there is no Isvara, but simply that 'Isvara' there means the liberated souls or the souls made perfect by yoga, because they, having attained exaltation and perfection, may be regarded as Isvara. Therefore, the aphorism clearly implies that those facts do

^{&#}x27; "उभववाष्यसंकारतम्।" सां प्रम् र च रथ

^{ं &#}x27;सुकात्मनः प्रश्नेसा, उपासा सिद्धस्य वा।'' सां प्र. स्. १ प. ८५

not stand in the way of the theory that the existence of Isvara cannot be proved by sense-perception. But it should be very carefully remembered here that this aphorism does not deny the truth of those texts of the Sruti, etc., where the real Isvara is mentioned.

- (5) "The purposive creativeness of Prakrti is due to her proximity to îśvara, as is the case of a gem or loadstone." This aphorism is an answer to the question: How is îśvara imperceptible, if He is always present in Prakrti and guides her in her evolution? And it means to say that as a piece of iron acquires the power of attracting another piece of iron opvirtue of its proximity to a loadstone, which it will inactive, so Prakrti acquires the power of devolution by viron inactive, so Prakrti acquires the power of devolution by of the Here we should carefully remember their real meaning of the word 'tat.' I need not repeat what I as have said before in this connection. [See above (1).]
- (6) "In the case of all particular fects the creativeness is of the Jîvas." This are list clears up the meaning of the precedige one; it means to say that the Jîvas, i.e., the finite purusas, are the direct creators of all particular effects Isvara having nothing to do with them, at least directly. But it may be objected that if that is so, why has the Sruti made such false declaration that Isvara has voluntarily created the world? The answer is given below.
- (7) "Those teachings of the Vedas were meant for those who were perfect and of exceptional intellectual power, and who were, therefore, perfectly competent to understand their true meaning; and those teachings conveyed to them exactly what they meant."

Now, another objection may be raised: If Iśvara be entirely unqualified and above all attachment to Prakṛti,

¹ "तत्स्रिधानादिधिष्ठावत्तम्, मणिवत्।" सां. प्र. स्. १ प. ८६

^{° &}quot;विशेषकार्व्येष्विप जीवानान्।" सी. प्र. मृ. १ प. ८०

 [&]quot;सिद्दपनीत लादाकार्थोपदेश:।" सां. प्र. स्. १ प. १८

how can Prakṛti acquire the power of creation by coming into contact with Him? The answer is given below.

- (8) "(Actual) creativeness is of the Antahkarana, because it is lighted up by îśvara, as is the case with iron."1 Or, more fully, as iron acquires the power of heating and burning other things by virtue of its proximity to fire, so Antahkarana acquires the power of creation by virtue of its proximity to îśvara. Here, too, the real meaning of the word 'tat' should be carefully ascertained. Aniruddha and Vijñana both understand by it purusa or the finite self. But it appears, after careful examination, to mean Isvara. reasons are these: the argument begins with the aph. 92, which denies the proof of the existence of Îśvara by senseperception, and all the succeeding aphorisms are introduced to confirm the conclusion by the refutation of all possible Therefore, the whole argument, of which all the objections. aphorisms hitherto considered are mere parts, is directly concerned with îsvara, not at all with the finite purusa: that is to say, îsvara, not the finite purușa, is the direct and main subject of the whole argument. Of course, in aph. 97 it speaks of Jîvas, but of that incidentally only. So that, it is more reasonable to understand by 'tat,' Isvara, and not the finite purusa, inasmuch as only that will keep the continuity of the whole argument in tact.
- B. Let us now come to the consideration of the second series of aphorisms on which the non-theistic character of the Sānkhya is based. Of these aphorisms at least two, to wit, the 16th and the 17th, are usually quoted in support of the contention. We should, therefore, examine them carefully. Vijnāna Bhikṣu•supposes that these aphorisms are meant to refute the contention of the opponents that there are other proofs of the existence of Iśvara. He observes: "There are pūrvapakṣins or opponents who maintain that what has been

³ ''बल:करचस्य तदुक्वितितवाक्षीहवदिधिष्ठावत्वम्।'' सां प्र. स्. १ च. ८१

declared before, to wit, that there is no proof of the existence of îśvara (Lord)—is not justified, because there is proof of His existence by means of His being the giver of the fruits of acts." Aniruddha Bhatta remarks: "The non-existence of îśvara has been established before. The author now states the argument (nyāya)." Vedāntin Mahādeva makes a similar supposition. But it is very difficult to understand how such a supposition arises at all. A closer examination of the aphorisms conclusively shows that their purpose is quite different. In this instance the whole argument is intended to establish not that îśvara does not exist, but that He does not exist as the designer, creator and governor of the world, at least directly, as some people say; and begins with the aphorism—

(9) "Not because (the cause is) directed by Isvara (that there is) the resulting of fruits, (but) because the production thereof (takes place) by means of karma." 3 Vijñāna comments: "When the cause is superintended by Iśvara, there is the resulting of the transformation in the shape of the fruit of acts,-this is not proper, because of the possibility of the resulting of fruits by means alone of the necessary karma. Such is the meaning." 4 Aniruddha maintains: "Were îśvara an independent creator, He could create without (the aid of) karma (but that is not so). If you say that He creates, having karma as an auxiliary, then let karma itself be (the cause), what need of îsvara? Nor can an auxiliary obstruct the power of the principal agent, since, in that case, there would be a contradiction of its independence. Moreover, activity is seen to proceed from egoistic and altruistic motives. Neither can any egoistic motive belong to Îśvara. And were

^{। &}quot;देवरासिड रिति यटुकां तन्नीपपदाते कर्माफलदावतया तत्सिड रिति ये पूर्वपविषकान्निराकरोति।"

 [&]quot;पूर्विसिडम् इंखरासत्तम्, इदानौ नायिनाह ।"

^{3 &}quot;नियराधिष्ठिते फलनियात्तिः कर्मणा तत्सिक्वैः।" सा. प्र. प्. प्र. प्र. प्

^{4 &}quot;इम्मराधिष्ठिते कारणे कर्गफलरुपपरिणामस्य नियात्तिन युक्ता। भावस्यकेन कर्मणैव फलनियात्ति-सम्बादित्यर्थः।"

His motives altruistic, then, He being compassionate, there would be no justification for a creation which is full of pain. Nor is there any activity which is purely altruistic, because, such activity proceeds from a desire for selfish gain, even by means of doing good to others, etc. Therefore, let karma alone be the cause of the world." Vedantin Mahadeva also comments in a similar strain. He observes: " Does îśvara create by depending upon karma, or does He create by not depending upon it? In the former case let karma alone be the cause, and not îsvara. In the latter case, there will be contradiction to His independence. Further, is the activity of îsvara egoistic, or is it altruistic? It is not the former, because it is postulated (in the very conception of Isvara) that all His desires have been fulfilled. It is not the latter, since there is no reason for His activity in a painful creation. when He is compassionate."

The above comments, it is evident, only show that what is denied is not the existence of îśvara, but His causality as the giver of the fruits of actions. That the actions produce their own consequences naturally; that, therefore, there is no need of îśvara for that purpose; and that the activities on the part of îśvara involve contradiction;—these are what the aphorism purports to assert.

(10) "Because of his own benefit, (îśvara's) causality (will be) like that of man." As every man does an act for the sake of his own benefit, so îśvara's act of creation will be for His own benefit, which is absurd, because, being perfect, He cannot want any benefit for Himself. Therefore, He is not the real giver of the fruits of actions. Remember that this aphorism does not mean to say that îśvara is non-existent.

^{1 &}quot;यदि देवर: खतनः कत्तां, कथंणा विनापि कुथात् ? अय कथंगडकारी कुरुते, कथाँव यस्तु, किम् देवरिण ? न च सहकारी प्रधानयिकां वाधते, खातन्त्रविधातात्। किस्र खार्थपरार्थाभ्यां प्रवित्तः हटा। न च देवरस्य खार्थम् अन्ति। परार्थने कार्यणिकस्य दुःखनयस्थानुपपत्तिः। न च परार्थप्रवित्तः, परीपकारादिनापि खार्थनाभात् प्रवित्तः। तस्तात् कथाँव जगल्कारणम् अन्तः ?"

^{2 &}quot;स्वीपकारादधिष्ठानं लीकवत्।" सां. प्र. मू. प्र. प. २

- (11) "Otherwise (Îśvara will be) like the human lord."

 If Îśvara is supposed to do acts for His own benefit, He would be no better than a human lord. Therefore, also, He cannot be regarded as the giver of the fruits of actions. This aphorism, too, does not mean to assert that He is non-existent.
- (12) "If, still, such a human lord be regarded as îśvara, He is so in name only, i. e., there is no difference between Him and man." This aphorism, too, says nothing against the existence of God.
- (13) "Without Rāga or passion, causality is not established, because Rāga is the invariable and unconditional cause in all activity." This aphorism means to assert that if īśvara be regarded as an agent, passion must exist in Him. But—
- (14) "On (the admission), again, (of) connection with Rāga (He will) not (be) eternally free." This aphorism together with the preceding proves that Iśvara cannot be the creator; because, if He be so, He will possess passion, which will be inconsistent with His eternally free nature. These two aphorisms, therefore, simply deny His creativeness or agency, not His existence.
- (15) "If you say that His passion arises out of His connection with the powers of Prakṛti, then there will be the implication of His attachment." This aphorism purports to assert that Iśvara is unattached, as He is said to be in the Sruti. He, therefore, cannot have passion arising out of His connection with Prakṛti.
- (16) "If it be said that Isvara may be regarded as the governor or creator of the world, simply by reason of His mere existence, although He does not actually do anything,

^{। &}quot;लीकिकेयरवदितरया।" सो. प्र. स् ५ % अ

 [&]quot;पारिभाषिको वा।" स्ं. प्र. म्. प्र. थ. प्र.

^{· &#}x27;प्रधानश्रक्तियोगाचेत् सङापत्तिः।'' सां. प्र. स्. प्र. प. प

then everything may be called Iśvara, because the term 'Iśvara' will then have no meaning." Aniruddha and Vijñāna understand by sattā the existence of Prakṛti, and, consequently, interpret the aphorism in different ways. But the result is the same, namely, that the causality of Iśvara is not proven. It should be noticed here that if their interpretation were true, the proper wording would have been,—'if, by reason of the existence of Pradhāna or Prakṛti.' The word 'sattā' should, therefore, mean the existence of Iśvara, not of Prakṛti.

The three following aphorisms (17-19) are introduced to show that by neither of the three kinds of proof, as recognised by the Sānkhya system, at least the direct causality of an eternal îsvara can be proved. But they are usually quoted as the evidence against His existence. So they should be very carefully examined.

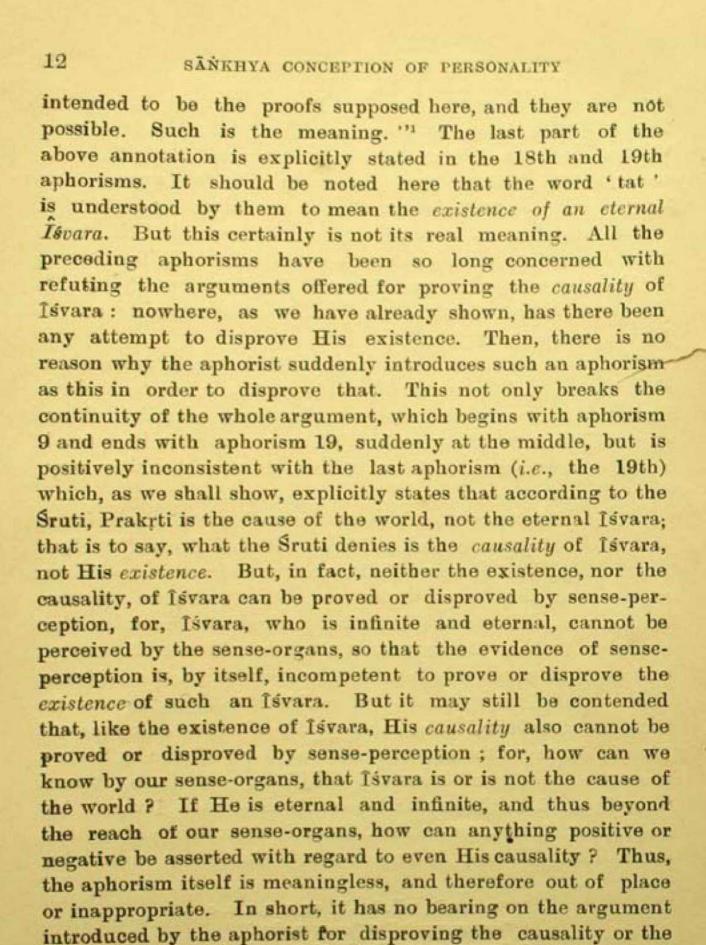

(17) "On account of the absence of proof there is no evidence of the causality of an eternal Iśvara." But Aniruddha, Mahādeva and Vijñāna all explain this aphorism as meaning that there is no perceptual evidence for the existence of an eternal Iśvara. Aniruddha explains the aphorism thus: "On account of the non-existence of perceptual proof, or of the evidence by Sense-perception, the existence of an eternal Iśvara is not proven." Mahādeva comments thus: "'aqfus:,' i. e., the proof of the existence of Iśvara. Because the non-existence of the evidence by Sense-perception is well-known." Vijñāna annotates thus: "'aqfus:,' i. e., the establishment of an eternal Iśvara. In respect of Iśvara, to be sure, there is no evidence of Sense-perception. Hence, Inference and Testimony must be

^{• &}quot;प्रत्यचप्रमाणाभावात (न तत्सिद्धिः)।"

 [&]quot;तत्सिविनिंश्येषरे तावत् प्रत्यचं नास्तीत्यनुमानग्रन्दविव प्रमाणे वक्तव्ये ते च न सभावत द्रमार्थः।"

agency of Isvara as the giver of the fruits of actions, etc. For this reason, I think, its true meaning is that in it the aphorist states in a general way that there is no proof whatever of the causality or agency of Isvara, and then proceeds to state, more explicitly, in the following aphorisms the absence of the only two other proofs, viz., Inference and Testimony, that are properly applicable in this instance. The next two aphorisms have real bearing upon the argument. The aphorist then proceeds to state them.

- (18) "On account of the non-existence of any connection or relation (of Isvara with Prakrti), there is no inference, too, (about His causality or agency)." By the term 'sambandha' all the three commentators, namely, Aniruddha, Mahādeva and Vijnana, understand 'vyapti,' i.e., pervasion, which means universal connection or going together of two things, and is the essential condition of an inference. Aniruddha comments thus: "Since the pervasion or the universal going together (of two things) must be based upon previous perception, in the absence thereof, how can there be the apprehension of such universal relation? Nor can there be the apprehension of such universal relation in the case of one which is wholly unconnected or above all relation. "2 Mahādeva annotates thus: "On account of the absence of vyāpti, i.e., pervasion, (there is no inference also of Îśvara)." Vijnāna explains thus: "Sambandha = vyāpti = pervasion or universal connection; abhāva = absence. Thus, in the syllogism-
 - 1. Whatever is an effect, has îśvara as its cause,
 - 2. Consciousness and the rest are effects (which are pervaded by a cause),
 - 3. Therefore, they must have îsvara as their cause: there can be no such inference in respect of îsvara, since there is no observed pervasion or universal connection between

^{· &}quot;सम्बन्धाभावाद्यानुमानम्।" सा. प्र. प्र. प्र. प्र. ११

 [&]quot;प्रत्यचपूर्व्यकत्वात् व्याप्ते:, तदभावात् कृतः सम्बन्धग्रहः ? न च चसाधारणस्य सम्बन्धग्रहः।"

Him and any effect (such as Consciousness, etc., for instance). Such is the meaning."

Thus, the gist of all the above commentaries is that there being no pervasion or universal connection between Îsvara and any of the effects in the world, that can be proved by sense-perception, which ultimately supplies all the premises of an inference, no inference can be drawn in respect of Him, inasmuch as one thing can be inferred from another only when they are universally and inseparably connected with each other, but if no such connection can be proved to exist, no inference can be drawn from one about the other. The case is exactly the same with îśvara and any of the effects, e.g., Consciousness, etc., found in the world; for, He is asanga or unattached or unconnected with anything of the world. Admitting that Isvara has no attachment with the world (but really, as we shall prove, He has at least an indirect connection with it), what we can at most prove is the nonexistence of His causality, not of Himself. The gist of the inference clearly and unquestionably shows that the causality of Isvara cannot be proved from the premises supplied by sense-perception, which is, according to the Sānkhya, the ultimate source of all premises from which an inference can be drawn. But it does not and cannot purport to indicate anything concerning the existence of Isvara, for the simple reason that the disproof of His causality does not imply in any way the disproof of His existence: He may not be a cause, but that does not necessarily imply that He does not exist also: He may exist, though He may not be a cause; that is, He may exist in another form, for instance, as an indifferent spectator (साची). If we deny or disprove that A is the cause of B, we do not, of course, deny or disprove the existence of A, unless A's causality and existence are identical, which certainly is not

^{1 &}quot;सन्तरी व्यक्तिः, यभावोऽसिद्धः। तया च महदादिकं सक्तृंकं कार्यवादित्यायनुमानेष-प्रयोजकलेन व्याप्यवासिद्धाः नेषरिऽनुमानिम्लयः।"

true. Therefore, the interpretation of this aphorism offered by the above commentators as purporting to disprove the existence of Iśvara, is not only erroneous, but perverted. The aphorist is emphatic on this point in the next aphorism, which is—

(19) "The Sruti also speaks of the world as the product of Pradhana or Prakṛti."1 All the commentators interpret this aphorism in their own peculiar ways. Aniruddha comments thus: "There is the Sruti: 'from Pradhana or Prakṛti is the world produced.' Therefore, the proofs demonstrative of the existence of îsvara are apparent, and not real."2 It is very difficult to understand how the inference of the non-existence of îsvara follows from the fact of the world's being the product of Prakrti. The fact that the real cause of the world is Prakrti only proves, if it proves anything, that its real cause is not îśvara; but it does, by no means, prove that Isvara is non-existent; nor does it indicate or suggest any such conclusion. Whence does then Aniruddha draw such an absurd and preposterous inference? He has certainly misunderstood the essential gist of the argument as a whole. It is certainly strange. Vijnana interprets it in this way: "In respect of the web of creation, there exists the Sruti or Vedic declaration of its being the product of Prakrti, but not of its having an intelligent being as its cause; for example, One unborn (Prakṛti) having the colour of red, white and black, the procreatrix of manifold progeny like unto herself."8 Here he plainly tells us that the Sruti denies only the causality of Îśvara, and not His existence. And this is confirmed by his quoting another text from the Sruti, to wit, 'Îśvara is the witness, intelligent, alone, and

^{&#}x27; 'श्वितिरपि प्रधानकार्यंत्वस्य।'' सो. प्र. स्. ५ प. १२

[&]quot; भिषानात् जगत् उत्पदाते इति स्रुति: पस्ति। तस्रात् देवरसाधकप्रमाणानि पाभासानि।"

[&]quot;प्रपश्च प्रधानकार्यालसीव श्वतिरक्ति न चेतनकारणल । यथा, अजामेको लोहितयकक्षणो वहाः प्रजाः सजामानां सद्याः ।"

devoid of the gunas,' 1 which implies that Isvara exists and possesses those attributes only, and not any such attribute as that of causality, as some say. He makes another curious admission, namely: "This denial of Îśvara is a mere praudhi-vāda or bold assertion made with the object of evoking dispassion in respect of the condition of being Isvara, and also with the object of demonstrating that there can be Release even without the knowledge of Iśvara."2 This admission evidently shows that, according to him, the aphorism does not really mean to deny the existence of Isvara, but, yet, seems to deny it from some ulterior motives as stated above. This is, no doubt, a very curious and ugly way of avoiding some inconsequences which will follow from such denial, because it is palpably inconsistent with the numerous declarations, to the contrary, of the Sruti. So that, it is impossible to deny the existence of Îśvara, inasmuch as it is proved by the third kind of proof, to wit, the Testimony (आप्तवचनम्), which is admittedly the testimony of the Sruti. We are, therefore, bound to reject the interpretations offered by Aniruddha and Vijñāna.

From this somewhat long discussion we are now in a position to gather the results we have arrived at. It is now evident that the main object of the discussions as set forth in both the series of the aphorisms is, by no means, to disprove the existence of îsvara, nor even that there is no proof of the existence of Him. The object of the discussions as set forth in the first series aims simply at showing that sense-perception is not competent to reveal the existence of îsvara, that we cannot know Him by means of the organs of sense; and there are two significant aphorisms, to wit, the 5th and the 8th, which, as we have conclusively shown, positively assert the existence of îsvara. Whereas, the object

^{1 &}quot;साची चेता केवली निर्मुणय।"

[&]quot;अवं चेयरप्रतिषेध ऐयर्थे वैराग्यार्थमीयरज्ञानं विनापि मीचप्रतिपादनार्थं च प्रीटिबादमावम्।"

of the discussions set forth in the second series, is of a quite different nature. It aims simply at showing that the direct cause of the world is really Prakṛti, and not Iśvara, who is only indirectly associated with her, and that, as even the Sruti says that the direct cause of the world is Prakrti, there is neither scriptural nor any other authoritative evidence to prove that Isvara is the direct cause of the world. Of course, Isvara may be called the indirect (नोण:) cause, for Prakrti has acquired the power of causality by virtue of her proximity to Him, but in Himself Isvara is beyond all attachment and eternally free. This is, in fact, all that the Sānkhya has to teach in those aphorisms. It is, therefore, most strange and inexplicable that such able commentators as Aniruddha. Mahādeva and Vijnāna have been so misled as to extract from them a theory which is absolutely inconsistent with the teachings of the Sankhya Philosophy as expounded by other and far more authentic treatises; and what is more, even with Vijnana's own assertion, that "the Lord, in the person of Kapila, taught, by this Viveka-Sāstra, Lessons on Discrimination between the Self and the Not-Self, consisting of Six Books, valid arguments, not conflicting with the Veda."1-(Preface to the Commentary by Vijñāna Bhiksu on the Sankhya Philosophy.) Again, "Now, in order to teach a complete system of valid arguments for the purpose of Manana, intellection, that is, assimilation, differentiation and elaboration, in thought, of the truth, thus heard, i.e., learnt, from the Veda, there appeared on earth Nārāyaṇa, in the person of Kapila, as the author of the Sankhya System of Thought, for the purpose of annihilation of the infinite sufferings of all jîvas or embodied selves: I bow down to Him." 2-(Vide the Preface.) Many other similar texts may

^{। &}quot;अत्यविरीधिनीकपपत्तिः षड्ध्यायीक्षेण विवेकशास्त्रेण कपिलस्तिभैगवानुपदिर्दशः"

 [&]quot;तस्य श्रुतस्य मननार्धमधोपदेष्टुं, सद्युक्तिजालिम् साढाकदाविरासीत्।
 नारायणः कपिलमृत्तिरप्रेषदुःखद्यानाव जीवनिवदस्य नमोऽख् तस्ये॥"

be quoted from the preface, but these are sufficient for our present purpose. We should notice two things in the above quotations: First, if the Lord, in the person of Kapila, taught the Sānkhya Philosophy, how could He teach a doctrine palpably inconsistent with the Veda, which undoubtedly declares the existence of Iśvara in numerous texts? It should be remembered also that in the Tattwa-Samāsa, Panchaśikha-Sūtram and Sānkhya-Kārikā, there is absolutely nothing which purports to say that Iśvara does not exist, or that there is no evidence of His existence; but rather as we shall presently see, there are positive evidences of the existence of Iśvara, not only in them, but also in the Sānkhya-Pravachana-Sūtram itself.

CHAPTER II.

THE EXISTENCE OF GOD. (Continued.)

We have examined and discussed so far only those aphorisms of the Sānkhya-Pravachana-Sûtram which appear to deny the existence of God or Isvara. But there are other aphorisms which seem to affirm the existence of God, and thus supply positive evidence for such existence. We now propose to examine and discuss them. We have shown before that in the aphorisms 96 and 99 of the Sānkhya-Prayachana-Sûtram the existence of Îsvara has been admitted. But there are other aphorisms also which are more clear and emphatic. Consider the aphorisms 56 and 57 in Chapter III, ibid.1 The former should be read with two preceding aphorisms in order that its true meaning may be clearly understood. They are: "It is not through the absorption into the cause that the end is accomplished, because, just as in the case of one who has dived, there is a rising again;" 2 and "Though Prakṛti is not an effect, or not directed by another to act, yet, the rising again takes place through her being subordinate." 3 Now a question arises: To what is Prakṛtī subordinate? Vijnāna explains it thus: "Through her being under the rule of the object of Purusa. Under the influence of the object of Purusa in the form of the manifestation of the discrimination (between Prakrti and Purusa), one absorbed into Prakṛti is raised up again by her. Such is the meaning." 4 'Pāravaśyāt' has been explained as

^{ा &}quot;स डि सर्व्यवित् सर्व्यवर्ता"। सां. प्र. स्. ३ थ. ५६। ''इंडग्रेयरसिविः सिवा।" सां. प्र. स्. ३ थ. ५०।

^{* &}quot;न कारणलयात कतकत्वता मग्रवदृत्यानात्।" सा. प. स्. १ प. १४।

 [&]quot;अकार्य्यत्वेऽपि तदयोग: पारवध्यात्।" सां. प्र. स्. ३ च. ५५।

 ^{&#}x27;'पारवध्यात् प्रक्षार्थतन्त्रतात् । विवेकत्यातिकपपुरुषाध्वशेन प्रक्रत्या पुनकत्याप्यते स्त्तीन दत्यर्थः।''

'purusarthatantratvat,' i.e., through her being under the rule of the object of Purusa: this is quite an unnatural meaning. The word 'pāravaśya' is derived from the word 'paravaśa' which means 'under the influence of another'; so that, 'pāravasya' should mean subjection to another. Aniruddha gives exactly this meaning, for he means by 'pāravasyāt' 'paratantratvat,' i.e., on account of subjection to another; and by 'parah' he means 'ātmā,' i.e , the Self or Soul. Now, the question is, who is that Self? The answer is given in the next aphorism: "He is the all-knower and all-doer." The word 'sa,' i.e., 'he', evidently implies îśvara, for He only can be all-knower and all-doer. But Vijnana gives a different interpretation. He observes: "For, he who was, in a previous creation, absorbed into the Cause (i. e., Prakrti), becomes, in another creation, the Adi or Original Purusa, (bearing the character of) Isvara or the Lord, all-knowing and all-doing; because, by reason of his absorption into Prakrti, it is but fitting that he alone should reach the status of Prakṛti." Thus, according to Vijñāna, 'sa,' i.e., 'be,' refers to Puruşa, and not to Îsvara at all. But by this interpretation he has committed some serious mistakes. The Purusas, who are absorbed into Prakrti during the pralaya, are those who have not as yet been released, not those who have been already released; and only the unreleased Purusas rise in the following creation and act according to their previous instincts. Now, the question is, how can those unreleased Puruşas, those who are still under the bondage and have not as yet attained self-knowledge, can become the all-knowing and all-doing Îśvara? Moreover, it should be noted that 'sa' has a singular number, and therefore indicates a single Purusa. Now, the question is, which one

^{&#}x27; "स हि सर्ववित् सर्वकत्तां।" सा. मू. म्. १ प. ४६।

[&]quot;स डि पूर्वमर्गे कारचलीन: सर्गानिर सर्ववित् सर्वकर्तेचर चादिपुरुषो भवति प्रकृतिलये तस्वेव प्रकृतिपद्रशाशीचित्यात्।"

of those numerous Purusas becomes all-knowing and all-doing Îśvara? Either all of them, or none must be so. Again, Vijnana himself admits, in his explanation of the next aphorism, that it is universally admitted in the Sruti and the Smrti that there is proof of an eternal Isvara by means of proximity.1 The aphorism runs thus: "The existence of such an îsvara is proved or admitted."2 The word 'Idrsa' here connects it with the preceding aphorism, and means "such " i.e., all-knowing and all-doing. But Vijnana's interpretation of 'sa' makes these two aphorisms quite unconnected with each other; because, if 'sa' refers to purusa, 'sarvavit,' i. e., all-knowing, and 'sarvakarta,' i.e., all-doing, should qualify him, and cannot qualify Isvara, i.e., Lord, in the second aphorism. In that case the word 'Îdrsa' will have no meaning, or will have quite an unnatural meaning. These considerations lead us to the conclusion that the word 'sa' refers to Isvara.

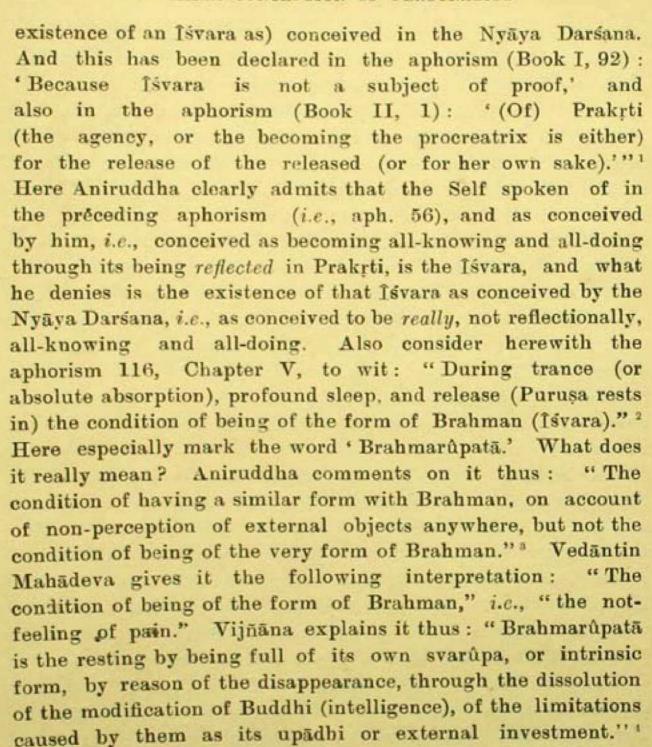

Aniruddha also offers exactly the same interpretation of the aphorism 56. He observes: "Of what form, one may ask, is the Supreme Self? To this the author replies: He is all-knower and all-doer;—such 'abhimāna,' i.e., self-consciousness, arises through its being reflected in Prakṛti." He offers the following interpretation to the aphorism 57: "Let the agency (of the Supreme Self) be just real (instead of being reflectional): what need, one may ask, of the supposition of (its being a) reflection? It follows, therefore, that the very îsvara that is conceived in the Nyāya Darsana exists. In regard to this, the author says: If (you mean to say that) the Self, as conceived by us, is the îsvara, let it be so. But there is no evidence in favour of (the

 [&]quot;ब्रह्मकपता बुद्धिवितिवित्यतलदीपाधिकपरिच्छेदविगमेन खखकपपूर्णतयावस्थानम्।"

And he adds: "And in our Sastra the word 'Brahman' denotes conscious or intelligent existence in general, which is all-full, and devoid of limitation, impurity, and the like, caused by the upadhi or external investment; but not. as in the Brahma-Mîmāmsā (Vedānta), merely a particular Purusa characterised by being the Lord ".1 In this aphorism, it is admitted, at least by Aniruddha and Mahādeva, that the author of the Sānkhya recognises the existence of Brahman or Îśvara, whose very form, or a form similar to it, the Purusa assumes in trance, profound sleep and release, wherein he is free from any external investment or embodiment which may impose limitations upon him. This also proves that the Purusa does not differ from Brahman or Isvara essentially, but differs from Him only when he takes an external investment or embodiment, that is, when he becomes united with Prakrti and her evolutes. If we consider these admissions carefully we can easily find that there is only one Absolute Purusa. called Brahman or Îśvara, who by uniting Himself with Prakṛti, assumes numberless different investments or embodiments, and thereby differentiates Himself into infinite number of jîvas or individual Puruşas. Vijñāna's interpretation seems to be erroneous, for, if all the Purusas attain Brahmarūpatā as interpreted by him, in trance, profound sleep and release, what distinction remains between them? Do they not become exactly alike, and thereby one and the same thing? How can they be exactly alike, and yet remain many? Manyness implies distinction, and without distinction there can be no manyness. So that Vijnana's own interpretation leads to the fact that all Purusas are ultimately one and the same, i.e., they are only different modes, moments or differentiations of one and the same Purusa: there is only one Purusa, to wit, Brahman or

^{े &#}x27;'बबक्तास्त्रे च ब्रह्मणब्द उपाधिकपरिक्केंद-मालिबादिरहित-परिपूर्णवेतनसामान्यवाची न तु ब्रह्म-मीमांसायामिवैचर्योपलचितपुरुषमाचवाचीति विवेत्रस्यम्।''

îśvara, who differentiates Himself into, or appears in the forms of innumerable puruşas, called jîvas. Thus, the last part of his interpretation is likewise erroneous.

Vedāntin Mahādeva means by 'sa hi' "प्रकृतिपदार्थ:," i.e., the thing called Prakrti, and that alone. This is still more absurd. He supposes that "in the present aphorism the author discredits the view that there must exist some Intelligent Being as the superintendent of the Non intelligent Prakrti, and that He must be all-knowing and alldoing." He further adds: "Because, as it belongs to Prakrti, to undergo transformation, it is quite possible for her to transform as the modification of knowledge. Such is the idea." But it is difficult to understand how such a supposition arises at all. We have found that in the immediately preceding aphorism (i.e. aph. 55), the question arises: To whom is Prakrti subordinate? and that the answer is given in the present aphorism; this is the view of both Aniruddha and Vijnāna. So that, Mahādeva's supposition is quite unreasonable and irrelevant, because it makes the present and the preceding aphorisms quite unconnected with each other. Another difficulty arises: How can Prakrti, which is non-intelligent, be all-knowing? Mahādeva's explanation is curious. He tells us that as Prakṛti alone is capable of transformation, she can transform herself into being intelligent, and therefore, all-knowing. But he evidently forgets that Prakrti can transform herself only consistently with her essential nature, and that nature being unintelligent, she cannot transform herself in such a way as to be intelligent, because it will then violate the law of transformation or evolution. It may, of course, be asked; How does then arise the evolute Mahat or Buddhi, i.e., Consciousness or Intelligence, which is the first evolute of Prakṛti? Prakṛti herself is non-intelligent, how does she give rise to Consciousness or Intelligence? The reply is, it is a well-known teaching of the Sankhya that evolution of

Prakṛti takes place by virtue of her union (संयोग:) with the conscious or intelligent Purusa and that the consciousness or intelligence of Prakṛti is apparent, being due to the reflexion of his consciousness or intelligence upon her, just as the redness of a crystal vase is due to the reflexion of the redness of a flower. Thus, Prakrti's consciousness or intelligence is borrowed and apparent. In her essential nature she is unconscious and unintelligent. (This is only the popular interpretation of the Sānkhya view, but we shall prove in the sequel that it has a deeper meaning.) But it may still be contended that after her becoming conscious and intelligent she may also become all-knower. But that is impossible, for, all-knower means one who knows everything, and Prakṛti as an all-knower must know that before she became all-knower, she did not know anything,-she was unconscious and unintelligentthat is to say, before she was conscious and intelligent she was conscious and intelligent, which is absurd and selfcontradictory. For these reasons we must reject Mahādeva's interpretation and hold that 'sa' refers to the Supreme Self or Îśvara, as is held by Aniruddha, and not to Prakrti.

We may, therefore, conclude that the Self to whom Prakṛti is subordinate and under whose influence she rises again to act or create, is none but the all-knowing and all-doing îsvara. Now, a difficulty may arise: The Sānkhya, in agreement with the Sruti, upholds that îsvara is inactive (चित्र्य:). How, then, can He be all-doing? The reply is, as Prakṛti acts under His influence and guidance, He may, at least indirectly, be called all-acting or all-doing or the ultimate source of all agency or activity, just as a king, to quote a simile from the Sānkhya itself, is called a fighter, although he does not actually fight, but his soldiers do so under his order and guidance. This is the common answer, but I shall prove in the sequel that

Îśvara is the real doer, and Prakṛti is His instrument only.

Let us now turn to a more authentic treatise on the Sānkhya Philosophy, I mean the Sānkhya-Kārikā. Is there any positive evidence in it with regard to the existence of îsvara? I think there is. In two significant verses it is positively declared that there is one Absolute Puruşa, i.e., the Supreme Self, as there is one Absolute Prakṛti. Examine these two verses: "The manifested is caused, noneternal, limited, changeful, multiform, dependent, attributive, conjunct and subordinate; the Unmanifested is the reverse." 1 (Verse 10.) "The manifested has trine constituents, and is indiscriminative, objective, generic (i.e., enjoyable by all souls), irrational and productive. So also is Prakrti. Soul is the reverse in these respects as in those." 2 (Verse 11.) Mark the last sentence. This means that Purusa or Soul possesses attributes which are opposite to those possessed by the Manifested, and, therefore, are these: Purusa is uncaused, eternal, all-pervading, unchanging, one, independent, indissoluble, uncombined, self-governed, destitute of the three constitutive factors, discriminative, subjective, specific or individual, rational and unproductive. In this list we should mark one attribute of Purușa, namely, One; Soul or Purușa is said, here, to be one; this is a very significant word and has been the cause of much dispute among the annotators. Therefore, upon its true interpretation entirely depends the solution of the problem whether Soul is one or many. Gaudapāda says: "The manifested is multiform, the Unmanifested is single, so is Puruşa also single." 3 Vāchaspati gives a different interpretation.

 [&]quot;हेतुमद्नित्यम्यापि सक्रियमनेकमात्रितं लिक्कम्।
 सावयवं परतन्तं व्यक्तं, विपरीतमव्यक्तम्॥"

 [&]quot;विगुणमविविकि विषय: सामान्यमचेतनं प्रसवधिमा ।
 व्यक्तं तथा प्रधानं तदिपरीतसथा च पुमान् ॥"

उ ''भनेकं व्यक्तमेकमव्यक्तं तथा च पुनानप्येकः ।''

He holds: "Let it be that Purusa, like Prakrti, is uncaused, eternal, etc.; he, like the manifested, is also many. If so, why do you say that Puruşa is opposite to the manifested? For this, it is said (that Purusa is) like the manifested also. Here 'cha' means 'api." 1 This interpretation of Vāchaspati says, from verse 18, which declares the arises, as he multitudinousness of Purusa. The Sānkhya-Chandrikā confirms the interpretation. Prof. Wilson side with Vāchaspati and observes: "The general position, that the properties of soul are the reverse of those of the products of nature, requires, however, some modification in one instance. A discrete principle is said to be multitudinous, many, aneka; consequently soul should be single, eka; and it is so, according to the Sānkhya-Bhāsya. On the other hand, the Sānkhya-Tattwa-Kaumudî makes soul agree with discrete principles, in being multitudinous..... The Sankhya-Chandrikā confirms the interpretation, 'The phrase tathā cha implies that (soul) is analogous to discrete principles in manifold enumeration.' This is, in fact, the Sankhya doctrine, as subsequently laid down by the text, verse 18, and is conformable to the Sūtra of Kapila; 'Multitude of souls is proved by variety of condition:' that is, 'the virtuous are born again in heaven, the wicked are regenerated in hell; the fool wanders in error, the wise man is set ofree.' Either, therefore, Gaudapāda has made a mistake, or by his eka is to be understood, not that soul in general is one only, but that it is single, or several, in its different migrations; or, as Mr. Colebrooke renders it (R. A. S. Trans., Vol. I, p. 31), 'individual.' So in the Sûtras it is said, ' that there may be various unions of one soul, according to difference of receptacle, as the etherial element may be confined in a variety of vessels.' This singleness of soul applies therefore to that particular

 ^{&#}x27;सादितत् चहेतुमत्त-नित्यतादिप्रधानसाधमामित पुरुषस्य, एवमनेकतः व्यक्त-साधमाम्। तत् कथसुचाते तिहपरीतः पुमानित्यत चाह तथा चेति, चकारः चप्यथः ॥''

soul which is subjected to its own varied course of birth, death, bondage, and liberation; for, as the commentator observes, 'one soul is born, not another (in a regenerated body).' The singleness of soul therefore, as asserted by Gaudapāda, is no doubt to be understood in this sense."

Vāchaspati's interpretation seems to be strained and inconsistent with the tenor of the verses 10 and 11. Tf tathā cha means really 'like the manifested also,' it is very difficult to see why such likeness should be in respect of one attribute only, to wit, anekatvam, and not in respect of the other attributes as described in verse 10. If the Puruşa resembles the manifested in being many, why should he not do so in being caused, non-eternal, limited, etc., also? Vāchaspati does not explain this distinction. But, yet, it may be contended by others that the attributes of being caused, etc., are not applicable to Puruşa; Puruşa cannot be conceived to be caused, etc., for, if he were so caused, etc., he would be one of the manifested; and this would be manifestly inconsistent with verse 3, where it is expressly stated that Purusa is different from both Prakrti and the effects or the manifested.1 The reply to this contention is, if Purusa is distinct from the manifested, he is also distinct from Prakrti, but, yet, he resembles the latter in being uncaused, etc. Why should he not then resemble the manifested in being caused, etc. ? The retort will, of course, be that two contradictory sets of attributes cannot be possessed by one and the same thing. That is not true. One and the same thing may possess opposite qualities. Really there are no 'opposites' but only 'differents'; all things have their own places in the universe, and when they are in their own places, they are perfectly consistent with one another: opposition and inconsistency arise only when they are misplaced. So that, apparently opposite things may be juxtaposed without

[&]quot;न प्रकृतिन विक्रति: पुरुष:।"

contradiction by being placed in their own positions. Thus, Prakṛti, which is admittedly one, contains the conditions of being many, for, otherwise, she could not be differentiated into many. If she were mere one-abstract one-bare or homogeneous identity, couped and confined absolutely within herself, she could not go out of herself into the many. Consequently, her oneness includes the ground and condition of manyness-she is one-in-many. Similar is the case with her other attributes; she is uncaused and caused, eternal and non-eternal, infinite and limited, etc., at the same time. If she were merely uncaused, eternal, infinite, etc., and did not contain the ground and condition of being caused, noneternal, limited, etc., nothing which is caused, non-eternal, limited, etc., could come out of her; there could be no creation or evolution. But the author of the Sankhya is intelligent enough to maintain that Prakṛti is not such a bare unity, but she is a complex unity of various constitutive elements, called Sattva, Rajas and Tamahs. In fact, Prakrti, as the whole, contains attributes peculiar to herself and so far differs from the manifested, and also those attributes possessed by the manifested as her parts or evolutes, and so far resembles them. This view is not inconsistent with the teachings of the Sānkhya, and the Sānkhya doctrine of Causality corroborates it: thus, in verse 9 it is said : " Effect subsists (in the cause antecedently to its operation); for what exists not, can by no operation of cause be brought into existence. Materials, too, are selected which are fit for the purpose: everything is not by every means possible: what is capable does that to which it is competent; and the effect is of the same nature with the cause." In this verse particularly mark 'kāranabhāvāt,' i.e., 'the effect has the same characteristics as the cause has," (Gaudapada), or

 [&]quot;यसदकरणादुपादानग्रहणात् सर्वसंभवाभावात्।
 शक्तस्य शकाकरणात् कारणभावाच सत्कार्यम्॥"

³ ''कारणं यज्ञचणं तज्ञचणमेव कार्य्यमपि।''

'from the fact that the effect has the same essential nature as the cause '1 (Vāchaspati). Now, if we apply this doctrine to Prakṛti and her products, how can we say that she is merely one, uncaused, eternal, etc., and that the products are merely many, caused, non-eternal, etc. ? If the cause and effect are of the same nature, they must possess common characteristics, though after the manifestation the effect assumés a new form and comes to possess also some other characteristics by virtue of which it differs from the cause. But this does not imply that those other characteristics are such that their ground and conditions are not in the cause; for, if they were not in the cause, the effect would contain some characteristics the cause of which was not its cause, but something else: that is to say, its own cause was not its adequate cause and would require to be supplemented by some other cause. What would that other cause be in the case of the manifested? The Sankhya does not recognise any other cause than the Prakṛti; so that, Prakṛti must be recognised as the only adequate cause; that is to say, the cause which contains the ground and conditions of all the characteristics possessed by the manifested. This conclusively shows that Prakṛti possesses two antagonistic sets of attributes-one set she possesses in her own essential capacity, to wit, as the whole, and another set, in her other capacity, to wit, as the products or differentiations.

The above argument shows that a thing may possess contradictory attributes, and in fact, everything in the world possesses contradictory attributes; for instance, everything is one thing possessing many attributes—everything is a single whole constituted by many parts or elements; or, in other words, everything is one-in-many—unity-in-variety. The same is exactly true of Puruṣa; he is one-in-many, uncaused-in-the caused, eternal-in-the non-eternal, infinite-in-the finite, etc.: he is

¹ "कार्थस्य कारणात्मलात्।"

one Purusa differentiated into many Purusas; he is the uncaused cause of all the caused effects; he is eternal, appearing as and in all non-eternal things and beings; he is infinite including all finite things, etc. If the Purusa were a bare or abstract one-a bare undifferentiated identity-there could be no many Purusas: if he were merely uncaused, containing no ground and conditions of the caused, there could be nothing caused ; if he were merely eternal and infinite, containing no ground and conditions of the non-eternal and the finite, there could be nothing that is non-eternal and finite. Or, in other words, though Purusa is essentially one, uncaused, eternal, infinite, etc., yet, he appears to be many, caused, non-eternal, finite, etc. And there is an interpretation of 'tadviparîtastathā cha puman,' which confirms the above inference. It may mean that Purusa is both opposite and analogous to them. This interpretation seems to me to be true and sound. I shall dilate upon this point in the sequel. The interpretation offered by Prof. Wilson and Dr. Colebrooke that Purusa is one in the sense that he remains 'single 'or 'individual' throughout his numerous migrations is evidently absurd.

The whole difficulty seems to arise from the apparent impossibility of reconciling verses 10 and 11 with verse 18. The latter runs thus: "Pecause birth, death, and the organs are severally allotted, and because activity is not simultaneous, and also because the factors are found unequally, the multiplicity of souls is established." This verse, it is evident, tries to prove the multiplicity of souls, which is, therefore, apparently inconsistent with verses 10 and 11, where the unity or singleness of soul is declared. From this apparent inconsistency arises the attempt to modify the meaning of the latter consistently with that of the former. But no attempt has been made to reconcile them without modifying the meaning

^{&#}x27;'अन्यसरण-करणानां प्रतिनियमादयुगपत् भवत्तेय । पुरुष-बहुत्वं सिखं तेगुन्छ-विपर्थं याचैव ॥'' सां. का. १८।

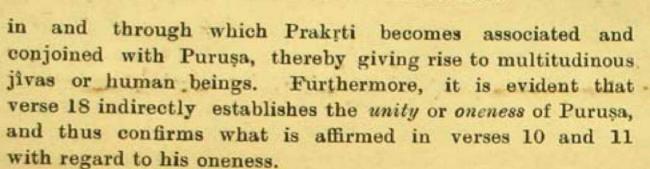

of either. Are the verses really inconsistent? I do not think so. The truth is, verses 10 and 11 (we should always read these two together) speak of Purusa in his absolute character, i.e., of the Parama-Purusa or the Absolute Soul, while verse 18 speaks of Purusas in their relative and individual character, i.e., of Jivas as associated with external investments or embodiments. Or, in more familiar words, the former speak of Îśvara or the Infinite Self, and the latter speeks of human or individual souls. It may be objected that the Sānkhya recognises only twenty-five categories, one of which is Purusa; so that, it speaks of only one kind of Puruşa, not two, and that one kind of Purusa must be that who is associated with the manifested, i.e., the Consciousness or Intelligence, Self-consciousness, Manah, the ten organs of sense, etc., and is, therefore, multitudinous. This is certainly not true. We have already found that the Sānkhya-Pravachana-Sûtram speaks of two kinds of Purusa, the Infinite Purusa or Îśvara and the finite and confined purusas or Jîvas. Similar is the case with the Sānkhya-Kārikā. It is true that the latter does never even mention the word 'Iśvara' in any of its verses, but it is perhaps because the word 'Isvara' bears different meanings, and especially it is not used in the Sruti as equivalent to Brahman, the truly Absolute Self; or it may be because the Sankhya-Kārikā does not recognise any essential distinction between the Absolute and the human soul, the latter being nothing but the individualisation or differentiation of the former. But whatever might be the reasons, it is certainly no sound argument that as the Sankhya-Karika does not mention the word 'Îśvara,' it does not recognise His existence at all. I am going to show that by the word 'Purusa' or the Soul, the Sānkhya-Kārikā means sometimes the Brahman and sometimes the Jîvas.

Let us examine verse 18 a little more closely, and we shall find that the reasons for which it declares Puruṣa to be multitudinous, do not really prove him to be so. Birth, death, the

organs, activities, and the three gunas, all belong to or are adjectives of Prakrti, or more properly, of her evolutes, and none of them belongs to Puruşa, inasmuch as, being essentially eternal and infinite, he cannot be born, nor can he die; being all-pervading, he cannot have any organs of sense; being inactive (निष्क्य:), he cannot act; and being non-composite, he cannot have the gunas. Therefore, what the different allotments of birth, death, and the organs, the unsimultaneous character of activities and the inequality of the three gunas really establish, is not the multiplicity of Puruşa, but that of the upādhis or external investments in and through which Prakrti manifests herself when conjoined with Purusa. We should be more explicit on this point, because it is the most important one. The concrete man has two sides or aspects: he has a rational side, and he has also a non-rational or natural side, the latter including, according to the Sankhya, everything which is found in man except his Self or Soul; or, in the words of the Sānkhya, he has a side which is represented by Puruşa, and he has also a side which is represented by Prakrti in the shapes of the external investments, namely, the Consciousness or Intelligence, the Self-consciousness, the Manah, the ten organs of sense, the five subtile Elements, and the five gross Elements. The concrete man is the synthesis or union of Purusa and Prakrti-of the Self and the Not-Self-of the Subject and the Object. In short, the concrete man is a subject-object. Purusa or the Self or the Subject in him is infinite, unchangeable, eternal, all-pervading, inactive (in the ordinary sense), and beyond all attachments; but Prakrti or the Not-Self or the Object in him is actually finite, changeable, temporal, non-pervasive, active and attached. Birth, death, etc., are, therefore, characteristics of the latter side of man, while the former is above and beyond them all. Thus, we find that verse 18 does not mean to establish the multiplicity of Purusas which is impossible, but the multiplicity of the upādhis or investments

But it may still be asked: As verse 18 clearly declares the multiplicity of Purusas (पुरुषबद्दलम्), how can this be reconciled with his unity or singleness? Or, in other words, how can Purusa be one and many at the same time? This is undoubtedly one of the most important problems of metaphysics. This raises the old problem of the one and the many. The instance in point is man himself; man himself is one and many at the same time. He is the unity of Purusa and Prakrti-of the self and the not-self; he is a subject-object. In whatever way, whether by proximity or otherwise, these two distinct and opposite realities are unified in man, it cannot be denied that he is a unity-in-variety—a one-in-many. But only this will not solve the problem. We are to prove that there is one Absolute Purusa and that all other Purusas are nothing but His individualisations or differentiations. In this way only can we solve the problem of the one and the many. What does the Sankhya say about it? In the Sankhya-Kārikā and also other treatises on the Sānkhya, Purusa is defined in a general way, although they assert that there are many Purusas: that is, the individual Purusas are not separately defined, but they have a general definition. They are all infinite, unchangeable, all-pervasive, eternal, rational, etc., that is, they all have exactly the same set of attributes. Thus, they are all exactly the same, but, yet, they are distinct and many. How is that possible? That may be possible only on the supposition that there is really one Purusa and all other Purusas are His individualisations or differentiations. Or, in the words of the Sankhya, every particular Puruşa is the Absolute Puruşa in so far as He is associated and bound up with Prakrti in a

particular way. This is the reason why the Sānkhya calls every particular Puruṣa infinite, eternal, all-pervasive, etc. No other solution is possible. For, every Puruṣa is perfect, and yet, there are numerous Puruṣas,—these two assertions are inconsistent, if we suppose the Puruṣas to be absolutely different and independent, inasmuch as they will then limit one another by virtue of their absolute differences, and will thus destroy their own perfection. Many beings perfect in the same sense and in the same way, and yet absolutely different, is a self-contradictory assertion.

If we now turn to the Sankhya-Sûtram we find the same conclusion about it. After establishing the multiplicity of the Souls (vide Chap. I, 149, and Chap. VI, 45) it says: "From differences of upādhis or investments also arises the appearance of multiplicity of the one Self, as of Akasa by reason of water-pots, etc." 1 Aniruddha and Vijñāna suppose that this aphorism represents the view of the Vedantins which the author of the Sankhya means to refute. But there is no evidence to defend their views. Compare this aphorism with the following aphorism: "The teaching of the Sruti about the going of Purusa is in respect of his external investment, as in the case of the Sky." 2 Vijnana explains this aphorism as follows: "There are, of course, Vedic declarations about going with reference to the Purusa. But these should be regarded as having been made certainly in accordance with the arguments and teachings of the Sruti and the Smrti about the universality or allpervading character of the Puruşa, and, therefore, only with reference to his connexion with an external investment, in the same of the genus, whereas by the ited to the sky. So is meant the plurality of the species. That is to say, we-

^{1 &}quot;एवमेकलेन परिवर्तमानस न विरुद्धभन्नाध्यास:।"

 [&]quot;चमध्यंत्वेऽपि नारीपात् तत्सिडिरेकलात्।"

 [&]quot;नाडैतश्वितिविरोधी जातिपरत्वात्।"

move while the water-pot is carried (from place to place), (whereas, in reality) the water-pot is removed, and not the sky, so the jîva, the embodied Self, which is like the sky (in this respect).'-Brahma Bindu Upanisad, 13."1 Read this with aphorism 59, Chap. VI, which runs thus: "And, in accordance with the Sruti about its going, though the Self is all-pervading, there takes place, in the course of time, its connexion with the place of Experience, through conjunction of the Upadhi-just as in the case of the sky." Here Vijnana evidently admits that those aphorisms represent the views of the author of the Sankhya that the Soul is essentially one, eternal and all-pervading, but appears to limit itself by embodiment and thereby appears to be distinct. Thus we find that the interpretation given to the aphorism 150 (Chap. I) by Vijnana is evidently mistaken and inconsistent with his interpretation of the last two aphorisms. To avoid misunderstanding we should also read aphorisms 151-154, which are connected with the aph. 150.

The aphorism 151 runs thus: "The Upādhi or investment is different, but not the holder thereof." What this really means is, just as the Ākāśa appears to be different on account of the differences of its $up\bar{a}dhi$, for instance, water-pot, etc., but really it remains identically the same, so the Soul remains essentially the same, though it appears to be different by reason of its different embodiments. Aniruddha and Vijñāna interpret it in a different way consistently with their interpretation of aphorism 150. But we have shown that their interpretation of aph. 150 is erroneous, and therefore, their interpretation of the present in a difference of attributes. Thus,

that possible? That may be possible only on the supposition that there is really one Purusa and all other Purusas are His individualisations or differentiations. Or, in the words of the Sankhya, every particular Purusa is the Absolute Purusa in so far as He is associated and bound up with Prakṛti in a

The aphorism 152 is: "Thus, there is really no imputation of contradictory attributes to the Soul which is present everywhere by its unity." This aphorism is an answer to the objection that if the Soul be really one, how can it become multiple and thereby can it have contradictory attributes, namely, unity and variety at the same time? Aniruddha and Vijñāna have given to this aphorism a different interpretation; but our remark on it will be the same as that on the preceding.

The aphorism 153 runs thus: "Being the property of another, i. e., Prakṛti, it (the property of multiplicity) is only imposed upon the Soul, but really it does not belong to the latter on account of its unity or oneness." Or, in plain language, the aphorism means to assert that the attribute of multiplicity really belongs to Prakṛti; but when she becomes conjoined and associated with Puruṣa, who is essentially one, the latter appears to be different and multitudinous. Or, in the words of modern philosophy, the One Absolute Soul appears to be differentiated into numerous Souls. Aniruddha and Vijñāna give a different interpretation, but it is as mistaken as their interpretations of the preceding aphorisms.

The aphorism 154 is this: "There is no contradiction (by the Sānkhya theory of multiplicity of Purusa), of the Vedic declarations of non-duality (of Purusa), because the reference (in these declarations) is to the genus (of Purusa)." This aphorism raises a new problem and suggests a solution of the difficulty raised in connection with the interpretation of verses 10, 11 and 18 of the Sānkhya-Kārikā, as mentioned before. Some suggest that by the unity of Purusa is meant the unity of the genus, whereas by the plurality of Purusas is meant the plurality of the species. That is to say, when

^{1 &}quot;एवमेकलेन परिवर्तमानस्य न विरुद्धभंगाध्यासः।"

[&]quot; "सम्बन्धमाल ऽपि नारीपात् तत्सिविरिकलात्।"

 [&]quot;नाडैतञ्जलिविरोधी जातिपरलात्।"

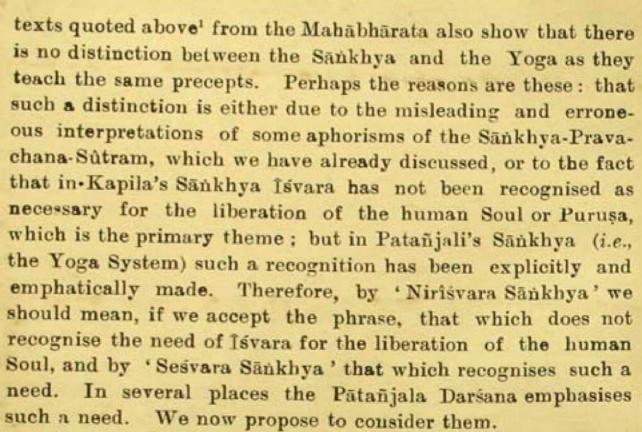

the Purusa is called one, it is regarded as the genus, and when the Purusas are called many, they are regarded as the species, or more properly, individuals. But we should guard ourselves against the confusion which may arise from the two meanings of the word 'genus.' In Formal Logic, genus is an abstract notion representing only the common attributes possessed by a class of objects. Thus, genus is not a concrete reality, but a group of attributes; while the individuals are the concrete things or beings possessing those attributes. In this sense of 'genus' and 'individuals,' what are real and concrete are the individual Purusas, and the One Purusa is nothing but an abstract notion, expressing the common attributes of the individual Purusas, and has, thus, no existence as a real concrete object. This is certainly not the true meaning of the One Puruşa, as we have shown before. The term 'genus' has another meaning: In metaphysics 'genus' is not an abstract notion, but a concrete reality—the true reality, of which the individual things are only differentiations, modes or moments. (Hegel and the Neo-Hegelians.) In this sense of genus and species, the One Absolute Purusa is the true concrete reality, and all the individual Purusas are His individualisations or differentiations, and are, therefore, as real as the former. This is the meaning of the terms 'genus' and 'species' with the author of the Sankhya-Karika also, when he speaks of Purusa as both one and many at the same time. It must be noted here that those who contend that the notion of the unity of Purusa is an abstract genus-notion, representing only the common attributes of the concrete individual Purusas, completely forget that according to the Sankhya tributes by which the Purusas may be distinguished from one another; and we have already proved that the only so-called differentiating attributes, to wit, birth, death, etc., are not the attributes of Purusas, but of the physical bodies or investments with which they are associated. So that, in the absence of any differentiating attribute

or attributes, there cannot be a multitude of Puruşas: in short, there must be one and only one Puruşa associated with numberless different investments, and thereby differentiating Himself into a multitude of Puruşas or Jîvas.

Let us now turn to the Yoga-Sutram of Patanjali. This system of philosophy is admitted on all hands to be the most important supplement to the Sankhya System, and is regarded also as a Sānkhya Philosophy.1 It is, therefore, needless to add that a thorough knowledge of the Yoga Philosophy is an indispensable requisite for the proper understanding of the Sankhya System. The elaborate commentary of Yoga-Sûtram by Vyāsa is generally recognised to be an invaluable aid, not only to an accurate and thorough comprehension of it, but also of the Sānkhya System, as a whole. And some regard that commentary as the best one. The Pātanjala Darsana is generally called the Seśvara Sānkhya, i.e., the theistic Sānkhya, to distinguish it from the Niriśvara Sānkhya, i.e., the atheistic Sankhya. But it is difficult to understand the reasons for such a distinction: for, we have already shown conclusively that Kapila's Sankhya is not atheistic, and the

¹ For instance, it is said by the great sage Vasistha :- "यदेव योगा: प्रकाल डाडेम्सटन-गम्बते। एकं सादाख योगख य: पश्चिति स बुद्धिमान ॥" i. c., "that which the Yogins behold is exactly what the Sankhyas strive after to attain. He, who sees the Sankhya and the Yoga systems to be one and the same, is said to be gifted with intelligence." (Vide Santiparvan of the Mahabharata, Chap. 305, 19.) The same view is repeated in Chap. 307, ibid. "यदेव शास्त्र साङ्गीतां योगदर नमेव तत्," i.e., " verily, the precepts that have been explained in the Sankhya treatises are at one with what have been laid down in the Yoga scripture." The same thing is said by the great sage Yajnavalkya (wide Chap. 316, ibid),- "anter wist-समं जानं नात्ति योगसमं वलम्। तावुभावेकचर्यां च उभावनिधनी स्ती ॥ प्रथक् प्रथक् प्रपर्यात्ति येऽप्यवृद्धिरताः नरा:। वयन्तु राजन पक्तम एकसेव तु निययात्॥ यदेव योगै: पखानि तत् साडीरपि इस्सते। एक साहाच योगच य: पथाति स तस्वित्॥" i. e., "there is no knowledge like that of the Sankhyas. There is no power like that of the Yoga. These two prescribe the same practices and ought to be remembered as immortal or as destroyer of death. Those men, who are not intelligent, consider the Sankbya and the Yoga systems to be different from each other. We, however, O king, certainly regard them as one and the same. What the Yogins have in view is the very same which the Sankhyan also have in view. He who sees both the Sankhya and the Yoga systems to be one and the same is to be considered as conversant with the truth."

(1) "Or, by virtue of the worship of Isvara with a special kind of devotion, meditation and its results can be attained within a shorter time." (2) "Who is that Isvara over and above Prakṛti and Puruṣa?" (3) "Isvara is that particular Puruṣa, who is 'untouched by the vehicles of affliction, action and fruition,' or eternally free from pains, actions, fruits of actions and the desires or instincts arising therefrom." Here mark the phrase 'that particular Puruṣa' (Puruṣaviṣeṣa). Vyāsa comments on it in this way: "(The significance of calling Isvara that particular Puruṣa is) that there are many liberated Souls who have attained liberation by freeing themselves from the three kinds of Bondage, but Isvara is not like them, for, He had no such Bondage before, nor will have it in the future; liberation implies that there was Bondage

Vide ante, p. 39 foot note.

[&]quot; "देवरप्रविधानाद वा।" (पातज्ञलदर्भनम्, समाधिपाद:, २३)

[&]quot; "अथ प्रधानपुरुषव्यतिरिक्त: कोऽयमीयरी नामिति ?" (पा. दां समां २३, व्यासमाध्यम्)

^{* &}quot;क्री वक्कं विपाका अधैरपरास्टः पुरुषविश्रेष देश्वरः।" (पा. द. समा २४)

before; but no such Bondage was possible for Him,-He never had any Bondage. Moreover, those Purusas, who become absorbed into Prakrti, attain some sort of liberation from pains, etc., but they, too, return to a state of Bondage: but that is not possible for îsvara,-He is eternally free and established in Himself." 1 (4) "In Him the seed of the omniscient is not exceeded." 2 (5) "He is the Teacher of the Ancients too, not being limited by time." 3 There is reference to Isvara in other aphorisms also, e.g., in aphorisms 1 and 32 of Sādhana Pāda, and in aphorism 6 of Vibhûti Pāda, but they need not be quoted here. aphorisms quoted above are sufficient to show that Pātañjala Darsana recognises the existence and the need of Isvara for the liberation of the human Souls; it is also evident that it recognises two kinds of Purusas-the Absolute Purusa and the Individual Purusa. What is the relation between these two kinds of Purusas we shall consider in the sequel. But it should be noted here that the Patanjala Darsana does not assert that Isvara is indispensably necessary for the liberation of human Souls, but it only asserts that worship of Him with special devotion helps them to attain liberation within a short time. Mark the word 'va,' i.e. 'or,' which signifies that there are other means to liberation, of which the worship of Isvara is one. In this connexion read especially the aphorisms 21 and 22 of the Samādhi Pāda. Thus, really, there is not much difference between the Sānkhya and the Pātanjala in this respect.

A very good account of the Sānkhya Philosophy is found in Chaps. 301-318 of the Śāntiparvan of the Mahābhārata. In Chap. 301 the Sānkhya System is extolled in a highly elevated

¹ ''कैंबल्सं प्राप्तासाई सन्ति च बहुव: केवलिन: ; ते हि बीचि वस्तनानि किस्ता कैंवल्सं प्राप्ता: । इंचरस्य च तत्सक्त्रों न भूतो न भावी ; यथा सक्तस्य पूर्वा वस्तकोटि: प्रजायते, नैवनीचरस्य । यथा या प्रकृति-जीनस्य उत्तरा वस्तकोटि: सक्षात्यते, नैवनीचरस्य ; स तु सदैव मुक्तः सदैवचर इति ॥''

² "तत निरतिगर्ध सर्वज्ञवीजम्।" (पा, द, समा २५)

^{3 &}quot;पूर्वेषामपि गृद: कालेनानवच्छेदात्।" (पा. द. समा २६)

tone, and the Sankhya knowledge is described in very eloquent words, and even identified with the Brahman Himself.1

There we find that far from denying the existence of Brahman or îśvara, the Sānkhya System identifies the knowledge described in it with Him and declares itself as the very form of Him; even the knowledge as existing in the Vedas, which is admittedly theistic, is described to be derived from the Sānkhya System. This is further confirmed by the following verses embodying what the great sage Vasiṣṭha said: "Above the twenty-four categories already referred to is the twenty-fifth called Viṣṇu (or îśvara). That Viṣṇu, on account of the absence of all guṇas, is not a category, though as that which permeates all the categories, He has been called so by the wise. The Unmanifest Twenty-fourth

भिक्षा राजकाद्दापाचा गक्कित परमां गतिम्। चानेनानेन कीलेय तुल्यं चानं न विदाते ॥ अव ते संगयो मा भूत् चानं सांडा परं मतम्। चवरं अ विभिन्ने पूर्ण बद्ध सनातनम् ॥ जनादिमध्यनिधनं निदेन्दं कर्त्तृ शावतम् । कृटस्यचैव नित्यच यददिन्त मनीषिणः ॥

i.e., " The Sankhyan, O King, are gifted with great wisdom. They attain the highest end by means of this kind of knowledge. There is no other knowledge, O Kaunteys, that is equal to this. About this you must not entertain any doubt; the knowledge described in the Sankhya is considered as the highest. That knowledge is said to be immutable, eternal and the perfect Brahman Himself; it has no beginning, middle and end; it is above all dispute and the eternal cause of the universe; it stands fully and without decrease of any kind; it is uniform and everlasting. Thus are its praises recited by the wise The Srutis say, O son of Kunti, that the Sankhya System is the form of that Formless One. It is said, O Bharatargabha, that the knowledge taught by the Sankhya is the knowledge as taught by the Brahman ... That high knowledge, O king, which is in persons conversant with the Brahman and that which is in the Vedas, and that which is seen in other scriptures, and that in Yoga, and that which may be seen in the various Puripas, are all, O mouarch. derived from the Sankhya Philosophy. Whatever knowledge is seen to exist in great histories, whatever knowledge is, O king, in the Science of Economics as approved by the wise, whatever other knowledge exists in this world-all these originate, O great king. from the high knowledge that is found in the Sankbya Philosophy."

(i.e., Prakrti) caused all that are mortal and manifest and exists in their forms or bodies; but the Twenty-fifth (i.e., Purusa) is formless. Though a Soul, He exists in all hearts and in all forms; He is free, conscious, eternal, and though Himself formless, assumes all forms. Uniting with Prakrti, which is the cause of creation and absorption. He also assumes the agency of creation and absorption. And on account of such union He, who is eternal, exists in time, and though, in reality, shorn of all gunas, yet comes to be invested therewith. It is in this way that the Great Soul, through ignorance, thinks Himself to be the cause of creation and destruction (really absorption), changeful, and identical with Prakrti" 1 (Ibid, Chap. 302, vers. 38-42.) In these verses it is evidently admitted that Purusa, who is described to be the twenty-fifth category or principle, is really Vişnu or Îśvara, for He is not, in reality, a category; He exists in all hearts and forms, not in a particular heart and form only: He assumes all forms and the agency in all creation and absorption. Thus, it is declared that the individualised Purusas or the human beings are nothing but the Absolute Purusa or Brahman connected with different investments and acting at different finite centres in different ways. This last fact is very clearly explained by an analogy in the following verse, declared to be the saying of the same great sage Vasistha: "As the worm that makes the cocoon binds itself completely on all sides by means of the threads it itself weaves, so the Absolute Purusa, though really above all gunas, invests Himself on all sides with them."2 (Ibid, Chap. 303, 4.)

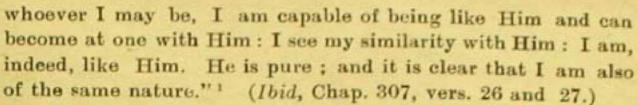

"प्रविविधितिमी विश्वनिस्त्वस्वस्थितितः। यसायौगस्त्रजदाकः तत्तन्युनीश्वितिहति। स एव हदि सम्बीत स्तित्व तिष्ठतेकावान्। सगैप्रवयश्चित्वा स सगैप्रवयात्मकः। एवसेवो महानाका सगैप्रवयकोविदः। तत्त्वं संध्यणादितत्तत्त्वमानुमानीयणः॥ चनुविधितमोऽयक्ती ह्यम्भः प्षविध्यकः॥ केवन्येतनी निषः सम्बंस्त्तिरम्तिमान्॥ गोषरं वर्तते निष्यं निगुणं गुणसंधितम्॥ विक्कृञ्जाणः प्रकृतिमानभिमनाव्ययुविमान्॥"

 [&]quot;कोवकारी ययात्मानं कीट: समवहत्माति । स्वतन्तुगुवीनैत्यं तथायमगुवी गुवै: ॥"

Let us also consider what the same great sage Vasistha said in the following verses in which the existence of the Absolute Purușa or Îsvara is more explicitly admitted: "When the individual Puruşa comes to think of those gunas as belonging to Prakṛti, then only, on account of his conquering them, he sees the Absolute Puruşa or Isvara." (Ibid, Chap. 305, 30.) Again, "When one begins to study and understand properly the twenty-five categories or principles, one then understands that the oneness of Purusa is consistent with the scripture (the Sankhya System) and his multiplicity is opposed to it. These are the separate characteristics of the categories or principles and what is above and beyond them; the wise have said that the categories or principles are the twenty-five evolutes; what is not an evolute or what is above and beyond the evolutes is the twenty-sixth, i.e., the Absolute Puruşa or Brahman or Îsvara. The twenty-five evolutes are called categories or principles, and what is beyond them is the eternal Iśvara." 2 (Vide ibid, vers. 37-39.) It should be noted here that even the twenty-fifth category, called Puruşa (i.e., the individual Purușa), is also regarded as an evolute, while he has been said before to be identical, in essence, with the Absolute Purusa. The discrepancy is apparent only; for, the individual Purușa being the Absolute Purușa in so far as He is invested with the three gunas, he may be viewed from two standpoints: in so far as he is individualised, he may be regarded as an evolute, and in so far as he is viewed as apart from and shorn of that investment, he is one and the same with the Absolute Purusa. The identity between the individual and the Absolute Purusa is more explicitly stated in these verses: "The Supreme Soul alone is my friend. I can make friendship with Him. Whatever be my nature and

 [&]quot;यदा लेव सुकानितान् प्राक्ततानिभमत्वति । तदा स सुक्षान्धै तं परमेवानुप्रकृति" ॥

[&]quot;पचित्रितिनिष्ठोऽयं यदा सम्यक् म्यक्ति। एकलं दर्यनचाम्य नानालचायद्यंनम्॥ तच्चित्रच्चित्रवितित् पृथ्यीव निद्यंनम्। पचित्रितस्येन्तु तच्चमाच्चमेनीिष्यः॥ निस्तच्च पचित्रस्य परमाद्यनिद्यंनम्। स्येत्य वयेमाचारं तच्चं तच्चात् सनातनम्"॥

The same thing we find in the conversation between the great sage Yājňavalkya and Janaka about the Sānkhya Philosophy.2 From this it is plain that the Sankhya System, admits the existence of the Absolute Purusa or Isvara. But in one verse it seems to cast some doubt upon the above inference. That verse is this: "In the Sānkhya System no category or principle above the twenty-fifth is admitted. That which the Sankhyas consider as their highest principle has been duly described (by me). In the Yoga System it is said that Brahman, which is the very essence of knowledge, becomes the Individual Purușa only when invested with ignorance. In the Yoga scriptures, therefore, both the Brahman and the Individual Purusa are spoken of." 5 (Ibid, Chap. 307, vers. 45 and 46.) It is here positively asserted that the Sankhya

"स्यम व भवेदम्बर नेन सह में जामन। साम्यमेकलमायाती यादणसाहण सहम ॥

तुल्यत।सिन्न प्रमासि सहयोऽसमनेन वै। पर्य कि विसली यक्तमहमीहगकसया" ॥

"चव्यक्तद्वी भगवान् शतथा च सहस्रथा। सतथा सहस्रथा चैव तदा सतस्हस्रथा। कीटिगय करीत्येष प्रत्यवात्मानमात्मन।" ॥

i.e. " the Unmanifest Isvara transforms Himself (literally, the inner soul) by Himself into handreds and thousands and millions and millions of forms." (Ibid, Chap. 314, verse 2.) Again,

चन्यय मात्रतोऽत्यक्तमयान्यः पचित्रकः। तस्य दावनुपखेतां तमेकनिति साधवः॥ ते नैतवाभिनन्दन्ति पश्चविंग्कमञ्जतम्।

"यदः तुराधने देखलमहत्त्वहान का छप। तदा स केवली भूतः यह विश्वसनुपद्यति ॥ जनामत्यभयोधेगाः साह्याय परमेविषः ॥"

i. c. "O Kasyapa, if one continually reflects on the nature of the Individual Soul and its connexion with the Supreme Soul, he then succeeds in divesting him of the three kinds of pain and in seeing the Supreme Soul. The Eternal and Unmanifest Supreme Soul is considered by mea of little understanding as distinct from the individual soul. But the wise see both of them as truly one and the same. Frightened by repeated births and deaths, the Sabkhyas and Yogins consider the Individual Soul and the Supreme Soul to be one and the same." (Ibid, Chap. 318, vers. 55-57.)

"पश्चविंवात परं तत्त्वं पद्धति न नराधित। साङ्कालाल परं तत्त्वं यदावदनुवर्णितम् ॥

System does not recognise the existence of any other principle above and beyond the Individual Puruşa: it is only the Yoga System which does so positively. But we have already shown that in numerous other verses it is clearly admitted that the Sānkhya System recognises the existence of the twenty-sixth principle, called Brahman or Iśvara. How can we, then, reconcile these two contradictory assertions? The reconciliation is possible in many ways. In the first place, the true reading of the verse may be different; in the second place, it may be an interpolation; in the third place, it is not wholly inconsistent with the verses previously cited. This verse may mean that the Twenty-fifth (i.e., Purușa) is the highest category or principle, and what is above and beyond it is not a category (निस्तत्त्वम्), and is called by a different name, to wit, Brahman or Îśvara; and therefore, if the Sānkhyas do not read a category in addition to the twenty-five, no inconsistency will be committed. Moreover, having regard to the fact that all the categories or principles (even the Individual Purușa) are evolutes or manifestations (सर्ग:) of the Supreme Purusa, as has been distinctly stated in the preceding verses, it is no fault with the Sānkhya System if it omits to enumerate the latter as a category or principle. Again, it has been distinctly said in the previous verses that the Individual Purusa, who is the twenty-fifth category, is none but the Supreme Purusa as invested with the three gunas, and that he is, therefore, able to be one and the same with the latter after casting off that investment. Now, after stating all these facts, if the Sankhya omits to mention the name of the Supreme Purusa as an additional category or principle, there is no fault in the system; still less does it involve inconsistency in its assertions. Moreover, it should be remembered that in the previous verses it has been repeatedly and emphatically asserted that the Sānkhya and the Yoga Systems are one and the same, that is, whatever is taught by the one is also saught by

the other; but the Yoga System speaks of the Supreme Puruṣa, and this is sufficient to show that even though the Sāṅkhya System does not directly speak of Him (which is not true, as we have shown before), it at least indirectly does so; and still less does it deny or fail to recognise His existence. These considerations dispose of the apparent contradiction mentioned above.

In the second chapter of the Bhagavadgita, which is a part of the Bhişmaparvan of the Mahābhārata, the doctrine of the Sānkhya Philosophy with regard to the true nature of the human Soul and its relation to the Supreme Soul is clearly described. Let us consider those verses wherein that doctrine is expounded: "This Soul cannot be cut into pieces, cannot be burnt, cannot be moistened and dried up: it is eternal, all-pervasive, immovable, unchangeable, without beginning, unmanifest, unthinkable and supersensible."1 (Vers. 24 and 25.) Such a description as this will only suit the Supreme Soul, for only the Supreme Soul is truly all-pervasive (सर्वेगत:), while the Individual Soul is connected with only a particular investment (i.e., the body and its adjuncts); and this interpretation is confirmed by the following verse: "This Soul, which is present in the bodies of all creatures, is always indestructible; for this reason you should not, O Bhārata, lament their death." 2 (Verse 30.) Along with this read also verse 17, which runs thus: "Know that Soul, by which all the universe is pervaded, to be indestructible; none is able to destroy it which is incapable of any increase and decrease." 3 It should be noted here that commentators like Sankara and others agree that

 [&]quot;चक्क द्योऽयमदास्योऽयमक्र द्योऽशोष्य एव च। नित्यः सर्व्यगतः स्थाणरचलोऽयं सनातनः।
 भव्यक्रोऽयमचिन्योऽयमविकार्थोऽयमुच्यते॥''

[&]quot;देडी नित्यमवध्योऽयं देहे सर्वस्य भारत।

तकात् सर्वाणि भूतानि न लं शीचितुमईसि ॥"

[&]quot; विनामि तु तदिष्ठि येन सञ्वीसटं ततम्।

विनाश्मव्ययस्थास्य न कथित् कर्त्तमहंति ॥"

the terms 'tat' and 'yena' refer to Brahman or the Supreme Soul. In the last verse of that chapter the whole thing has been made completely clear. is this: "O Partha, such is the rest in Brahman, and he who attains that state does not get again into the bewilderment of the world; he who rests in Him even at the time of death attains complete union with Him." 1 (Verse '72.) Similar verses are met with also in Chap. 13. For instance, "The Purusa (Soul), who exists in this body, is said to be above and beyond Prakrti, the seer, agreeable and permissive, the lord, the enjoyer, the Supreme îśvara and the Supreme Soul." 2 (Verse 22.) Similarly, "He sees aright who sees the Supreme Lord (Purusa) to be indestructible even in destructible things and to be existent equally in all things and beings." 3 (Verse 27.) The following verses in Chap. 14 are more emphatic: "Prakṛti is my (i.e., of îśvara) womb whereinto I throw my semen: from that, O Bhārata, spring all beings and things. son of Kunti, Prakṛti is the mother (or the material cause) and I (i.e., îsvara) am the father (i.e., the efficient cause) of all the forms that are generated in all classes of things and beings." 4 (Verses 3 and 4.) Thus, according to the Bhagavadgîtā also, the Sānkhya System acknowledges the existence of Brahman or the Supreme Soul of whom the Individual Souls or Puruşas are only differentiations or individualised or specialised forms: or, in other words, the Individual Purusas are but the Supreme Purusa or Brahman in so far as He is invested with the three gunas.

- "एवा बाझी स्थिति: पार्थ नैनां प्राप्य विमुद्याति । स्थितास्थामन्तकालेऽपि ब्रह्मनिर्वाचसच्छिति ॥"
- ° "उपद्रष्टान्मला च भर्ता भोजा महेवर:।
- "समं सर्वेष भृतेष तिष्ठलं परमेश्वरम्।"
- * "मम योनिमंडब्रक तिकान् गर्भे दधान्यहम्। सर्वयोनिषु कौन्नेय सूर्वयः समावन्ति याः।
- परमात्मे ति चाप्यको देवेऽसिन् पुरुषः परः॥"
- विनय्यतस्विनयानं यः प्रायति स प्रस्ति॥"
- सन्धवः सर्वभूतानां ततो भवति भारत ॥ तासां बन्धा महदयीनिरहं बीजपदः विता ॥"

In the course of a conversation between Kapila and his mother Devahūti about the Sānkhya Doctrine, as recorded in the Bhagavata Purana, we find a similar assertion with regard to the existence of Brahman or Isvara. Consider the following verses: "When the chitta becomes free of the impurities caused by lust, greed, etc., arising out of such consciousness as 'this is I,' 'that is mine,' etc., and thereby becomes pure, and remains indifferent to both pleasure and pain, then the Individual Purusa beholds the Supreme Purusa (Brahman or Iśvara) who is above and beyond Prakrti, free from the three kinds of pain, always self-revealing, subtile, indivisible, with a mind filled with wisdom, dispassion and devotion; and he indifferently sees also Prakrti who has now become powerless." 1 (Skandha 3, Chap. 25, vers. 15-17.) Consider also the following verses: "Purusa is the infinite Soul which is divested of the three gunas, above and beyond Prakrti, supersensible, self-revealing, and by which the universe is manifested. That Purusa, out of play only, freely enjoys the subtile and divine Prakrti who posseses three quass and is united with Him. Beholding her who creates various self-like creatures, He at once becomes stupefied through ignorance. In this way, by thinking her as His self, He comes to regard Himself as the performer of the actions which are really performed by the gunas belonging to her. On that account, He, who is not the agent but only the witness, the lord, and full of bliss, comes to undergo the process of migration and to be put under bondage and subjection." 2 (Ibid, Chap. 26, vers. 3-7.) In this

निरन्तरं खर्थं ज्योतिरिषामानमखिक्तम्॥ परिपयात्वदासीनं पक्षतिच इतीजसम॥" यडक्ष्येवीपगतामभ्यपदात लीलया ॥ कमंस कियमाचेषु गुणैराकानि मन्यते॥ भवत्यकर्त्तरीयस साचिची निवतातान: ॥"

^{1 &#}x27;'अहंममाभिमानीत्ये: कामलीभादिभियंखे:। बीतं यदा मन: गुडमदु:खमसुखं समं॥ तदा पुरुष चात्मानं केवलं प्रक्रते: परं। ज्ञानवैराग्ययक्षेत्र भक्तियक्षेत्र चात्मना।

[&]quot;अनादिरात्मा पुरुषो निर्गुणः प्रकृतेः परः । प्रत्यन्थासा स्वयं ज्योतिविदं येन समित्तम ॥ स एव प्रकृति सुद्धा देवी गुणमधी विस:। गुवैविचिचाः सजती सरुपाः प्रकृति प्रजाः । विलोका सुमुर्र सदाः स इर जानगृहया ॥ एवं पराभिध्यानेन कर्त्तलं प्रकृति: पुनान्। तदस्य संस्तिबैन्धः पारतनाञ्च ततकतं।

connexion one thing should be carefully noted: Prakrti has here been called divine (देवी), and Puruşa has also been called above and beyond Prakṛti (प्रकृते: पर:). Śridhara Swāmin, the eminent commentator of Bhāgavata, makes the following observations on these two words: "On account of her possessing two different powers of covering and projecting, Prakrti is of two kinds: By virtue of her capacity for covering, she is the investment of the creatures (jîvas) called ignorance (স্ববিদ্যা): and by virtue of her capacity for projection, she is called divine power (पारमेश्वरी माया). On account of His having two distinct forms such as those of jiva (creature) and Iśvara (the Supreme Soul), Purusa, too, is of two kinds: He is called a jiva, when He migrates from body to body through His identification with Prakrti: and He is called Îśvara when He evolves the world by subjugating Prakrti." The other commentators have not questioned the reasonableness of the above remarks. They may, therefore, be accepted as true. Now, from those verses it is quite evident that Isvara exists, and that He is the real cause of the world, while Prakrti is only His instrument, and the Individual Purusas (jîvas) are none but Himself as invested with the three gunas through ignorance.

The following verses are more emphatic on the existence of Isvara: "Those (twenty-four) categories or principles enumerated (by the wise) have been said by me to be the abode of Brahman as qualified by the three gunas; the twenty-fifth is called Kāla. Some say that Kāla is a power of Brahman or the Supreme Soul which causes dread in the mind of creatures that are confused by self-consciousness arising out of their connexion with Prakṛti; some others say that He, who prompts Prakṛti, when her three gunas reach the state

[&]quot;तत चावरणविचेपमिकिसिट्न प्रकृतिर्दिधा तवावरणम्हा सैव जीवोपाधिरविद्या । विचेपमक्ता सैव नाया पारमेवरी । पुरुषय जीवेयरूपेण दिविध: तत यः प्रकृत्याविवेकन संसर्ति स जीवः । यन्त प्रकृतिं वशीक्रत्य विवस्त्यादि करोति स प्रमिष्ठरः ॥"

of equipoise, to creative activity, is Isvara and is also called $K\bar{a}la$. Isvara may be defined to be that who, by His own super-natural power, exists in the inside of all creatures as their guiding principle, without being Himself touched by their affections, and outside as $K\bar{a}la$." (Ibid, vers. 14-17.)

We shall also see in the next chapter in connexion with the discussion about the personality of îśvara that the Upanişads as well, which derive, as we shall prove, their metaphysics from the Sāṅkhya, further corroborate the fact that the Sāṅkhya does not teach atheism or agnosticism at all, but it positively and emphatically admits and declares the existence of îśvara or God.

"एतावानेव संख्याती ब्रह्मण: सगुणस्य च। प्रभावं पौरुषं प्राष्ट्र: कालमेके यतो भयं। प्रकृतिगुंणसाम्यस्य निर्व्विप्रपस्य मानवि। चन्त: प्रव्यस्पेण कालस्पेण यो वहिः। सिवियो मया प्रीको यः कालः पचिवियकः॥

समन्ते त्येष सन्तानां भगवानात्ममायया॥"

CHAPTER III.

THE PERSONALITY OF GOD.

The essential characteristics of personality may be said to be two, or rather, one, expressible in two forms; and they are: (1) Self-consciousness or consciousness of a centre of reference, and (2) a self-conscious centre of activity or effort, otherwise called Will. These are the general characteristics of all forms of personality. But self-consciousness is not a simple or undifferentiated unity of an essence or substance, but a complex or differentiated unity of a 'system' or 'world'a unity-in-multiplicity; and such a unity is not perfect everywhere, it is so only in God. Thus, God being a perfect unity of self-consciousness, He may properly be called super-personal. When, on the other hand, we say that God is a perfectly unified centre of all activity or effort, we mean the same thing, only expressed in a different form. Or, in short, God is a perfect intellect and a perfect will. If these characteristics constitute the personality of God, does the Sānkhya also attribute the same characteristics to Him? If the answer be in the affirmative, then the Sankhya must be held to regard God as personal, and if, on the other hand, the answer be in the negative, then the Sānkhya must be held to regard God as impersonal. Let us consider which one of these two views it really maintains as its own.

We have found above that the Sānkhya defines Puruṣa in a general way. We should consider the definition very carefully. The Sānkhya-Kārikā defines Puruṣa in this way: "The Manifested is caused, non-eternal, limited, changeful, multiform, dependent, attributive, conjunct (and) subordinate.

The Unmanifested is the reverse." (Verse 10.) manifested has trine constituents, and is indiscriminative, objective, generic, irrational and productive. So also is Nature. Soul is the reverse in these respects as in those." 2 (Verse 11.) 'Tadviparîtastathā cha pumān' may also be rendered in this way: 'reverse in all respects, but also appear to be analogous in those.' From these two verses we may gather the attributes of Purusa: He is uncaused, eternal, all-pervading, unchanging, one, independent, irresolvable, uncombined and self-governed. In these respects he resembles Nature (Prakrti); but he has other attributes in which he differs from her. These adjectives are: destitute of the three gunas or constitutive factors, discriminative, subjective, specific or individual, rational, and unprolific. We should also read another verse along with these two, namely, the verse 19, which runs thus: "And from that contrariety (before specified) Soul is proved to be a witness, eternally free, neutral, perceiving and inactive." 3 If we turn to the Sānkhya-Sūtram we find the following attributes affirmed of Purusa: He is eternal, all-pervading, (Chap. I, aph. 12), free from all association (ibid, aph. 15), eternally pure or unchangeable, eternally enlightened and eternally released (ibid, aph. 19). The other treatises on the Sankhya do not differ, even slightly, from the Sānkhya-Kārikā with regard to the attributes of Purusa. We may, therefore, accept the list of the attributes as given by the latter to be final.

Let us now carefully examine the above attributes. Purusa (the Absolute Self) is rational, intelligent, eternally enlightened: He is, therefore, a Self-conscious Being. But self-consciousness is, as we have seen, not a bare unity, but a system or whole, or what is called a unity-in-multiplicity. Is Purusa a bare unity-a unity of a substance, or the unity of a

[&]quot;हेत्मदनित्यम्थापि सक्तियमनेकमाथितं लिङ्ग।

सावयवं परतन्तम् व्यक्तं विपरीतमव्यक्तम् ॥" "विग्यमविविकि विषय: सामान्यमवितर्ग प्रसवधर्गि । व्यक्तं तथा प्रधानं तदिपरीतसया च प्रमान ॥"

[&]quot;तबाब विपर्यासान सिंह" साचित्रमस पुरुषसा।

केवलां माध्यस्या द्रष्ट्लमकर्भावय ॥"

system? We should notice two other attributes: Purusa is called subject, and Prakṛti, object. Thus, Puruṣa is a Selfconscious Subject who has Prakṛti as object. But this alone does not make Purusa a unity-in-multiplicity—a system or a world; Prakrti may be entirely distinct from, and outside of, Purusa: in that case, even though Purusa may know her, yet He will not have her included in His contents. Thus, Puruşa will be bereft of all contents, Prakrti including, according to the Sānkhya, all the contents which He may know, and reduced to a bare unity. Therefore, to make Purusa a system, or world, Prakrti must somehow be included in His contents. For that purpose the Sānkhya adds another adjective, viz., all-pervasive. Purusa is not only a Self-conscious Subject, but also an all-pervading consciousness or Subject, that is, He includes Prakrti in His nature. Thus, the real concrete Purusa is an all-pervading Self-conscious System or World of which Prakṛti is an element. He is, in other words, an organic synthesis of the Subject and the Object, of the Self and the Not-Self, or, in short, a Subject-Object. Prakrti also is called allpervading, but she is an all-pervading Object or Not-self. If there be an all-prevading Subject, there must also be an all-pervading Object as its correlate. And the concrete Absolute is, thus, an organic synthesis. What would be the logical consequences of this conclusion we shall see in the sequel.

In the meantime we should clear up some difficulties. Purusa is also called free from all attachment or association (असङ्गः) and eternally released (नित्यस्कः). If Prakṛti be included in the contents of Puruṣa, how can these adjectives be applicable to Him? The answer is, that they are applicable, because they express only the particular aspect, and not the whole nature of Puruṣa. Puruṣa is not only immanent in Prakṛti, but also transcendent over her; a self-conscious subject not only includes its object, but also knows itself as distinct from and unexhausted in respect of its contents by

the latter, just, for instance, as our Self includes all our ideas, feelings, willings, etc., and yet has not its contents exhausted by them: the former fact makes the subject immanent in, and the latter, transcendent over, the object. In so far as Purusa is transcendent, He is eternally released, i. e., not under the influence of Prakrti or the Not-Self, and also free from all attachment or association with her. It is only in this sense that the Absolute Purusa or Brahman is spoken of, in the Sruti, as eternally released and free from all attachment with Prakrti. We should always remember that the Sankhya definition of Purusa differs very little from that given in the Sruti, and those who are conversant with the latter know well that according to Nimvārka and Rāmānuja those attributes express only the transcendent (निर्मेण:) aspect of Brahman or the Absolute Purusa. There are other attributes of similar nature, to wit, inactive, unchangeable, unprolific and specific or individual, all of which express the transcendent aspect of Purusa. But in so far as the Absolute Purusa is immanent in Prakrti, He must also possess the attributes of activity, changefulness, productivity and individuality, these being the attributes of the latter in so far as she is manifested. Thus, the Absolute Purusa, in His wholeness, has two sets of attributes apparently opposed to each other, one set expressing His transcendent aspect, and the other, His immanent aspect. Or, we may express the whole fact in another way: As a whole or system, the Absolute Purusa is eternally free, because there is nothing outside Him which can bind Him; no doubt, He is bound by His contents (including Prakṛti), but in that case He is bound by what lie within Himself, by what are His own, that is to say, by Himself; but 'self-bound' is another name for 'free.' He is free from all attachment or association, for, there is nothing outside Him to be associated with: inactive. because, being self-complete, He has no want or purpose to be fulfilled, or no end to be realised, and therefore, He has no desire or volition which is implied in all activity called volun-

tary and human: unchangeable, because there is nothing outside Him which can change His nature, so that, as a whole, He is eternally unchanged: unprolific, because all production implies change, but He is eternally complete : specific or individual, because a systematic whole is the true individual. But as the parts (i.e., all things and beings in the universe) are His own individualisations or differentiations, specific centres of His own activity, He possesses also the attributes of them. This fact is indicated by the phrase, 'tathacha puman,' i. e., Purusa is also analogous to the manifested (व्यक्तम्) in all those respects. In this connexion we may say that the Absolute is not only a perfect intellect, but also a perfect will, understanding by the latter a perfect spontaneity or a perfectly spontaneous active principle. In this sense the Absolute Purușa is active, but His activity does not imply any want, purpose, desire or volition; it is perfectly spontaneous. There are other evidences in the Sānkhya itself which point to the fact that though Purusa and Prakṛti are distinct, they are inseparable elements of One Absolute Whole, or they are correlative aspects of a Higher Synthesis. Consider the following:

- (a) "The bondage of Puruṣa is not due to Prakṛti, for she herself is under His control." (Sānkhya-P.-Sūtram, Chap. I. 18). Here it is positively affirmed that Prakṛti is not independent of Puruṣa, but entirely under His control. This assertion clearly shows that Puruṣa and Prakṛti are not two independent realities, but the latter is an element of the former, for, of two things wholly independent and unrelated one cannot be entirely under the control of another.
- (b) "Without the conjunction of Prakṛti (there can be) no conjunction of Bondage in Puruṣa who is, by nature, eternally pure, enlightened and unconfined." (Ibid, 19.) In the preceding aphorism it is asserted that Prakṛti is not the direct

¹ "प्रकृतिनियन्धनाचेत्र तस्यापि पारतन्त्रम् ॥"

[&]quot;न नित्यग्रज्ञ बुद्ध मुल्लास्था नस्थी गस्त्र्योगाहते।"

cause of Bondage; here it is asserted that the direct cause is her conjunction with Purusa. Now, a question naturally suggests itself here: What is the cause of this conjunction between Purusa and Prakrti? Prakrti cannot be the cause of it, because, then, she will be the real cause of the Bondage, which will be inconsistent with the previous assertion of her non-causality in this respect. Purusa also cannot be the cause, because, He, being eternally free, cannot bind Himself. The Sankhya says that the real cause is the aviveka, i. e., nondiscrimination or the absence of any knowledge on the part of Puruşa about His distinction from Prakṛti. But this answer is absurd, because aviveka cannot pertain to Him, who is eternally enlightened. The true answer is, that the conjunction is eternal, and being eternal, it is eternally uncaused, for what is eternal cannot have any cause. The conjunction is an ultimate fact, because Puruşa and Prakrti are the inseparable elements of One Whole and co-exist from eternity; and therefore, no question about its origin may arise. Thus, the conjunction being eternal, the Bondage is also eternal, i.e., the Absolute Purusa is eternally bound up with Prakrti. What is, then, Release? As Bondage is the result of the identification of the Absolute Purusa with Prakrti, so is Release the result of the knowledge of the distinction between them. Release does not mean absolute separation between them, because that is impossible. The Sankhya does not entertain that view. Thus, the Absolute Purusa is both eternally bound up and eternally released. But He is bound up, not by anything external, but by what is internal, by His own elements, i.e., in so far as He is immanent in His elements, He identifies Himself with them: He is released in so far as He transcends the elements -He knows Himself distinct from, and unexhausted in respect of His contents by, the elements. Therefore, Bondage and Release of the Absolute Purusa are eternal-eternally correlative aspects of His nature. Or, in other words, His bondage is His freedom or release, because it is due to His

own elements, and therefore, due to His own self (खाधीनता). But Bondage and Release have a different meaning for the Individual Puruṣas or men, which we shall explain in the sequel.

(c) "The agency or causality of Prakrti is due to her proximity to Îśvara, as is the case of a loadstone." 1 (Ibid, 96.) Let us examine this aphorism carefully. As a piece of iron derives its power of attraction by virtue of its proximity to a loadstone, so Prakrti derives her power of evolution by virtue of her proximity to Îśvara. Here proximity is described as an essential condition of acquiring such a power. But the analogy is inadequate and misleading. Proximity is a kind of space-relation, which can subsist between a loadstone and a piece of iron, both of them being in space. But how can it subsist between Isvara and Prakṛti? In the first place, proximity implies an interval, however small, between two things; but there cannot be any interval or distance between Isvara and Prakrti, both of them being all-pervading, and included in each other. In the second place, proximity is possible between things which are in space, but îsvara is admittedly above space. (Cf. Aph. 13.) Though, thus, the analogy is inappropriate, it contains one important truth: A piece of iron derives its power of attraction from a loadstone which must itself possess such a power before it can transfer it to the piece of iron; similarly, Prakrti derives her power of evolution from Isvara, who must Himself possess the power before it is transferred to Prakrti. This aphorism, thus, admits that the Absolute Purusa possesses the power of evolution, but instead of exercising it Himself He transfers it to Prakrti. A similar analogy is given in aphorism 99, which runs thus: "The actual causality is of the Antah-karana, because it is lighted up by the Absolute Purusa, as is the case with the iron." 2

[&]quot;तत्मित्रधानादधिष्ठावलं, मिषवत्।"

[&]quot; "बन:करणस तद्ज्वितिताबोहबदधिष्ठावलम्।"

Here, too, the point of the analogy is that Antaḥ-karaṇa (which is an evolute of Prakṛti) derives its power of causation from îśvara, as the iron derives its power of burning from fire; and that, therefore, īśvara possesses the power of causality, as the fire does the power of burning. If the fire did not possess such a power, the iron also could not derive it; similarly, if īśvara did not possess the power of causality, Antaḥ-karaṇa, too, could not derive its power of evolution. Let us consider also aphorism 164.¹ Here, too, it is stated that the causality of Prakṛti is derived from the influence or affection of Puruṣa, which is, again, due to her proximity to the self-conscious Principle. In aphorism 51 º of Chap. III, Prakṛti is described as a born-slave to Puruṣa. There are numerous other aphorisms which point to the same fact, and need not be cited here.

Sometimes the word 'samyoga,' i. e., union or conjunction, is used to express the relation between Purusa and Prakṛti, by virtue of which the latter derives her power of evolution from Purusa. Thus, in the Sānkhya-Kārikā we have the following: "In order that Soul may contemplate Prakṛti and be released, the union of the two, like that of the lame and the blind, takes place; (and) thence creation springs." 3 (Verse 21.) It is curious that the Sānkhya-Kārikā exclusively uses the word 'samyoga,' i.e., union, and the Sankhya-Prayachana-Sūtram, the word 'sānniddhya,' i.e., proximity, to indicate the relation. But the former seems to be more appropriate than the latter for reasons stated above. However, we should note one significant assertion in the verse cited above. Purusa is likened to a lame, and Prakrti to a blind man, each of whom is altogether helpless without the other for the purposes of evolution. But according to the Sankhya the

 [&]quot;उपरागात् कर्न्तं चित्साविष्याचित्साविष्यात्।"

[&]quot; "कर्मवैचित्रात् प्रधानचेष्टा गर्भदासवत्।"

 [&]quot;पुरुषस्य दर्शनाये कैवल्यायं तथा प्रधानस्य। पङ्गभवदुभयोरिप संयोगसत्कतः सर्गः॥"

evolution is eternal, and therefore, the union of Purusa and Prakrti is also eternal; that is to say, Purusa and Prakrti are eternally united, and are, therefore, two eternally correlated aspects of a Higher Synthesis-of One Absolute Whole. This point we have already proved from a different stand-

point.

Before we conclude, we should consider two attributes which are affirmed of both Purusa and Prakrti. They are, 'independent' and 'self-governed' (vide vers. 10 and 11 of the Sānkhya-Kārikā). If Prakṛti be independent and self-governed, how can she be inseparably related to Puruşa? But we have, on the contrary, proved by citing numerous texts that they are inseparably related and two eternally correlated aspects of a Higher Synthesis. How can we then reconcile these two seemingly contradictory assertions? If we think about the matter more closely we find that there is really no inconsistency. We can view the nature of Prakrti from two standpoints: Prakṛti possesses some attributes in common with Purusa, and also possesses some other attributes in respect of which she differs from Him. Thus, there are both identity and distinction between them. As far as they are identical, they are inseparably related, and, therefore, mutually supported or dependent; as far as they are distinct and opposed, they are unrelated, and therefore, mutually unsupported or independent. Thus, Prakrti is independent of Purusa from a particular standpoint, i. e., she is relatively independent, absolute independence being out of the question, for if she had really such an independence, she would fall outside Puruşa, and thus limiting Him would make Him limited or finite. Two things absolutely independent and yet analogous and all-pervading, is a self-contradictory expression. Prakṛti should, therefore, be called relatively independent. Prakṛti is also called self-governed; but 'self-governed' is the same as 'independent.' Thus, Prakrti is only relatively self-governed. This disposes of the remaining difficulties.

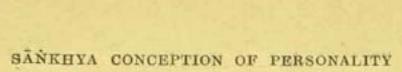

It is, no doubt, true that the whole tenor of the Sānkhya Philosophy is to maximise the distinction or opposition, and to minimise the relation, between Puruṣa and Prakṛti. To a less intelligent or careless reader the Sānkhya would appear to be a rigorously pluralistic system; but to a more careful and intelligent one it would appear that the system, as a whole, is relatively pluralistic, teaching in many places, though less prominently, the unity of an Absolute Principle underlying the plurality. We shall revert to this point when dealing with human personality.

Let us now turn to the Yoga-Sûtram, which is also called a Sānkhya Philosophy, to see what view it entertains with regard to the personality of God or Isvara. In this connexion we shall examine more carefully those aphorism of the Yoga-Sûtram which we have considered before, as in them Patanjali has mainly discussed the nature of Isvara. These are aphorisms 23-261 of the Samādhi Pāda. We have mentioned before two essential characteristics which constitute the personality of Isvara, to wit, (a) perfect self-consciousness, or a centre of reference of all objects, and (b) perfect will or a centre of activity which is directly or indirectly the source of all activities in the world: Or, in other words, the personality of Isvara consists in a perfect intellect and a perfect spontaneity. I shall show that these two characteristics are found to be described in the above aphorisms. In aphorism 25 2 it is said that the seed of omniscience has reached its acme (पराकाष्टा) in Isvara, that is to say, He is described to be a perfect Intellect or a perfect Self-conscious Being. This inference is further confirmed by aphorism 26 where Isvara is described to be the Original Preceptor (আহিয়ত:) of all other first-born preceptors, e.g., Brahmā, etc. The meaning of this is that Isvara is the original or ultimate Source of all knowledge and

^{&#}x27;'त्रंत्ररप्रशिधानाद वा''।२३। ''क्रोशकर्माविपाकायधैरपरास्यः पुरुषविश्रीय दंत्ररः''।२४। ''तय निरतियसं सब्बंज्ञवीलम''।२५। ''पुर्व्वेषासपि गुरुः कालेनानवच्हेदात"।२६।

 ^{&#}x27;'तत निर्तिगर्य सब्बैजवीजम्''।

truth. All these conclusively show that Isvara is a perfect self-conscious Being, who is all-knowing and the ultimate Source of all knowledge and truth. From this all-knowing character of Îśvara follows His eternity and infinity, inasmuch as an all-knowing Being cannot be limited in time and space. If He were so limited, He could not know all; He could not know what was outside and beyond the limit, and thus, could not be an all-knower. Is He also a perfect Will? In aphorism 24 Îśvara is described to be a particular Purușa, eternally free from pains, actions, fruits of actions, and desires arising from them. Here He is described to be destitute of actions and desires, i.e., of will, as ordinarily understood. Let us quote in extenso the comments made by Vyāsa on this aphorism ; " Kleśas (pains) are avidyā (ignorance) and the rest; Karmans (actions) are vices and virtues; vipāka is the fruits of actions; āśayas are desires following therefrom. Though they are qualities of the manah, yet they are called the qualities of Purusa, because he is the enjoyer or knower of their fruits or consequences, just as the victory or defeat, which really belongs to the actual fighters, is usually ascribed to their master. That particular Purusa, who is free from the enjoyment of those fruits or consequences, is called Îśvara. But there are many other Purusas called kevalins, who have also attained liberation called kaivalya; they have attained kaivalya by freeing themselves from three kinds of bondage. Iśvara had no connexion with those three kinds of bondage in the past, nor will have any in the future. As by "the liberation" is understood innumerable previous bondages, so is not the case with Isvara. Or, as it will be possible for the absorbed into the Prakrti to have innumerable future bondages, so will not be the case with Isvara, for He is eternally free and eternally Îśvara." 1 Now, it is evident from the above that Îśvara is

^{&#}x27;'बवियादय: क्रेशा: ; कुश्लाकुश्लानि कर्माणि ; तत्फलं विपाक: ; तदनुगुणा वासना आश्याः । ते च सनसि वर्त्तमानाः पुरुषे व्यपदिख्याने, स हि तत्फलस्य भौजेति ; यथा जयः पराजयो वा थोडूष वर्त्तमानः स्वामिनि व्यपदिख्यते । योद्यनिन भौगेन वपरास्टः, स पुरुषविशेष देवरः । क्रेबल्यं प्राप्तासर्थं सन्ति च वहवः

eternally free from all vicious and virtuous actions, as well as from all desires arising from them. Actions also imply desires as their motives; but desires and actions are essential characteristics of will; it, therefore, follows that Isvara has no will. But this is not the real inference for the following reasons: (a) In aphorism 23 1 it is positively asserted that Isvara shows kindness to the yogins by enabling them to attain samadhi and its fruits in a shorter time. Let us examine Vyāsa's comments upon it: "When a yogin worships Isvara with a special kind of devotion He does kind deeds to him at the moment of his meditation, and on account of that meditation the vogin's attainment of samādhi and its fruits becomes instantaneous." 2 Consider, then, aphorism 26.3 In this aphorism it is clearly asserted that Îśvara is the original preceptor (आदिगुर:) of all the first-born preceptors, e.g., Brahmā and the rest, because He is above time, while they were born in time and had a limited longevity. It is manifest from this that Isvara is not absolutely inactive, for He is the ultimate instructor of all knowledge and truth. This fact is made more explicit and emphatic in the commentary of Vyāsa on the aphorism 25.4 Vyāsa holds: " Even though He (i.e., îśvara) has no want so far as He Himself is concerned, yet He has want in the shape of doing good to the Jivas: the latter want is this: I shall liberate the entangled Purusas during the Kalpa-pralaya and the Mahāpralaya by means of instruction about knowledge and religion. It is likewise said: 'The primeval Seer, (incarnated) through the

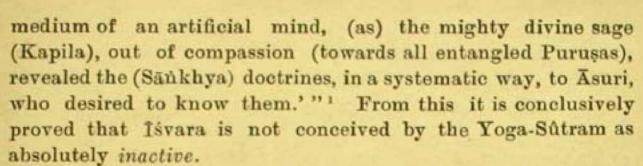

केवलिन:; ते कि वीकि बन्धनानि कि ला कैवल्यं प्राप्ताः। ईश्वरस्य च तत्मन्वन्धो न भूतो न भावी; यथा मुक्तस्य पृथ्वा बन्धकोटि: प्रश्नीयते, नैवमीश्वरस्य। यथा वा प्रकृतिलीनस्य उत्तरा बन्धकोटि: सभाव्यते, नैवमीश्वरस्य; स तु सदैव सुक्तः सदैवेष्टर इति।"

[&]quot;दंश्वरप्रणिधानाद वा।"

^{ै &#}x27;'प्रविधानात् भक्तिविधीयात् भाविक्वित ईश्वरस्तमनुग्टहाति भिभ्यानमातेष, तदभिष्यानाद्यि योगिन भासवतमः समाधिलाभः फल्य भवतीति।''

[&]quot; ''पूर्व्वेषामि गुरु: कालेनानवच्छेदात्।''

 [&]quot;तच निरित्रयं सर्वज्ञवीलम्।"

(b) How, then, is this last assertion to be reconciled with the previous one? In the aphorism 242 it is asserted that Isvara is eternally free from actions and their consequent desires: in other aphorisms, to wit, 23, 25 and 26, it is held that He is not wholly inactive and destitute of desires: He does some acts and has some desires. How can we reconcile them? The reconciliation is easy. When Isvara is said to be eternally free from actions and desires, these actions are good or bad, virtuous or vicious, actions; and the desires are those which arise out of them. Now, those actions and desires are possible only for man: the epithets 'good' or 'bad,' 'virtuous' or 'vicious,' are not applicable to the actions of îśvara, for He is above duties and virtues. The sense of duty is the sense of the conflict between Reason and Inclinations-between the Higher or rational Self in man and his Lower or passional Self; and virtue is nothing but a habit of doing duty. îsvara no such struggle is possible, because He has no such passions and desires, which resemble those which arise from the physical wants and appetites of man: Iśvara is perfectly rational and perfectly realised, so that His actions cannot be called good or bad, virtuous or vicious in the same sense in which human actions are so called: Or, more appropriately, those epithets are wholly inappli-

[&]quot;तस्याकानुग्रहाभाविऽपि भ्तानुग्रहः प्रयोजनम्, ज्ञानधक्यांपदेशेन कल्पप्रलग्रमहाप्रलग्रेषु संसारिणः प्रधान् उद्वारियध्यामीति। तथाचीक्रम् 'पाद्रिविदान् निकाण-चित्तमधिष्ठाय कारुग्यात् भगवान् परमधि-रासुर्ये जिज्ञासमानाय तन्तं प्रोवाचं दिति॥"

 ^{&#}x27;क्षे शककंविपाकाशवैरपरावष्टः पुरुवविशेष देवरः ।''

cable to His actions. This proves that îsvara is not inactive, but that He acts, and His acts should not be called good (कुशलम्) or bad (चकुशलम्), virtuous or vicious ; and therefore, He is eternally free only from those actions to which those epithets are applicable. Again, divine actions, as we have found, are not prompted by desire, purpose, end or motive, as ordinarily understood, because such a desire, etc., arise out of human conditions which are absent in Îśvara: His actions are perfectly spontaneous. The same is true of desires: Isvara has, no doubt, desires, but these desires are not determined by, or follow from, the good or bad actions, because He is eternally free from such actions. Like His activities, His desires also are perfectly spontaneous, and are not determined by any wants. In short, the activities, desires, etc., of îsvara are of a quite different nature, the most imperfect resemblance of which is found in the most highly developed life as that of a saint or prophet. Thus we find that the two apparently inconsistent assertions are not really so; they are both true so far as they go. We may, therefore, conclude that, according to the Yoga-Sûtram, Isvara is a perfect Self-consciousness or Intellect; He is, therefore, both a perfect Intellect and a perfect Will. Thus, He is a person, or rather superperson (Puruşa-viśeşa).

From the verses quoted above from the Santiparva of the Manabharata it can be inferred that Isvara is not only a Self-conscious Spirit, but also a Will, that is, an Active Principle. There are several other verses which go to confirm the above, conclusion.

E. g., 'दिवसालो गुणानितानकोत्येकोऽवितिहते । रिप्तजालिमिवादित्यस्थान् स्विधित । एवमिपोऽसकृत् सब्वे कोइार्यमिमस्यते । शाक्षकपगुणानितान् विविधान् इदयप्रियान् ॥ एवमितां विक्रवाणः सगैप्रलयधिक्षणोम् । किया क्रियापय रक्षस्तिगुणा विगुणाधिपः ॥''

i.e., "When the time comes for Universal Dissolution, all existent objects and games are withdrawn by the Supreme Soul, which then exists alone like the sun withdrawing at evening all his rays; and when the time comes for Creation. He once more creates and

But one point should be made clear in this connexion. Although in the above 'verses it is definitely and distinctly asserted that îsvara or the Supreme Soul is the real cause of

spreads them out like the sun shedding his rays when the morning comes. Thus the Supreme Soul, for the sake of sports, repeatedly considers Himself invested with all these conditions, which are His own forms and gunas infinite in number and agreeable to Himself. It is thus that the Supreme Soul, though really above the gunas, becomes attached to the path of acts and creates, by modification, Nature invested with the conditions of birth and death, and at once with all acts and conditions which are characterised by the three gunas." (Santi P. Chap. 303, verses 31-33.) Again,

"स लिङ्गान्तरमासादा प्राक्ततं लिङ्गमत्रणम्। व्यवदाराण्यधिष्ठाय कर्णाणात्मनि मन्यते ॥"

i.e., "Although the Supreme Soul is not subject to changes of any kind, and is the active principle that sets nature (Prakrti) in motion, yet entering a body which is united with the senses of knowledge and actions, He considers all the acts of those senses as His own." (Ibid, ver. 48.)

" अप्रबुद्धमधाव्यक्रमगुर्थ प्राइरीयरम्। निर्गुषाधीयरं नित्यमधिष्ठातारमेव च ॥"

i. e., "The Supreme Soul is said to be that who is above the attribute of Ignorance or Error, who is Unmanifest and beyond all gunas, who is called the Supreme, who ordains all things, who is Eternal and Immutable, and overrules Nature and all her gunas." (Chap. 305, ver. 32.) Still again,

" सगंप्रलय एताबान् प्रकृतिर प्रसण्म । एवभव च राजेन्द्र विश्वे यं ज्ञानकीविदैः । एकत्वच बङ्गत्वच प्रकृतिरयंत्रच्तः । बङ्घात्मा प्रकृत्वीत प्रकृति प्रस्वात्मिकां । चित्रं जानाति चाव्यकं चेत्रच दित चीच्यते ॥

एकलं प्रलये चास्य वहुलच यदास्त्रत्॥
चिवारमञ्जाकस्थाप्येतिव्रश्नम्॥
एकलं प्रलये चास्य वहुलच प्रवर्णनात्॥
तश्च चेतं महानात्मा पचिवंशोऽधितिष्ठति॥
चिवानादिधिष्ठाता चेताणामिति नः सुतम्॥
चयाकिक प्रविशति प्रकृषयेति कथ्यते॥
……"

i.c., " O best of Kings, this is the manner in which the Creation and the Destruction of Nature takes place; the Supreme Being is all that remains when Universal Destruction takes place, and it is He who assumes various forms when Creation begins. This is even so, O king, as ascertained by men of knowledge. It is Nature that causes the Overpresiding Soul to thus assume diversity and revert back to unity. Nature also herself has the same marks. One fully conversant with the nature of the categories knows that Nature also assumes the same sort of diversity and unity, for when destruction comes she reverts into unity and when creation takes place she assumes diversity of form. Soul makes Nature which contains the principles of production or growth and assumes various forms. Nature is called Keetra (or soil). Above the twenty-four categories or principles is the Soul which is Great. It presides over that Nature or Keetra. Hence, O great King, the foremost yatis say that the Soul is the Presider. Indeed, we have heard that on account of the Soul's presiding over all Keetras, He is called the Presider. And because He knows that . Unmanifest Kaetra, He is, therefore, also called Ksetrajna, And because also the Soul enters into Unmanifest Ksetra, He is called Parasa."...(Chap. 306, vers. 33-37.)

Vide foot-note.

the manifested world, yet in some other verses the opposite view seems to be entertained. For instance, consider the following verses: "That which is shorn of the gunas, O dear lord, is incapable of being made to be possessing the gunas. Listen, however, to me as I explain to you what is endued with the gunas and what is not. Great Munis conversant with the truth about principles say that when Soul seizes the gunas like a crystal catching the reflexion of a red flower, He is said to be possessed of the gunas; but when freed from them like the crystal freed from reflexion, He is seen in His real nature, which is above all gunas." 1 (Chap. 315, 1-2.) Again, "On account, again, of His being the witness of everything, and on account, also, of there being nothing else than Him, as also for His consciousness of oneness with Nature (Prakṛti), yatis endued with ascetic success, conversant with the spiritual science, and freed from fever of every sort, consider Him as existing by Himself without a second."2

The same fact is declared in a more emphatic way by Yājūavalkya in his conversation with Januka :

शत्था सहस्रधा चैव तथा गतसहस्रधा। "धव्यक्रहपा भगवान शतधा च सहस्रधा। कोटिशय करोत्येष प्रत्यगात्मानमात्मना॥"

i.c., "The Unmanifest Isvara transforms His supersensible Self by Himself into hundreds and thousands and millions and millions of forms." (Chap. 314, ver. 2.) Again,

"कर्न्लाबापि तस्त्रानां तस्त्रधर्मा तथोखते। कर्न्लाबापि सगाणां सग्धमां तथोखते। कत्तं लामापि योगानां योगधन्मां तथीचते ॥ कत्तेलात् प्रकृतीनाच तथा प्रकृतिधन्मिता ।

i.e., "On account of the Supreme Soul's supremacy over the categories, He is said to partake of their nature; on account also of His agency in the matter of creation, He is said to possess the quality of creation. On account of His agency in the matter of Yoga, He is said to possess the quality of Yoga. For His supremacy over those particular principles known by the name of Nature, He is said to possess the character of Nature. For His agency in the matter of creating the seeds, He is said to partake of the nature of those seeds. And because He causes the several principles or gunas to come into being, He is said to be subject to decay and destruction ... " (Chap. 315, vers. 7.9.)

- गर्वेहिं गुणवानेव निर्मणयागुणस्या।
- "उपेन्यवादनववादभिमानाच केवलम्।

"न शको निर्मुणसात गुणीकर्न् विशास्पति । गुणवाशायगुणवान् यथातस्वं निवीधसी ॥ पाहरेवं महात्मानी मृत्यसत्त्वदर्शितः॥"

मनान यतयः मित्रा प्रध्यात्मन्ता गतन्त्रनाः ॥"

(Ibid, ver. 9.) But if we examine the above verses carefully we find no inconsistent assertions made in them. The Sāṅkhya Philosophy has, as we have said, all along entertained two apparently opposed views with regard to the Soul (Puruṣa): The Soul, it maintains, has two aspects or sides—transcendent (निर्मुष:) and immanent (समुष:). So far as the Soul is immanent in the manifested world, He is called saguṇa, or invested with the three guṇas, that is, assuming numberless finite forms; and so far as He is transcendent over the manifested world, He is called nirguṇa, or divested of the three guṇas, that is, existing in His own pure essential form (स्वरूप:). We have already discussed, at considerable length, the reasonableness of such a distinction and found that there is no inconsistency involved in it.

If we now come to Bhagavadgîtā we meet with similar assertions. Sometimes the Supreme Soul is spoken of as nirguna and sometimes as saguna. Consider, for instance, the following: "The Supreme Soul, though devoid of all the senses, appears to be occupied in their functions; though unattached to anything, He is sustaining, and though devoid of all the quias, He is the experiencer of them all. Though Himself whole and undivided. He exists in all things as if He were divided; He should be regarded as the creator, the sustainer and the destroyer of all things. Prakrti (Nature) is said to be the cause of the body and the senses, while Purusa is said to be the cause of the experience of happiness and misery. O Bharatarşabha, know the union between the Ksetra (Prakrti) and the Ksetrajña (Purusa) to be the real cause of all the animate and inanimate things. He sees truly who considers the activities done everywhere as due to Prakrti, and that Purusa is inactive or non-agent. The Individual Purusa attains the status of Brahman when he beholds all the distinct creatures to be existent in one and the same Soul, and understands the origination of the

universe to be due to that one Supreme Soul."1 (Chap. 13, verses 14, 16, 20, 26, 29 and 30.)

Turning to Śrimad-Bhāgavata we find also similar expressions. Examine, for instance, the following verses: "In this way identifying Himself with Prakrti, Puruşa thinks Himself as the agent of the actions really performed by her gunas. For that reason, His migration, bondage and subjection are due to that identification, although He Himself is non-agent, lord, witness and full of bliss. Know Prakrti to be the cause of the body and the senses, and Puruşa, who is above and beyond Prakrti, to be the cause of the experience of happiness and misery. On account of being unchangeable, inactive and devoid of the gunas, like the reflexion of the sun in water, Purusa, though residing in Prakrti, remains unstained by the gunas. But when that Purusa becomes attached to them, He gets stupefied by self-consciousness and thinks Himself to be the agent. O woman,2 He is Îśvara, called Kāla, who prompts Prakrti, when her gunas attain the state of equilibrium, to the act of creation. When the Supreme Soul or Isvara threw His semen (in the form of consciousness) into the womb of Prakrti agitated by the influence of the previous actions of the jîvas, she gave birth to the category of Mahat (consciousness or intelligence) prolific of multifarious manifestations. When the category

> "सर्वेन्द्रियगणाभासं सर्वेन्द्रियविवर्क्तितम। चसतां सर्वध्येव निग्वां गुणभीत् च॥" (१४) "अविभक्तच भृतेष विभक्तमिव च स्थितम्। भूतभन् च तज्जी यं यसिशा प्रभविशा च॥" (१६) • "कार्थकारणकत्तं हेतः प्रकृतिरूचते। पुरुष: सुखदु:खानां भोक्तुचे हेतुरुवते ॥" (२०) "यावत संजायते किश्वित सत्त्वं स्थावरजङ्गमम। चेष-चेत्रज्ञसंयोगात्तिहित भरतपंभ ॥" (२६) ''प्रक्रत्येव च कर्माणि कियमाणानि सर्वेग:। यः पद्मति तथाकानमकत्तारं स पद्मति॥" (२८) "यदा भूत-प्रथम्भावभिकस्यमनुपर्याति । तत एव च विसारं ब्रह्म सम्पदाते तहा ॥'' (३०)

Kapila's mother to whom the verses were addressed.

of Mahat, thus generated from the semen of the Supreme Soul, underwent changes, it gave birth to the three kinds of self-consciousness (अहद्वार:) characterised by the power of activity." 1 (Skandha, 3, Chap. 26, 6-8; ibid, Chap. 27, 1; Chap. 26, 16, 18 and 22.)

Let us now turn to the Brahma-Sûtram where some assertions are made which seem to go against our contention that Îśvara and Prakṛti are inter-dependent and mutually inclusive. Examine the following aphorisms: (1) "Prakrti being dependent on îsvara, is capable of acting to realise an end, i.e. of creation." (Chap. I, pada 4, aph. 3.) Nimbārka comments on this in this way: "Pradhāna or Prakrti as described in the Upanisads, being dependent on the Supreme Cause (i.e. Îśvara), is capable of purposive action, i.e., creation, whereas Pradhana as described in the Sānkhya, being independent of Him, cannot be so: such is the difference." 3 Here it is distinctly stated that Prakrti is, according to the Sankhya, independent of Isvara. It is difficult to understand wherefrom that conclusion is

> "एवं पराभिध्यानेन कर्त्तल' प्रकृते: पुमान । कर्णम कियमाणेषु गुणैरात्मनि मन्यते॥ तदश संस्तिवेशः पारतनाय ततकतम। भवत्यकत्तंशीयस्य माचियो निहतात्मनः॥ कार्यकारणकर्त्व कारणं प्रकृतिं विदुः। भीकृति सखद:खानां पुरुषं प्रकृते: परम्॥" (फान्ध ३, घ: २६, घी: ६-८) ''प्रक्रतिस्थोऽपि पुरुषी नाज्यते प्राकृतेर्गकैः। यविकारादकन्तानिर्गुषलाञ्चलाक्षेत्त । स एव यहिं प्रकृतिगुंगीवाभिविषवाते। चह्रदारविमुदातमा कर्त्ताहमिति मन्यते ॥" (च: २०, छी: १) "प्रकतेर्गं वासाम्यस्य निर्व्विश्रीषस्य मानवि । चेष्टा यत: स भगवान् काल इत्यपलचित:॥ दैवात चभितधिष्यंखां खखां योनी पर: पुनान। बाधत बीय्ये सामृत महत्तत्वं हिरणायम् ॥'' (ब: २६, श्री: १६, १८) "महत्त्वादिक्वांगाह्यवदीर्थमभवात्। क्रियामक्रिरहढारस्त्रिविध: समपदात ॥" (द्यी: २२)

" "तदधीनतादधंवत।"

 [&]quot;बीपनिषदं प्रधानं परमकारकाधीनलाद्वेवदानवंका पराभिमतस्य तस्येति भेदः।"

drawn. I have conclusively proved by citing nu merous texts that îsvara and Prakṛti are, according to the Sānkhya, mutually inclusive and eternally united; Prakrti is nothing but an element or power of Isvara as much according to the Sānkhya as according to the Upanişads. This is, therefore, undoubtedly a strange misunderstanding. (2) "There is nothing beside Prakṛti which can prompt her to action: Purusa is eternally unattached to anything." 1 (Chap. II, pada 2, aph. 4.) Nimbārka comments on this thus: "Pradhāna cannot be the cause of the world, because it is not guided by the conscious Puruşa. Why? Pradhāna being independent, it has no other assistant than itself." Here, too, it is supposed that Pradhana is independent of îsvara, according to the Sānkhya; but that the supposition is mistaken has been satisfactorily proved before. It is curious that Vyāsa. as the author of the Brahma-Sûtram, declares that Pradhana or Prakṛti is, according to the Sānkhya, independent of Isvara, while, as the commentator of the Yoga-Sûtram, he writes that Prakrti and Purusa are not wholly distinct, that Brahman resides in a concealed form in the chitta, i.e., the mind, which is nothing but a compound of three evolutes of Prakṛti, and that the knowledge of the world attained by the Buddhi-sattva (the pure intellect) is identical with that of Purusa. (Vide commentaries on aph. 20 of the Sādhana-pāda, aph. 4 of the Samādhi-pāda, and aphs. 22 and 23 of the Kaivalya-pāda, cited in Chap. IV.)

Now, Vyāsa has evidently derived his view from the Upaniṣads; therefore, it is necessary to examine carefully the texts referred to. In several Upaniṣads Prakṛti and her evolutes are mentioned in various connexions, but it is in the Svetāśvatara Upaniṣad, in particular, that the relation between Iśvara and Prakṛti is more explicitly

¹ ''व्यतिरेकानवस्थितेथानपेचलात्।''

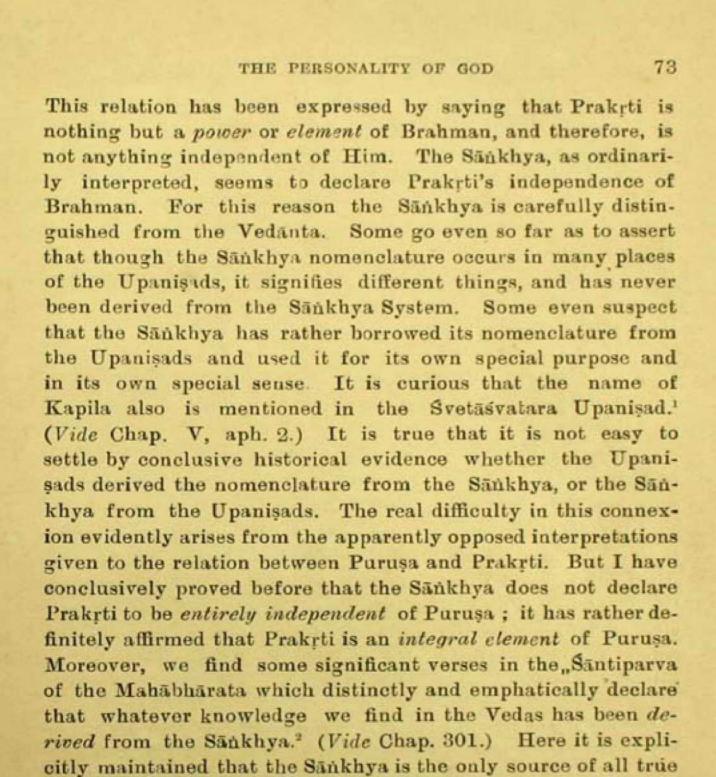

^{ं &#}x27;भाजीनाऽनिधिष्ठितं प्रधानं न जगत्कारणं, कुतः ? तदातिरिक्रस्य सहकाय्येन्तरस्यानवस्थितेर्यंतस्य तदनपेचलात्॥''

described. (See Chap. I, aphs. 10-12; and Chap. IV, aphs. 5, 6, 7 and 10.)1

Here the nature of the Infinite Soul, the finite Soul and Prakṛti, as well as their mutual relations are clearly stated. What we are especially concerned with here is the precise relation between the Infinite Soul (Brahman) and Prakṛti:

'चरं प्रधानमस्ताचरं हरः, चरात्मनावोशते देव एकः। तस्याभिष्यानाद योजनात् तस्वभावात् भूययाः नो विश्वमाद्यानिइत्ति: ॥" i. e., " Pradhana or Prakrti is changeful, but Isvara is unchangeful and immortal; that one (Isvara), manifesting Himself, regulates the aforesaid changeful Pradhana and all jivas. The jivas liberate themselves from the world-illusion by means of constant meditation upon Him and thinking Him as one with themselves." (Chap. I, aph. 10.) "जात्वा देवं सर्वपाणापहानि:, चीणै: क्रोजैन्मसत्यप्रहाणि:। तस्याभिध्यानान्तीयं देवभेदे, विश्वेश्वय्यं केवल पासकाम: ॥" i.e., "If one knows Him, all his connexions with the world are severed; so that all the pains of that wise one arising out of non-discriminative knowledge (avidyā) are destroyed and he becomes released from repeated births and deaths. By meditation upon Him that wise Paraya, after the destruction of the body, attains that third essential form of Isvara which is unmanifested in and above the world, and thereby becomes the possessor of all worldly grandeur, as well as becomes entirely self-contented and divested of the three gunas." (Ibid, aph. 11.) "एतज्ज्ञीयं नित्यमेवातमसंस्यं, नात:परं वेदितव्यं डि किश्वित। भोजा भोग्यं प्रेरितारश्च मत्वा, सब्वं प्रोजं विविधं ब्रह्मसेतत् ॥" i.e., "This self-existent Brahman is the only thing worthy to be known, there being nothing else fit to be thought of : This Brahman is the enjoying ilvas, the enjoyable world, and Isvara (lord), their guide and ruler. He has these three forms, and should be meditated upon in this way only." (Ibid, aph. 12.) "बनामेकां लीहितग्रक्तकणां, बहारे प्रजाः सनमानां सहपाः। यजी खेको जुबमामीहनुप्रीते, नहात्येनां भक्तभोगामजीऽन्य: ॥" i.e., " Eternal one (i.e., the Individual Soul), enjoying another (i.e., Prakrti), which is equally eternal, and is red, white and black, i.e., possessing three ganas, called Sattva, Rajas and Tamas, and procreatrix of various objects like he self, remains attached to her; another eternal one (i.e., Isvara) exists without being attached to Prakṛti which supplies the materials of enjoyment to the Individual Paruṣa," (Chap. 4, aph. 5.) "दा सुपणां सयुजा सखाया, समानं इसं परिवस्तजाते। तथोरना: पिपालं खादत्त्व-नमूझनो भिचाकशीति ॥" i.e., "Two friendly birds live together on one tree (i.e., the body), one of which, called the Individual Soul, tastes the fruits of that tree, thinking them palatable, while the other (i.e., Isvara) does not taste them, but remains a mare spectator." (Ibid, aph. 6.) "समाने हसे पुरुषी निमग्रीहनोग्रवा शोचित मुखामान:। जुड्टं यदा प्रयासमाग्रमस्य, महिमानमिति बोतशोक: "" i.e., "On the same tree one bird called five lives and gets entangled with it, and being impotent to liberate itself, goes on lamenting : when, then, it comes to know the greatness of the other bird called Isvara it gets released." (Ibid aph. 7.) ''मायाना प्रकृति विद्यान्याविनना महेवरम्। तस्यावयवभृतेना न्यातं सर्विमहं नगत्॥'' i.e., " Practi, which possesses the three gunds, and is the material cause of the world, should be known to be a power of Brahman called Maya, and Brahman should be known as the possessor or source of that power. The world is pervaded by the numerous different evolutes of that power called Maya." (Ibid, aph. 10.)

and high knowledge, and that every other branch of knowledge, including even the Vedas, has derived its knowledge from the Sānkhya. This is further confirmed by verses embodying the

[&]quot; "ऋषि प्रमृतं कपिलं यसमये जानैविभित्तं चायमानच प्रमोत्।"

[&]quot; अमूर्णसस्य कौलीय सांख्यं मूर्णिरिति स्रुति:। अभिज्ञानानि तस्याइमैतं हि भरतवैभ ॥ जानं महदाहि

sayings of the great sage Yājñavalkya.¹ (Vide Chap, 316, aph. 2; Chap. 301, aphs. 100 and 101.) The Bhagavadgîtā also bears the same testimony.² (Vide Chap. 5, verses 4 and 5.) These are undoubtedly good and clear testimonies which go to show that there is no real inconsistency between the Upaniṣads and the Sāṅkhya with regard to the relation between Puruṣa, whether Absolute or Individual, and Prakṛti. It is surprising that Vyāsa, who, as the writer of the Mahābhārata, was quite aware of these facts, had still written to say that the Prakṛti of the Upaniṣads is wholly different from that of the Sāṅkhya. He has, as I have pointed out before, also contradicted himself when explaining the relation between Prakṛti and īśvara in his commentary on the Yoga-Sūtram.

We may conclude, then, by holding that the Sānkhya teaches that there is one Absolute Puruṣa—one Absolute Self-conscious Self or Iśvara, who includes Prakṛti as one of His constituent elements, and uses her as the means to differentiate or embody Himself into numberless objects, which constitute the world; and that He being, thus, a Self-conscious 'System' or 'World,' and also the ultimate Source of all activity or effort, may be properly designated a *Person*; but being a perfect Unity, He should more appropriately be called *Super-Personal*.

CHAPTER IV.

THE HUMAN PERSONALITY.

We now propose to consider the Sānkhya viêw of human personality. We should here also recall what the essential characteristics of personality are. To be a person, a human being must be a self-conscious 'system' or 'world,' viewed from the standpoint of both intellect and will. Does the Sānkhya call man person in this sense? The Sānkhya, no doubt, calls man puruṣa, but is puruṣa a bare or undifferentiated unity of a substance, or a complex and differentiated unity of a spirit? Or, to express it in a slightly different way, are the Puruṣa and Prakṛti really two independent entities, only mechanically united in man, or are they really two interdependent realities organically unified in him? If the former, man is not a person; if the latter, he is a person. Let us see in which of these two senses man is called a person by the Sānkhya.

The Sānkhya evidently speaks of Puruṣa in two senses: In verses 10 and 11 of the Sānkhya-Kārikā it speaks of the Absolute Puruṣa or Iśvara, and in verse 18 of the same book it speaks of Individual Puruṣas or jîvas. We have discussed this point before (vide Chaps. II and III) and come to the conclusion that although the Sānkhya defines Puruṣa, both Absolute and Individual, exactly in the same way, and in the same breath declares that Puruṣa is one and many at the same time, these apparently contradictory assertions can only be reconciled by holding that the multitudinous curuṣas or jîvas are the individualisations or differentiations of the Absolute Puruṣa; that is to say, the Absoute Puruṣa manifests and realises Himself in and through the multiple forms of human

beings or Individual Purusas. But as the Absolute Purusa is present whole and undivided in each Individual Purusa as His mode or differentiation from a particular point of view. the latter must partake of the nature of the former, and therefore be perfect from that point of view. Or, in the words of the Sankhya, the Individual Purusa is nothing but the Absolute Purusa as invested with the three gunas. This is the reason why the Sankhya gives only one definition of Puruşa, which is applicable to all Puruşas, infinite or finite, absolute or individual. But each individual man has another aspect: he is also finite or particular. particular aspect of man is supplied by Prakrti in the form of his physical body and its adjuncts. Thus, every man is the Absolute Purusa manifesting and realising Himself in and through his whole psychical and physical mechanism. Now, a question suggests itself: Is the unity of the Absolute Purusa and Prakrti in man mechanical or organic? We have shown before that the Absolute Purusa includes Prakrti in His contents, and His union with her is eternal and irresolvable. Such being the case, their union in man also must be eternal and irresolvable, as is admitted by the Sānkhya. See also Yoga-Sûtram (Sādhana Pāda, aph. 22), and Vyāsa's commentary on the following aphorism: "Puruşa and the three gunas both are eternal and for that reason their union is regarded as eternal. There is a saying about it: On account of the eternal union between the three gunas and Purusa, there is also an eternal union between the manifested and Puruşa." 1 Similarly, Vāchaspati says in his commentary on verse 21 of the Sankhya-Karika that "on account of the eternity of the succession of union, in spite of being eternally united (with Prakrti), it is proper to be united again for the sake of abstraction (from her)." 2 But a union which is

 [&]quot;हर्न्दर्शनमन्त्रोनित्यतादनादिः संयोगो व्याख्यात इति । तयाचीलं 'धिमंगामनादिसंयोगाहकं भावाणामव्यनादिः संयोगं इति ।"

 [&]quot;बनादिवात संवोग-परन्परावा भोगाव संयुक्तीऽपि कैवल्याव पुन: संयुक्ति दति युक्तम्।"

eternal and irresolvable must be organic and necessary. Man is, therefore, a specialised organic unity of the Absolute Puruṣa and Prakṛti, and must be a person. But before taking it as final we should try to remove some difficulties which face our inference. I mean the difficulties raised by the Sānkhya doctrine of Bondage and Release of Puruṣa. It may be objected, if Puruṣa and Prakṛti be eternally and inseparably united in man, the bondage of the former must therefore be eternal and irresolvable; how is, then, the release of Puruṣa possible? The objection is serious, if it is true; but we shall see that it is based on a misconception of the nature of both Puruṣa and Prakṛti. We should, therefore, carefully examine the Doctrine of Bondage and Release as taught by the Sānkhya. But before proceeding to do so it is necessary to understand the Sānkhya Doctrine of Evolution.

(1) The Doctrine of Evolution.

After proving the multiplicity of the Individual Purusas in verse 18, the author of the Sānkhya-Kārikā next proceeds, in verse 21, to set forth the reasons for the evolution of the embodiment or investment with which they are associated. The verse runs thus: " For the sake of Purusa's perception of Prakrti and for his release, a union of the two takes place, which resembles a union of the halt and the blind. By that union a creation is effected." 1 Gaudapada, one of the great commentators of the Sānkhya, interprets this verse in this "The union of Soul with Nature is for its (i.c., Nature's) perception; that is, the Soul perceives Nature (in the state of) intellect and the other effects including the gross elements. For that object is the union of Nature with Soul; and the same union, which is also for the abstraction (of the latter), is like the association of the halt and blind. Just as a lame man and a blind man, deserted by their fellow-travellers,

पुरुष य दर्शनार्थं केवल्यार्थं तथा प्रधानसः। पङ्ग्यवदुभयोरिप संयोगसत्कतः सगैः ॥"

who in making their way with difficulty through a forest had been dispersed by robbers, happening to encounter each other and entering into conversation so as to inspire mutual confidence, agreed to divide between them the duties of walking and seeing; and accordingly, the lame man mounted the blind man's shoulder and was thus carried on his journey, whilst the blind man was enabled to pursue his route by the directions of his companion, so, in the same manner, the faculty of seeing is in the Soul, which is thus like the lame man, while the faculty of moving is in Nature, which resembles, therefore, the blind man. Further, just as the lame man and the blind man part, when their mutual object is accomplished, and they have reached their journey's end, so Nature, having effected the liberation of Soul, ceases to act; and Soul, having perceived Nature, obtains release. And consequently, their respective purposes being effected, the connexion between them is dissolved. Finally, by that union, a creation is effected. As the birth of a child proceeds from the union of a male and a female, so the productions of creation result from the connexion of Nature with Soul." 1

Similar reasons are expressed in the following verses: "This evolution of Nature, from Intellect to the special elements, is performed for the deliverance of each individual Soul; and for the sake of one precisely as for another." (Verse 56.) "As it is a function of milk, an unintelligent

[&]quot;अवैतयी: प्रधानपुरुषयी: किंडित: सङ्घात उचाते—पुरुषय प्रधानित सह संयोगी दर्मनायं, प्रकृति सहदादिकाण्ये भूतपय्येलं पुरुष: प्रथाति, एतद्यं प्रधानस्थापि पुरुषेण संयोग: कैवल्यार्थम्। स च संयोग: पङ्ग् स्वद्भयोरिप द्रष्ट्यः. यथा एक: पङ्ग तिक्यात्म एती दाविप गच्छली महता सामर्थेनाटत्यां सार्थस्य सेनकताद्रपप्रवात् स्वश्नपरित्यक्ती देवादितयेतय चरतः, स्वगूत्या च तौ संयोगसुपयाती पुनुस्तयोः स्ववसोविश्वस्तवेन संयोगो गमनार्थं दर्भनार्थं च भवति, असेन पङ्गः स्वत्सनारीपितः, ए श्रामेत्यद्रपङ्ग दर्भितन सार्गनास्थो याति पङ्ग यात्मस्त्रसाहदः। एवं पुरुषे दर्भनशक्तरिस पङ्ग वद्ग क्रिया, प्रधाने क्रियामकिरस्वस्वत्वद्व दर्भनभक्तिः। यथावानयोः पङ्ग स्वयोः क्रतार्थयोविभागो भविष्यतीधितस्थान-प्राप्तयोः, एवं प्रधानमपि पुरुषस्य सीचं क्रत्या निवन्तते पुरुषोऽपि प्रधानं दृष्टा कैवल्यं गच्छति, तयोः क्रतार्थयोविभागो भविष्यति। क्रियान्यत्, तत्कतः सर्गः, तेन संयोगिन क्रतसत्कतः, सर्गः स्विः, यथा स्त्रीपुरुषसंयोगात् स्त्रीत्पितस्था प्रधानपुरुषप्रसंयोगात् सर्गस्थीत्पत्तः॥"

 [&]quot;इत्येष प्रकृतिकतो सहदादिविशेषभृतपर्यन्तः । प्रतिपुरुषविमोचार्यं सार्यं दव परार्थं भारतः ॥"

(substance), to nourish the calf, so it is the office of the Pradhana to liberate the Soul." 1 (Verse 57.) "As people engage in acts to relieve desires, so does the undiscrete (principle) to liberate the Soul." 2 (Verse 58.) With these should also be read aphorism 23 of Sādbana Pāda in the Yoga-Sûtram, which runs thus: "The union (between the Percipient or Puruşa, and the Percept or Prakṛti together with her evolutes) takes place for the sake of knowing the essential nature of the power of the Percipient and the Percept."3 Vyāsa, the great commentator of the Yoga Philosophy, comments on this in the following terms: "When the Percipient Purusa is united with his own Percepts for the sake of their perception, the knowledge or experience of their essential nature following from such union is called enjoyment (bhoga); and the knowledge of the essential nature of the Percipient's own self is called release." In the Sānkhya-Pravachana-Sûtram, also, the object of creation is said to be the same. "Creation (results) from passion (i.e., the desire to perceive Prakṛti and her evolutes), and release from Dispassion (i.e., indifference) to them." 5 (Chap. II, 9.)

From the above account it is evident that the real object of creation is twofold: (a) the perception or experience of Prakṛti and her evolutes by Puruṣa, and (b) the release of Puruṣa from the bondage consequent upon such perception or experience. Now, an important question suggests itself, namely,—whose purpose is it that necessitates the creation? The Sānkhya-Kārikā says it is the object of both Puruṣa and Prakṛti, as in the case of the lame man and the blind man. Just as the lame man has the power of seeing, but no power

^{। &}quot;वत्सविवविविनिमं चीरस्य यथा पवित्रज्ञस्य। पुरुषविमीचनिमिनं तथा प्रवित्तः प्रधानस्य॥"

[&]quot; भौत्सुकानिइत्यर्थं यथा कियासु प्रवर्तते लोक:। पुरुषस्य विमीचार्थं प्रवर्तते तदवदव्यकम्॥"

^{&#}x27;'ससामियायोः सहपोपलव्यिहेतः संयोगः।''

[&]quot;पुरुष: खामी हत्येन खेन दर्शनाय संयुक्त:, तकात् संयोगाह् माश्रीपलिध्यां स भोग:, या तु द्रष्ट:

^{° &}quot;रागविरागयीयाँगः सृष्टिः।"

of moving, and as the blind man has the power of moving, but no power of seeing, so Purusa has the power of perceiving, but no power of acting, whereas Prakrti has the power of acting, but no power of perceiving; their union is, therefore, necessary for the purpose, in the former case, of pursuing a route safely, and in the latter case, of properly accomplishing the act of creation.

This analogy suggests one important point: the function of Purusa is guidance and that of Prakrti is activity as guided by Purusa: and both are indispensably necessary for the purposes of creation or evolution. But guidance is also a kind of activity. When the lame man guides the blind man in pursuing their journey, he acts, and without such activity the proper and safe completion of their journey is impossible: similarly, when Purusa guides Prakrti in her evolution, he acts, and without such an act evolution is impossible. That is to say, Puruşa is as active as Prakṛti, though in a different form. But this important point has been overlooked by Gaudapada in his commentary, perhaps for the reason that it seems to him inconsistent with verse 57,1 as quoted above. But really there is no inconsistency. In commenting upon this verse Gaudapāda observes: "It is here objected that, Nature is irrational, and Soul is rational. How, then, can Nature, like a rational thing, understand that Soul is to be provided in the three worlds with the objects of sense, and at last with liberation? This is no doubt true; but it is also a fact that action and cessation of action are both observed in irrational things; whence it is said: 'As grass and water taken by the cow are assimilated into milk, and nourish the calf, and as (the secretion ceases) when the calf is grown, so Nature (acts spontaneously) for the liberation of Soul.' And this is the agency of

^{&#}x27; "वत्सविश्वितिमित्तं चीरश्य यथा प्रश्तिरज्ञस्य । पुरुषविमी चनिमित्तं तथा प्रश्तिः प्रधानस्य ॥"

an unintelligent thing." 1 Vāchaspati Miśra makes the following observations: "An unintelligent thing also is known to act for the purpose of realising a need, as for instance, the unintelligent milk acts for the nourishment of a calf. Similarly, Prakrti, though unintelligent, acts for the release of Purusa."2 He then proceeds to prove that such an act of the milk cannot be said to be due to its being guided by îśvara; for îśvara, being an intelligent being, can act only either for a selfish end, or for an altruistic one; but both are in fact impossible for Him. He cannot be supposed to act in order to remove His own want, since He has none; nor can He be supposed to act from kindness to the jivas, for, then, He would have made them all happy; and, furthermore, no such kindness is possible before they are created. If it is supposed that He first made them unhappy, and then tried to relieve their unhappiness, it would have been better for Him not to have created them at all. Again, if it is said that He creates in order to relieve the pains which the jivas suffer on account of their own actions, the reply will be, that as îśvara Himself is the giver of the fruits of actions, it would have been better for Himself not to have created at all. For these reasons Isvara cannot be said to guide the act of the milk; the milk spontaneously acts to nourish the calf. Similarly, Prakrti acts spontaneously to release Purusa. A similar text * is found in the Sānkhya-Pravachana-Sûtram.

The main object of the above commentaries is evidently to prove that Prakṛti's activity of creation is entirely self-guided and spontaneous. Puruṣa has nothing to do with

[&]quot; अयोचातेऽचेतनं प्रधानं चेतन: पुरुष इति नया विषु लोकेषु शब्दादिनिर्विषयै: पुरुषो योज्योऽने भोच: कर्तव्य इति कयं चेतनवत् प्रवित्तः ? सत्यं, किन्वचेतनानामिष प्रवित्तः है । निवृत्तिय यस्पादित्याह —यया ल्योदकं गवा भिवतम् चोरभावेन परिषाय वत्सविविद्धं करोति, पुष्टे च वत्से निवृत्तंते, एवं पुरुषविमोचनिमित्तं प्रधानम इति अज्ञ प्रवितिति ॥"

^{ै &#}x27;' इष्टमचेतनमपि प्रयोजने प्रवर्तमानं यथा वत्सविव्हये चौरमचेतनं प्रवर्त्तते एवं प्रकृतिरचेतनाऽपि प्रविविभी चणाय प्रवित्तं ष्यते।"

 [&]quot; अवेतनले चीरववेष्टितं प्रधानस्य ।"

it, and is an indifferent spectator only. But I fail to see how that conclusion follows. The milk acts, i.e., flows into the mouth of the calf through a definite channel, to wit, the udders of the cow, not spontaneously, but by reason of being prompted and guided by the desire of the cow to feed the calf, when the latter sucks the udders. Thus, two incentives prompt the milk to act: (a) the desire of the cow to feed her calf, and (b) the desire of the calf to have the milk. In the absence of either, no action of the milk will take place. This shows that the activity of the milk is not really spontaneous, not really determined by the milk itself. Similarly, creation by Prakrti is not spontaneous or determined entirely by herself, for, otherwise, the analogy will fail; and that this is the true meaning of the verse is corroborated by verse 58,1 as quoted above. Gaudapāda comments on this verse thus: "As people, being influenced by desire, engage in acts of various kinds for its gratification or fulfilment, and desist when the object is accomplished, so Pradbana, active for the purpose of liberating Soul, desists, after having effected the twofold purpose of Soul; one, cognizance or enjoyment of the objects of sense; the other, cognizance of the difference between Soul and qualities (gunas)." 2 And Vāchaspati makes the following observations: "Autsukya is ichchhā, i.e., desire or wish; that desire or wish is gratified when it attains its object; the object is egoistic, because it is characterised as desired. Similarly, the Unmanifested (Prakrti) engages in (creative) acts for the release of Purusa." 5 With these should also be read verse 59 in which it is stated that just as a dancing girl ceases dancing when she has finished ker performance,

 [&]quot;चीत्मुकानिव्यये यथा कियामु प्रवर्त्तते लोकः। पुरुषस्य विमीचार्यं प्रवर्त्तते तहदव्यक्रम्॥"॥

^{&#}x27;यया लोके इष्टीत्मुको सति तथा निक्चये कियास प्रवर्त्त ने, गमनागमनकियास कतकार्यो निवर्त्त ने, तथा पुरुषस्य विमोचाये शब्दादिविषयीपभोगीपलुधिलच्यां गुणपुरुषान्तरीपलिधलच्यां च दिविधमपि पुरुषाय कला प्रधानं निवर्त्त ॥"

^{&#}x27;'श्रीत्मुक्तमिक्ता मा खिल्लियमाय-प्राप्ती निवर्तते, द्रथमायय खार्थः, द्रष्टलचयत्वात् फलस्य । दार्षानिके योजयति पुरुषस्य विमीचार्थं प्रवर्तते तददस्यक्रम् ॥''

so Prakṛti ceases to further show herself to Puruṣa when she has finished her exhibition to him. In this analogy the dancing girl's cessation of dancing being deliberate, Prakṛti's cessation also must be deliberate, if the analogy has any meaning. This also proves that Prakṛti is conscious, because she is capable of acting deliberately.

It is explicitly admitted in verse 58 and in the commentaries upon it, as quoted above, that as people engage in actions under the influence of desires, so Prakṛti, too, undertakes the act of creation under the influence of a desire, namely, the desire for the release of Purusa. Now, an important question here suggests itself: How can Prakṛti have a desire? Only an intelligent being can have a desire, for a desire involves a consciousness of an end or object desired. But Prakrti is said to be unconscious; how then can she have a consciousness of an end or object, namely, the release of Purusa? She is therefore either conscious, or the desire is not her own, but that of another being prompting and guiding her in creation. Whose desire, then, may it be? It must be the desire of Purusa. But we have already proved in the preceding chapter that Prakrti is really conscious, inasmuch as she is pervaded by a Conscious Principle, to wit, Purusa.1 Consequently, she may have a conscious desire, but nevertheless, she being only an element of Purusa, her desire is either the same as that of Purusa, or subordinate to Thus Prakrti is ultimately guided in her creative activity by the desire of Purusa. But it has been said before that the object of creation is twofold, namely, bhoga or observation and enjoyment of the created objects by Purusa, and His liberation from the bondage that follows upon that bhoga. What then is the desire of Purusa that guides Prakrti in the creation? It must be the desire for creation itself-the desire that He may observe and enjoy the creatures and then liberate Himself from the bondage

For a fuller discussion of this point see next chapter.

resulting from that observation and enjoyment. Or, in other words, it is the desire of Purusa to bind Himself by creation and then to liberate Himself from the investments which He assumes for that purpose.

This conclusion may seem, at first sight, to be absurd, for it indicates that Purusa first weaves the web of His own bondage and then struggles to extricate Himself therefrom. Is not that a mark of indiscretion and unwisdom? Moreover, it is difficult to discover any reason why an eternally perfect and free Being should have such a desire at all. As we have found, Vāchaspati raises some other objections to Puruşa's having a desire for creation. It is true that every desire has reference to an end, egoistic or altruistic, which is unrealised at the time, and that such a desire is impossible for a perfect, free and omniscient Being. But the desire of such a Being need not have all the characteristics of human desire. A human desire is an event in time and refers to an object which is unattained at the time; but the Supreme Puruşa's desire for creation is not an event in time, it is eternal, because creation itself is eternal, as the Sankhya maintains. Again, the object of such an eternal desire cannot be an object in time, i.e., an object which is unattained at the time of desiring it, but, attainable in a future time; the object is, in fact, eternally co-present with the desire. But it may be objected that such a desire is inconceivable, for a desire, whose object is co-present with it, is a satisfied desire, and, as such, ceases to be a genuine desire. No doubt, this is true of human desires; but as for a desire which is itself eternal and whose object is also eternal, the objection is quite irrelevant. Of course, then, such a desire has no resemblance to a human desire and may, therefore, be designated by a different name; we may call it perfect spontaneity or perfect will. Divine will is perfect and as such does not admit of being expressed in terms of desire, purpose, or volition, as ordinarily understood; its essence is perfect spontaneity or spontaneous activity. Thus, the Absolute Puruṣa may be said to have a desire in the only appropriate sense that it is His inherent and eternal nature to effect a creation and thereby to bind Himself, and then to struggle to regain His freedom. Creation, Bondage, Release—these are the three stages through which His eternal creative activity passes. We have discussed this point before and we shall discuss it more fully in the sequel. We have also found that in numerous other accounts of the Sānkhya Doctrine given in the Sāntiparva of the Mahābhārata, in the Bhagavadgîtā, in the Srîmad-Bhāgavata, etc., it is distinctly stated that the Supreme Puruṣa or Iśvara is a perfect Will or Active Principle; that He is the direct Cause, Sustainer and Destroyer of the manifested world; and that Prakṛti is nothing but His tool or instrument.

We now come to a general conclusion. Creation is due to the union of Purusa and Prakṛti; but this union is not an event in time, that is, it does not take place at a particular point of time, but is eternal. The object of this union is, in so far as it is desired by Prakṛti, to bind Puruṣa by providing Him with numberless objects of knowledge and enjoyment, and then, to release Him by producing His complete satisfaction. In so far as it is desired by the Supreme Purusa, the object of this union is to have objects for His knowledge and enjoyment, which, as a knowing and willing Being, He cannot do without, and thereby to bind Himself with those objects as His investments or embodiments, or the definite sets of limited conditions or vehicles, each of which is unique in nature; and then to work out His release from that bondage by gradually attaining true and adequate knowledge both of Himself and of them. The result of such a union is Creation, or, more appropriately, Evolution.

After describing, in this way, the object of the union between Puruşa and Prakṛti, and the cause of creation, the author of the Sānkhya proceeds to describe the details of creation. Before we proceed to consider these details we

should bear in mind one important point. Some regard the process of creation as cosmic, while others regard it as individual or psychological. The former maintain that by creation the Sānkhya means the creation or evolution of the investments or embodiments by which the Supreme Purusa or Iśvara binds Himself and thus assumes the forms of the Individual Purusas or jivas as well as of all other objects, all of which together constitute the world; while the latter maintain that the process of evolution really means that process by which each Individual Purusa binds himself and struggles to release himself from bondage until he returns upon himself and regains his freedom. If we accept the first view we must say that the process is really cosmical, inasmuch as Îśvara Himself originates and passes through it; while, if we accept the second view, we must say that it is really psychological or individual, for it is the Individual Puruşa who causes and undergoes it. Apparently, these two views are wide apart, but upon close examination they seem to be reconcilable. For, the Individual Purusa is none but the Supreme Purusa, as invested with the three quaas, or working and realising Himself in and through the evolutes of Prakrti, so that the process of evolution which the former undergoes is that which the latter creates and passes through.

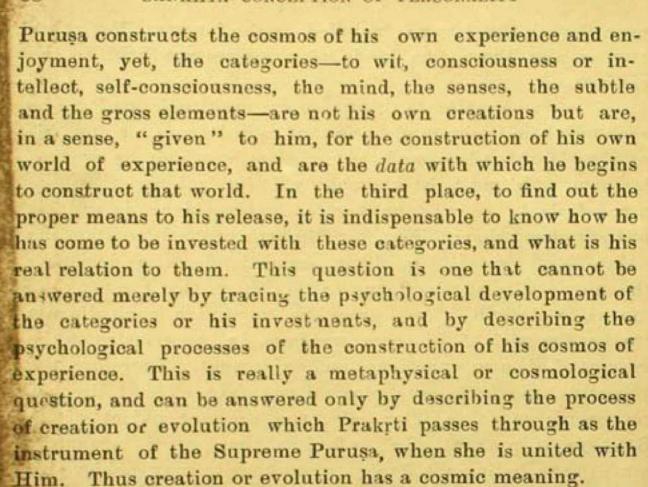

Though this is true from one point of view, yet, from another point of view, there is an essential difference between the two kinds of processes. The Supreme Puruşa in His essential and absolute nature is not identical with the Supreme Puruşa as invested with the three guṇas; or, in other words, there is a fundamental difference between the Supreme Puruşa and the Individual Puruşa, just as there is a fundamental difference between the self and an idea, though the latter is nothing but the self as acting or expressing itself in a definite way. Such being the case, it cannot be said that the process of creation as determined by the Supreme Puruşa is identical with that as determined by the Individual Puruşa,

even though the latter is included in the former. For other reasons also those two kinds of processes are held to be distinct.

Those who maintain that there are multitudinous Purusas each of whom is absolute, think that each Purusa creates his own world of bondage, and the processes by which he weaves his own web must be thoroughly individual and therefore psychological. They adduce the following evidence in support of their conclusion: First, the Sankhya proceeds to state the processes of evolution in detail immediately after declaring the multiplicity of the Purusas; this shows that the Sankhya means to describe those processes by which each Purusa weaves the web of his own bondage, i.e., he constructs the cosmos of his own experience and enjoyment. Therefore, the processes are wholly psychological and have, at least directly, no cosmic meaning. Secondly, the primary object of the Sānkhya is practical, i.e., to find out the proper means by which each Individual Purusa, thus bound, may achieve his liberation. And this means is described to be the full enjoyment and complete knowledge of the cosmos, thus constructed, as well as the true knowledge of his own essential nature and of the real character of his relations with Prakrti and her evolutes. Thirdly, if we consider the development of the categories beginning with the Mahat as described in the Sānkhya, commencing at the creation and ending with the release of the Individual Purusa, we find that this development is wholly individual or psychological. It is a development due to the struggle of the Individual Puruşa to regain his own freedom and to attain his own release.

But these reasons are not sufficient to support their conclusion. For, in the first place, they are based upon the presupposition that Purusas are multitudinous and that there is no Supreme Purusa of whom they are mere modes or differentiations, and this view we have proved to be wholly erroneous. In the second place, though it is true that each Individual

That this is the true view of creation has been conclusively proved before and may be further confirmed by citing other texts from other treatises containing summary accounts of the Sānkhya Philosophy. Take, for instance, the following: "As the worm that makes the cocoon binds itself completely on all sides by means of the threads that it weaves itself, so Puruṣa, though in reality above the guṇas, invests Himself on all sides with them." (Mahābhārata, Sāntiparva, Chap. 303, 4.) This verse, coupled with other verses quoted before, shows that Puruṣa Himself is the real cause of the guṇas with which He binds Himself. Now, what are the guṇas in the present case? They are evidently the twenty-three categories or principles, beginning with the Mahat and ending with the five gross elements, which constitute the body. Mark carefully the essential point of the analogy;

^{। &#}x27;'कोषकारी यथात्मानं काटः समवक्त्यति । म्वतन्तुगुणैनित्यं तथायमगुणी गुणैः ॥''

it means to emphasise that just as the worm is the cause, both of the threads and the bondage, so Purusa is the cause, both of the gunas (i.e., the evolutes), and His bondage. From this it is evident that it is Purusa who evolves the categories beginning with the Mahat and the rest, and binds (i.e., invests) Himself with them. Now, the question may be asked: Who is that Purusa who evolves those categories? Is He the Supreme Purusa or the Individual Purusa? If He be the Supreme Purusa the evolution will be cosmic, otherwise it will be psychological. But if we read this verse together with the other verses quoted before, it becomes evident that the evolution referred to is, in fact, caused by the Supreme Purusa. Consider also the following verses: "They (Prakrti and Puruşa) both being eternal and immortal are Iśvara (Lord); those who are endued with knowledge say that both are to be called principles or categories. On account of its attributes of creation and destruction, the Unmanifest is called indestructible. That Unmanifest becomes repeatedly modified for the purpose of creating the gunas; and because the categories beginning with the Mahat are produced successively by that Unmanifest and also because the twentyfifth resides in them as their guiding agent, it is called the Kşetra (soil)." (Chap. 307, vers. 12-14.) Here we meet with the word 'twenty-fifth.' Does this signify the individualised Purusa, or the Supreme Purusa? This is answered in the following verse: "When that Unmanifest, resting in His own essential form, throws off the gunas, He is called tat, i.e., that (Îśvara), and when He unites

' चनादिनिधनावेत।व्रभावेवेवशी मतो।
 तत्त्वसंज्ञावभावेती प्रोचित ज्ञानिक्तकेः ॥
 सग्रम्भव्यध्यं त्वाद्यक्षं प्राष्ट्रस्थरम्।
 तदितद गुवसगाँय विक्रव्यांषां पृतः पृतः॥
 गुवानां सद्यद्योनासुत्यक्तिय परस्यरम्।
 चित्रानात् चेत्रमाष्ट्रितकत् प्रचविंगकम्॥''

Himself with them He is called the twenty-fifth." 1 (Ibid, 15.) From these it is manifest that the twenty-fifth is the individualised Purusa or jîva. Do we say then that the individualised Purusa creates the categories beginning with Mahat? This is evidently absurd, being inconsistent with numerous other verses cited above. If the individualised Purusa is the Supreme Purusa as invested with the gunas, then, how can the former create the gunas, i.e., the categories beginning with Mahat, which constitute his individuality, or which are the essential conditions of his individuation? Call the Supreme Purusa S and the gunas G and the individualised Purusa P, then it is clear that P=S+G, i.e., both S and G are essential factors of P's being. If so, then, how can P create G which is an essential element of its being? That is evidently impossible, and the supposition that P can create G involves what is called in Logic the fallacy of petitio principii, or explanation in a circle; for, here P is supposed to explain the creation of G, and again, G is supposed to explain the creation of P. Therefore, we must hold that the real creator or evolvent of the gunas i.e., the categories, is the Supreme Purusa. The creation or evolution is therefore cosmical.

But we must guard ourselves against one misconception. Some use the term 'cosmical' in this connexion in its wider sense. They say that the categories, thus created or evolved, are universal, not particular, i.e., not those which constitute the individuality of each Puruṣa or jîva. For instance, the Mahat is not the consciousness or intellect of a particular Puruṣa or man, but the Universal Consciousness or Intellect regarded as a cosmic power called by some 'Hiranyagarbha.' The late Prof. Max Müller made the following observations in this connexion.

[&]quot; यदा तु गुणजालं तदस्यक्राकानि सङ्घित्। तदा सहयुगैकेल पश्चविंशी विधीयते॥"

"Buddhi is generally taken in its subjective or psychological sense, but whatever native and European authorities may have to say, it is impossible that this should have been its original meaning in the mind of Kapila. Buddhi meant only determination (Adhyavasāya), even in its widest sense, it would clearly presuppose the later phases, not only Ahamkāra, Manas, Indriyas, as subjective, but likewise something that is knowable and determinable, such as Mahābhûtas, or at least Tanmātras. Though this psychological acceptation is the common acceptation of Buddhi among native writers on Sānkhya, yet sense is more important than commentaries. The Buddhi or the Mahat must here be a phase in the cosmic growth of the universe, like Prakriti in the beginning, and the senses and the other organs of the soul; and however violent our proceeding may seem, we can hardly help taking this Great Principle, the Mahat, in a cosmic sense. Now the first step after Avyakta, the undeveloped, dull, and as yet senseless Prakriti, can only be Prakriti as lighted up, as rendered capable of perception, and no longer as dull matter. If taken in a psychological sense, it supplies. no doubt, in a later stage, the possibility of individual perception also, or of the determination of this and that. But originally it must have been meant as Prakriti illuminated and intellectualised, and rendered capable of becoming at a later time the germ of Ahamkāra (distinction of subject and object), Manas, mind, and Indriyas, apprehensive senses. Only after Prakriti has become lighted up or perceptive, only after mere material contact has become consciousness, can we imagine the distinction, whether general or individual, between subject and object (Ahamkara), and their new relation as perceiver and perceived, as 'I' on one side and 'this' and 'that' on the other.

"This may seem a very bold interpretation, and a complete forsaking of native guidance, but unless a more reasonable and intelligible account can be given of Buddhi, there seems no escape from it.

"What native interpreters have made of Buddhi may be seen in all their commentaries; for instance, Vāchaspati-Miśra's commentary on Kārikā 23: 'Every man uses first his external senses, then he considers (with the Manas), then he refers the various objects to his Ego (Ahamkāra), and lastly, he decides with his Buddhi what to do.' This may be quite right in a later phase of the development of Prakriti, it cannot possibly be right as representing the first evolution of Prakriti from its chaotic state towards light and the possibility of perception. It could not be the antecedent of Ahamkāra, Manas, and even the Tanmātras, if it were no more than the act of fixing this or that in thought. I am glad to find that Mr. S. C. Banerji on p. 146 of his work arrives at much the same conclusion.

"It is quite clear that in all these explanations Buddhi is taken as intellect, and as personal intellect, and that the idea of a cosmic stage of intellectuality has been entirely forgotten. Thus only can we account for the statement that this Buddhi, if dominated by Sattva (Guna of purity), is said to assume the form (Rûpa) of virtue, knowledge, dispassionateness, and superhuman powers, while, if dominated by Tamas (Guna of darkness), it takes the four opposite forms of vice, etc. How could this be possible before the distinction between subject and object has been realised by Ahamkara, and before Buddhi has assumed the character of sense-perception? We have in fact to read the Sānkhya Philosophy in two texts, one, as it were, in the old uncial writing that shows forth here and there, giving the cosmic process, the other in the minuscule letters of a much later age, interpreted in a psychological or epistemological sense.

"Here we must distinguish again between Ahamkāra, as cosmic power, and Ahamkāra as a condition presupposed in any mental act of an individual thinker. Ahamkāra was so familiar in the sense of Egoism that, like Buddhi, it was taken in its ordinary rather than in its technical Sānkhya sense. I quite

admit that this is a somewhat bold proceeding, but how to get without it at a proper understanding of the ancient Sāńkhya, the rival of the Vedanta, I cannot see. We must remember that Ahamkara, whatever it may mean in later times, is in the Sānkhya something developed out of primordial matter, after that matter has passed through Buddhi. Buddhi cannot really act without a distinction of the universe into subject and object, without the introduction of the Ego or I, which again is impossible without a Non-Ego, or something objective. After that only do we watch the development of what is objective in general into what is objectively this or that (the Tanmatras). But while the creation of what is subjective and objective is the only possible meaning of the cosmic Ahamkara. its psychological interpretation is far more easy. Thus we are told that there are three or four modifications of the Ahamkāra.....This division, though rather confused, shows at all events that the Ahamkara is here treated as simply a moral agent, dominated by the Gunas, but no longer as a cosmic potentia." (Six Systems of Hindu Philosophy, pp. 246-50.) Again, "The undeveloped potential matter (Prakriti) is first illuminated and intellectualised by the development of a kind of cosmic Buddhi or intelligence. This in its turn generates Ahamkāra which involves the consciousness of subject and object, and so on through the elements of the subtle body with its internal organs which passes from life to life in the samsāra, until finally the process ends the coarser materials forming the world of our experience. Thus in any given individual the whole of the psychic life is regarded as the result of a material evolution, and is independent of the Purusa." (Encyclopedia, art. 'Sānkhya Philosophy.')

This point can be settled if we examine verses 10 and 11 of the Kārikā, which are as follow: "The Manifested is caused, non-eternal, limited, changeful, multiform, dependent, attributive, conjunct, and subordinate; the Unmanifested is the reverse. The Manifested has trine constituents,

and is indiscriminative, objective, generic (i.e., enjoyable by all Souls), irrational and productive; so also is Prakrti: Soul is the reverse in these respects as in those." 1 From these it is plain that the categories beginning with the Mahat and ending with the five gross elements, which are the Manifested, are particular rather than universal,that is to say, unique, in the case of each individual Purusa or Jîva. The embodiment or investment by means of which the Supreme Purusa is individualised or differentiated is particular and unique in the case of each individual Purușa, and the categories or principles which constitute that embodiment or investment must, therefore, also be particular and unique. For instance, the Mahat of one individual Purusa differs from that of another. It i true that the consciousness or intellect of one man possesses some features which are common to that of all other men, and that this is the reason why all consciousnesses or intellects are called by the same name. Nevertheless, each man's consciousness or intellect is unique and particular. Or, in other words, they are the specialised modes, moments or differentiations of One Universal Consciousness or Intellect, possessed by the Supreme Purusa or Îśvara, and not possessed by another being called Hiranyagarbha. Even though we suppose that such a being was created at first, still he is also a specialised mode of the Supreme Puruşa. But, in reality, Hiranyagarbha means, not an individualised being, but that which is prolific of, or capable of producing, innumerable things (प्रकाशवह्न:). And this description is strictly true of consciousness or intellect, because it is that principle which reveals to a man all things that constitute the cosmos of his experience.

What is true of consciousness or intellect is also true of all other categories such as self-consciousness, the

[&]quot;इतुमदनित्यमव्यापि सिक्तयमनेकमात्रितं लिङ्गम्। सावयवं परतन्त्रम् व्यक्तं विपरीतमव्यक्तम्॥"॥१०॥
"विग्रयमविविक्ति विषय: सामान्यमचेतनं प्रसवधिया। व्यक्तं तथा प्रधानं तदिपरीतस्त्रया च प्रमान् ॥११॥

THE HUMAN PERSONALITY

eleven senses and the subtle and the gross elements. Some doubt may arise about the fact that the subtle and the gross elements also are particular and unique in the case of each individual Purusa. For instance, are not earth, water, fire, and ether all universal or cosmic elements? And if so, how can they be unique to each individual Purusa? The Sānkhya will perhaps reply that though, as abstractions, they are universal and common to all Purusas, yet, as concrete realities, they are unique objects to each Purusa: the earth which one Purusa perceives and enjoys is not exactly the earth which another Puruşa perceives and enjoys, and similarly in the case of the other elements. Each of them is universal in the sense that it possesses some features which are perceived and enjoyed by all Purusas, although it has other features which are unique for each Purusa. Those who try to explain evolution as cosmic in the wider sense forget the impossibility of there being a Universal Intellect which is not, or is apart from, any particular intellect; or a Universal Self-consciousness which is not, or is apart from, any particular self-consciousness; etc., etc. Even if we can conceive all these, as Manifested, they all must be caused, limited, changeable, and therefore, as the Kārikā says, not universal at all. It may be contended that all the particular intellects must be the particular modes, moments or differentiations of an individualised Universal Intellect, and analogously with all other categories; but such a contention is not tenable, inasmuch as even the supposed individualised Universal Intellect, etc., must be, as the Kārikā asserts, the Manifested, and, for that reason, particular, limited and changeable. Again, from the verses quoted above from the Mahābhārata, etc., it is evident that the evolutes beginning with the Mahat and ending with the gross elements are nothing but the investments by means of which the Supreme Puruşa or Îśvara binds Himself and thereby differentiates or individualises Himself into numberless Purusas or jîvas: thus those evolutes

are all particular and unique in the case of each individual Puruşa, because he himself is particular and unique.

Max Müller's main contention in support of his view that the Mahat or Intellect is the first step in the cosmic growth of the universe, is that, Prakrti being originally dull and senseless, the first step of her evolution must naturally be her illumination or intellectualisation in the form of conscious iess or intellect. Therefore, Mahat being nothing but "Prakrti illuminated and intellectualised," must be the first step in the cosmic growth of Prakrti, and, as such, universal. But the argument seems to me erroneous. In the first place, Prakrti, before her creation or evolution, is an abstraction, for, the Sankhya positively tells us that creation is eternal, while, according to the Sankhya doctrine of satkārya, consciousness or intellect exists in some form in Prakrti previously to its creation or evolution. Thus Prakrti is not absolutely dull and senseless, but contains the element of consciousness or intellect, even when apparently undeveloped, and hence she does not require to be further illuminated and intellectualised. (This point we shall fully discuss in the following chapter.) Therefore Mahat is not "Prakṛti illuminated and intellectualised," but a particular and unique investment which the Supreme Puruşa creates or evolves through Prakrti in order to bind Himself, and thereby differentiate Himself into a jîva or individual Purusa. In the second place, we have already proved by citing numerous texts that the Mahat is an evolute particular and unique in the case of each individual Purusa. Müller further tells us that we should read the Sankhya in two texts. In the old text, the Sankhya appears, here and there, to give indication of the cosmic process of evolution, while in the recent text, the process of evolution is interpreted psychologically or epistemologically. This may be true, because as we have shown before, the process of evolution has two stages: the first cosmical, and the second psychological.

this does not imply that the whole or part of the process of evolution is cosmical in the wider sense, or in the sense in which he supposes it to be so.

Again, the same writer tells us that Ahamkāra is also a "cosmic power," because it is an evolute of Prakṛti after she "has passed through Buddhi." Now, if Buddhi is particular and unique, as we have already proved it to be, then Ahamkāra also is particular and unique; it has, no doubt, a cosmical side, but that only in the narrower sense, i.e., in the sense that it is a particular and unique investment like Buddhi. We may, therefore, conclude that evolution or creation as expounded by the Sānkhya is cosmical in its first stage, and individual or psychological in its second stage, i. e., in the stage of its further development until release is attained. That this is the true view will be further proved when we proceed with the detailed description of the process itself. But it should be remembered here that when we say that evolution is individual or psychological we do not mean to deny that it has a cosmic meaning -it is a part of the cosmic evolution. What we mean emphatically to assert is that the Sānkhya does not describe the process of cosmic evolution in its wider sense, i. e., of the universe, but rather that process by which the Supreme Purușa invests Himself as an individualised Purușa or jiva, and then struggles to get rid of the investment and thereby to regain His freedom. If we take this view of the process of evolution, which is, as we have proved before, the true view, we shall find that the whole process is partly cosmical and partly individual or psychological.

We may now proceed to examine the detailed account of the process of evolution. Here we find that the whole process by which the external embodiment or investment of each individual Puruṣa is constructed, passes through five main stages, to wit, the evolution of Mahat or Buddhi (i. e., Consciousness or Intellect), that of Ahamkāra (i. e., Self-consciousness

or Self-apperception), that of the ekādaśa Indriyas (i. e., the mind and the ten senses of knowledge and activity), that of Pañcha Tanmātras (i.e., the five finer elements), and that of Pañcha Mahābhūtas (i.e., the five gross elements). In all, these twenty-three principles, which are called tattvas or categories, are the evolutes that constitute the whole psychical and physical apparatus called the embodiment or investment with which each individual Puruṣa is bound up. Thus we read in the Sānkhya-Kārikā: "From Nature issues the Great Om; thence egotism, and from this the sixteen-fold set; from five among the sixteen proceed five elements." (Verse 22.) We read also in the Sānkhya-Pravachana-Sūtram: "The creation of the five gross elements is in the order of Mahat and the rest." (Chap. II, aph. 10.)

From the above it is manifest that the first product of the union of Purusa and Prakrti is Consciousness or Intelligence. The word 'Mahat' is most probably derived from the word 'maghash' which means that which reveals; and consciousness or intelligence is that which reveals everything to Purusa. 'Iherefore 'consciousness' is the proper Euglish equivalent of Mahat. Another name for Mahat is Buddhi (as in the Sankhya-Pravachana-Sûtram, Chap. II, aph. 13), which evidently means intelligence. But consciousness is wider than intelligence and includes it. In the Sankhya System they are used as synonymous terms. But consciousness, in its most rudimentary state, has no explicit reference to 'I' or Self, as the centre; as it develops, every state of it is referred to a centre as the subject of that state. Such a vague, undifferentiated, rudimentary consciousness is found, for instance, in the newly-born babe just after birth, and,

 [&]quot;प्रकृतिभैद्धांस्ततोऽहरू। स्वादनयाय वोद्यकः ।
 तकादपि वोद्यकात् पद्यभ्यः पद्य भूतानि ॥

भन्दादिकसेच पचस्तानाम् ।

along with its development, it begins to be well-defined and differentiated into numerous definite and distinct states, each of which is referred to a definite centre called the 'subject', 'I' or 'self,' thereby becoming a heterogeneous or differentiated unity called Ahamkāra. The English equivalent of this term is self-consciousness or self-apperception. Ahamkāra is therefore nothing but a more developed form of Mahat or Buddhi. But consciousness does not refer to a subject only; it refers also to an object. When I am conscious of the pen I am writing with, my consciousness attains fullness and distinctness only when it refers, not only to the subject called 'I,' but also to the object called 'this pen.' Hence the full development of consciousness requires a double reference. But the object is distinct from, and outside (in a sense) of, the subject or 'I,' so that the subject must possess powers or capacities to be conscious of the object. I can be conscious of the pen which is distinct from, and in a sense outside myself, only if I possess power to be conscious of it. These powers and capacities are called Indriyas. So that Indriya is an equivalent of the English term 'sense.' European psychology recognises six such senses; but the Sānkhya recognises eleven senses, five of which are called Cognitive senses (जानेन्द्रिय), five Active senses (कमीन्ट्रिय), and the remaining one, Manah or the internal sense. The last one has a double function. It partakes of the nature of both the cognitive and the active senses; that is, it co-operates with both of them. Its main function is to determine and grasp the true and distinctive character of the objects of the senses. (" उभयात्मकमत मन: सङ्ख्यामिन्द्रियञ्च साधनार्गत्.") To understand the real meaning of Manah, we must also understand the real meaning of Samkalpa. Professor Colebrooke and Professor Wilson both render this term into 'pondering,' but this is evidently erroneous. Vāchaspati explains it in this way: "The Samkalpa consists in carefully considering an object of sense and determining 'this is simple,' 'that is not so'; or in discriminating it by its conditions of

predicate and predicable." 1 Thus, Samkalpa is the process of selective attention by which the object of simple perception is considered, so as to form a definite idea of it. Thus Manah has a special function which is a sine qua non of the functioning of the other senses; we cannot be conscious of a sensation or an action, or of their objects unless and until they are determined and grasped in their true and definite character by Manah. Manah must co-operate with the other senses in order that perception of an object, event, or action may follow. But Manah should be carefully distinguished from Mind. It is strange that Professor Colebrooke and Professor Wilson should have confused them with each other. The word 'mind,' as used in European psychology, is far more comprehensive than Manah as used in the Sankhya. Mind is synonymous with self or soul, whereas Manah is the internal sense which has a limited and special function, and while it is true that the function of mind includes that of Manah, they cannot be identified. But Manah, being evolved directly from self-consciousness (Ahamkara) and indirectly from consciousness, contains them both. For this reason Consciousness or Intelligence (Mahat), Self-consciousness (Ahamkāra), and the Internal sense (Manah), together constitute what is called Antah-karana or Chitta, so that the latter is the true medium through which all that is supplied by the other senses, is presented to Purusa, Self, or Soul, for his experience and enjoyment. Now, the question is, what evolves these powers or capacities called senses? It is evidently Selfconsciousness that directly evolves them in order that it may be supplied with materials for its contemplation and specification.

But this is not all. The senses supply self-consciousness with materials only when they are acted on by objects outside of and distinct from them. What, then, are these objects?

^{&#}x27;अलिचितिमिन्दियेण वित्तिमिति समुन्धिमिदमेवं नैविमिति सम्यक् कल्पयिति विशिषणविशेष्यभावेन विविचयतीति।''

What are those things about which the senses supply the information? Who makes or evolves them? questions which we have now to consider. The Sānkhya says, they are, in the first instance, the Pancha Tanmatras. But there is unfortunately a good deal of confusion about the precise meaning of Tanmātra. The phrase 'pañcha tanmātrāṇi' is generally rendered into 'five subtile elements,' the term 'Tanmātrāṇi' thus indicating what are subtile. According to this interpretation the Pancha Tanmātrāni are those objects which are subtile and the ultimate constituent elements of the gross or coarse elements, such as earth, water, fire, air, and ether. Some, on the contrary, explain Tanmatram to be nothing but what is called, in psychology, mere sensation, that is, sensation which has not, as yet, been localised and objectified. So, in the case of a newly-born child, for instance, the sensations received are not distinctly referred to objects in space, but are apprehended as mere states of consciousness, or, in the words of modern psychology, they do not give rise to perceptions, but are merely felt. Even in adult life such sensation is not altogether absent. In many instances we are aware of having sensations without understanding, at the same time, the real and exact nature of the object exciting them in our mind. (In this connexion the chapter on "Sensation" in Professor Stout's Manual of Psychology may be read with advantage.) According to this interpretation, Tanmātras are nothing but mere sensations that represent the most vague and rudimentary stage of perception.

These two interpretations are evidently opposed to each other; but it is difficult to decide between them. It is true that there are mere sensations, or sensations which are only vaguely referred to external objects, or by which no distinct perception of objects is possible; and it may also be conceded that they serve the purpose of the objects of consciousness at the beginning of our life. But this seems contrary to the general tenor of the Sānkhya System, particularly to one of the most

important doctrines, namely, the doctrine of the subtle body, according to which our physical organism which is dissolved at death is only an outer coating or investment. There is also an inner coating or investment with which Purușa or Soul is directly and immediately connected; it is called 'the subtle body' and is constituted by Antah-karana or Chitta, the ten Indriyas (senses), and the Pancha Tanmatras (i.e., the five subtile elements). This subtle body remains in tact even after the dissolution of the outer physical coating, or 'body,' at death. Thus the Pañcha Tanmātras are not, and cannot be, mere sensations, for, such a sensation, which does not lead to a distinct perception, must arise only through the stimulation of the organs of sense. But all sense-organs are dissolved, with the body, at death, so that after the dissolution of the body no sensation can arise; thus the dissolution of the body involves also the impossibility of evolution of any Tanmatra understood as a mere sensation. But the Sānkhya positively and emphatically says that the Pancha Tanmatras survive the dissolution of the gross body. And that is possible only if by Tanmātra is meant, not mere sensation, but something else which is more or less a permanent element of the investment with which Purusa becomes connected at creation. (Cf. verse 40 of the Kārikā.)1

The Sankhya says they are the final or ultimate elements out of which all composite material bodies are made up. The five gross elements, namely, earth, water, fire, air, and ether, are composed of them. The next question is, What evolves them? And the answer is that 'they are evolved by Ahamkāra, or Self-consciousness, in order that they may be the objects of experience or enjoyment (Ana.) for Puruṣa.' Now there is one difficulty here which we must solve. These five elements, being subtle, cannot be perceived by the senses, and therefore

^{। &}quot;पूर्वीत्पन्नमसन्ने नियतं महदादिम्चापर्यन्तम्। संसरति निरुपभोगं भावैरिधवासितं लिक्नम्॥"

they cannot be objects of perception or experience. What then is the use of their evolution, and how do we know that they exist at all? The reply will perhaps be that, although they cannot be directly perceived by the senses, their existence is the necessary condition of the perception of the gross or compound things (ख्लभूतानि) which are the ordinary objects of sense-perception; for, all gross or compound things, by their very constitution, are composed of subtile parts or elements, and unless those parts or elements had affected the senses separately, there would arise no sensations and therefore no perception. It is true that we are not ordinarily conscious of the affections which they separately produce in consciousness, and that what we are distinctly conscious of is their collective result, which we ordinarily call a sensation; but this only proves that the separate affections possess so low a degree of intensity that they do not rise to the level of distinct and vivid consciousness; that is to say, they remain more or less subconscious. But, yet, to explain the conscious we must resort to the subconscious; to explain a distinct and vivid sensation produced by a compound thing we must maintain that it is the collective result produced by the combination of many subconscious affections excited by subtle parts or elements of the thing. This is a great psychological truth, and is called, in Western Psychology, 'the theory of subconscious mental modification.' It may still be asked, however, if the subtile elements are evolved by Ahamkara and finally by Mahat (Consciousness or Intellect), why do they remain subconscious? The reply is, that consciousness admits of degrees, and what is called subconsciousness is also a kind of consciousness possessing a very low degree of intensity. And it is also a fact that what is subconscious may be raised to the level of consciousness by special processes of concentration, and that what is conscious may in turn fall below the level of distinct consciousness, and thus become subconscious. So that consciousness and subconsciousness are matters

of degree, as our everyday experience teaches. In this connexion it should be remembered, (a) that the senses can be developed to a considerable extent, and (b) that the incapacity to perceive the subtile elements is due to the gross and obtuse character of the organs of sense. It is found that the defects of the organs of sense may, to a considerable extent, be removed by intensifying their stimulation by means of suitable instruments such as the microscope, telescope, etc., and that they then become far better means of perceiving objects too fine, or too remote, to be perceived under their ordinary conditions. It is said in the Yoga-Sûtram that the yogins may develop powers by virtue of which they may perceive subtle elements or things which cannot be perceived through the ordinary organs of sense. (See Vibhûti Pāda, aph. 25.1)

The next and last results of evolution are the five gross elements, namely, earth, water, fire, air, and ether. But two other steps should be added to complete the process of evolution. The objects of the senses are not merely those five gross elements, for, there are innumerable other objects which we find around us, made up of those elements-our physical organism or body being one of them. Again, all objects, subtile and gross alike, constitute a single system-a world, called the cosmos of experience, which supplies all the materials for the enjoyment of Purusa. In this way the Supreme Purusa constructs, or rather creates, through the instrumentality of Prakṛti, investments for His individualisation, and a world or cosmos of experience for His observation and enjoyment. There is an infinite number of such investments or embodiments, each of which is unique. Thus, though there is One Perfect Absolute Puruşa, His differentiations, modes, or moments, are unlimited in number, and, consequently, He appears to be multitudinous, by reason of His connexions

¹ "श्वभ्यालीकन्यासात् स्वाव्यवहित-विप्रकटज्ञानम्।

with those multitudinous investments or embodiments. The One Puruṣa appears to be many Puruṣas.—Such is the Doctrine of Creation or Evolution as expounded by the Sāńkhya System of Philosophy.

From the above description of the process of evolution it is quite manifest that the Sānkhya view with regard to the nature of the manifested world is thoroughly spiritualistic or idealistic. Some, e. g., Professor Flint in his Anti-theistic Theories maintain that the Sānkhya System entertains a materialistic view of the world. The reasons offered for such a view seem to be these: The consciousness and the self-consciousness (Mahat and Ahamkāra) from which the manifested world is said to be evolved are themselves evolved from Prakṛti; but Prakṛti is regarded by the Sānkhya as the opposite of Purusa, i.e., as unintelligent or unconscious, and is therefore materialistic; the consciousness and the self-consciousness must consequently be also materialistic, they being the products of Prakrti, and for the reason that according to the Sankhya the product or effect pre-exists in the cause and derives all its characteristics from it. Again, all the objects of the world, gross and subtle, are also evolved from consciousness and self-consciousness, and ultimately from Prakṛti, and must, therefore, be materialistic in nature. Thus, both the ultimate evolvent (i. e., Prakrti) and the last evolutes (i. e., the objects of the world) being materialistic, why will the intermediate evolutes, to wit, the consciousness, the self-consciousness and the eleven senses be different? They also must be materialistic. But it is difficult to see how this conclusion follows. We have already proved that Prakṛti is unconscious in a relative sense only; for, she being pervaded by, and pervading, the conscious Purusa cannot be absolutely unconscious. Moreover, the Sānkhya does not say that the consciousness and the self-consciousness are derived from Prakrti alone; when Prakrti is united with Purusa, then and then only is she able to evolve Consciousness or

Intellect. Thus, Purusa is as essential a condition of the evolution of Consciousness, as Prakṛti is. Again, as we have already proved, Prakrti being a constituent element of Purusa. she cannot but be conscious, and whatever is evolved from such a Prakrti must necessarily be conscious. Hence, even the five subtle and the five gross elements with all the results of their various combinations are, in a sense, conscious. Of course, we do not usually call them conscious, because they are generally subconscious, i.e., possess a very low degree of consciousness. (We shall dilate upon this point in the sequel.) Therefore, Prakrti as understood by the Sānkhya is quite different from matter as understood by the materialists, or even by the modern scientists; and the manifested world, as understood by the former, is similarly quite different from that as understood by the latter. Prakṛti with all her manifestations is through and through spiritual, whereas matter with all its manifestations is through and through non-spiritual, or opposite of the spritual. While the Sankhya explains and understands matter spiritually, materialism or naturalism explains and understands spirit materialistically. These two views of the world are therefore as opposite as the two poles of the earth.

Some, on the other hand, maintain that the Sankhya propounds the theory of Rigorous Dualism. But we have already proved conclusively that that is erroneous. Puruṣa and Prakṛti are not two absolutely opposed and independent principles, they are wholly inter-dependent and inter-related like the subject and the object, the self and the not-self: their union is eternal, neither of them can exist apart from the other. The Sankhya therefore teaches Relative Dualism or Absolute Idealism.

(2) The Doctrine of Bondage:

From the outline given above of the process of evolution of the external investment or embodiment by which the Absolute Purusa binds Himself and thereby individualises or

differentiates Himself as a Jiva Purusa (man), it is easy to understand what is meant by Bondage. Bondage, according to the Sānkhya, is the feeling of the three kinds of pain, intrinsic (श्राध्यात्मिक), extrinsic (श्राधिभौतिक), and supernatural (श्राधिदेविक), arising out of the Puruşa's experience (भोग:) of the evolutes or manifestations of Prakrti. What is the cause of such experience? The cause is the union of Purusa with Prakrti for the purpose of evolution (सग:). But we have seen that the union between Purusa and Prakrti is eternal and therefore irresolvable. Is then Purusa eternally bound? The word 'bondage' has two senses, a wider and a narrower one. In the former sense, it indicates an eternal and general connexion between Puruşa and Prakṛti; even during the Pralaya or dissolution when all manifested things become absorbed into Prakrti, their primal cause, such a connexion remains intact. In this sense of bondage, Purusa may be said to be eternally bound, for He never exists separately from Prakṛti, but eternally pervades her. In the latter sense, it indicates a specific kind of bondage, namely, the feeling of the three kinds of pain arising out of the specific connexion which the Absolute Purusa enters into with Prakṛti in order to evolve specific investments or embodiments for the purpose of His specific experience. In this latter sense, the word 'bondage' is usually used in the Sānkhya System.

The real and immediate cause of this specific bondage is said to be Aviveka, or non-discriminative knowledge, under the influence of which the individualised Puruşa forgets Himself, as it were, and completely identifies Himself with the objects of His experience and enjoyment, to wit, the manifestations of Prakṛti, from the Mahat to the five gross elements and other objects composed of them. When, in this way, Puruṣa becomes completely encompassed by them, He then, under delusion, begins to think that the wants, appetites, passions and desires which really arise from the changeful conditions of the physical organism; the changeful states of cognition,

feeling and volition which really arise from the actions and reactions between the body and the environment; or, in a word, the whole empirical self (antah-karana or chitta)-are His own, and belong, as parts and parcels, to Himself. proceeds further and identifies Himself with His worldly possessions, house, wife, children, relatives, etc. He begins to say, 'I am enjoying happiness, I am enduring pain.' Thus He loses sight of Himself as something different and becomes completely submerged in Prakrti. This complete self-forgetfulness and the consequent identification of Himself with Prakrti and her manifestations, which is usually found to be the case with all worldly people, is considered by the Sankhya to be the real perennial source of all His misery and trouble. So we find that the real cause of bondage is not the union but the delusion (अविवेक:), and that the cause is psychological, not metaphysical at all. Being psychological, the delusion may be dispelled by the development of better psychical conditions through the adoption of proper and adequate means. The Sankhya admits the possibility of such a development through suitable moral and religious training and practices, and holds that the delusion comes to an end after going through a course of such training and practices extending over an indefinitely long period of time. And along with its end comes also the end of the bondage, i.e., the complete relief from the three kinds of pain. It is curious that Prakṛti performs a double function in this connexion. On the one hand, by variously manifesting herself, she supplies materials for the enjoyment of Purusa and thereby supplies the means to His bondage; on the other hand, by thus satisfying Him to the full, she completes His enjoyment and brings the terms of His bondage to a close. (Vide Sānkhya-Kārikā, vers. 56, 58 and 59.) A very elaborate account of such a delusion and its consequences has been given in the Santiparvan of the Mahabharata (vide Chap. 302, vers. 41-49, and Chap. 803).

Now an important question suggests itself: To whom do the delusion and its effect, the bondage, really belong? The Sānkhya appears, at first sight, to say that they cannot belong to Purusa, because He is eternally enlightened and free: (vide the Sānkhya-Kārikā, ver. 19, and the Sānkhya-Pravachana-Sutram, Chap. 3, aphs. 71 and 72, Chap. 5, aph. 13, and Chap. 6, aph. 10). They therefore must belong to Prakrti. - How then is Purusa deluded and bound? The Sānkhya seems to teach that the delusion and bondage are reflected on Puruşa by Prakṛti by virtue of her proximity (साविध्य) to Him, just as the red tinge is reflected on a crystal vase by a china rose by virtue of its proximity. (Vide Sānkhya-Pravachana-Sūtram, Chap. 6, aphs. 27 and 28.) Though this analogy, by itself, is inappropriate, like those generally given in the Sānkhya, it suggests one important truth. The analogy appears at first sight to emphasise the point that Purusa remains essentially unaffected by the reflexion cast upon Him by Prakrti, just like a crystal vase which remains as it is, though it appears red on account of the reflexion cast upon it by a china rose. But really it emphasises the opposite truth. The crystal vase appears red so long as the reflexion exists. This shows that it has the capacity for being so reflected on, otherwise it could not be so reflected on. Thus Purusa really does not remain indifferent to the reflexion by which the delusion and bondage are cast upon Him by Prakrti, but becomes affected by the reflexion and remains so as long as it continues. Consequently, the delusion and bondage of Purusa is real. Is not this inconsistent with the eternally free and enlightened character of Purusa? To answer this question properly we should consider carefully the Sankhya Doctrine of Avidya or Aviveka, i.e., non-discriminative knowledge.

Avidyā or Aviveka may be said to be what is opposite to Vidyā or Viveka, i.e., the knowledge of the distinction between Puruşa and Prakṛti. Therefore, it is the knowledge of the identity between them: When Puruşa thinks Himself identical

with Prakrti and her evolutes, He may be said to have Avidyā or Aviveka. In other words, Vidyā or Viveka is discriminative knowledge, while Avidyā or Aviveka is non-discriminative knowledge, about Furusa and Prakrti. The same definition is given in the Yoga-Sûtram: "Avidyā is the thinking of the non-eternal to be eternal, of the unclean or impure to be clean or pure, of the painful to be pleasant, and of the non-spiritual to be spiritual." 1 Vyāsa adds the following in his commentary on the above: "Just as the opposite of friend does not mean the absence of friend, or only friend in name, but an enemy; and the opposite of grazing field, not the absence of grazing field, or only grazing field in name, but another wide land; so Avidya is not indicative of proof, or of absence of proof, but is a kind of knowledge opposed to Vidyā." 2 In other words, Avidyā is non-discriminative knowledge—the knowledge of the identity between Purusa and Prakrti. Thus, Avidyā is as real as Vidyā. They are both positive, but about different things: Vidyā is the knowledge of the distinction, and Avidyā is the knowledge of the identity, between Purusa and Prakrti. But Purusa is eternal, pure, full of bliss, spiritual, and the manifestations of Prakrti are non-eternal, impure, painful, and non-spiritual. Therefore, Avidyā is the knowledge of identity between what is eternal, pure, blissful, and spiritual, and what is non-eternal, impure, painful, and non-spiritual.

Now, not all knowledge has the same value; some ought to be retained and some shunned. Vidyā is true knowledge, because it is the knowledge of the distinction between Puruṣa and Prakṛti, which is true; while Avidyā is false or erroneous knowledge, because it is the knowledge of the identity between Puruṣa and Prakṛti, which is false or erroneous. This

^{। &}quot;धनित्याग्रचिदुःखानाकामु नित्यग्रचिमुखाकाव्यातिरविद्या।"

भ विद्या नामिची मिवाभावी न मिवसावं किन्तु तदिश्वः सपवः, तद्याऽगीचदः न गोचदाभावी न गोचदमावम्, किन्तु देश एव ताम्यामन्यत् वस्वन्तरम्, एवमविद्या न प्रमाणं न प्रमाणाभावः किन्तु विद्याविपरीतं ज्ञानान्तरमविद्यति।"

appears to be the reason wny thing when it is completely should be shunned and $Vidy\bar{a}$ should be shunned as $Vidy\bar{a}$ should

Now the question naturally ance, because under its influthe knowledge of identity between ed. This point will be made neous? Purusa and Prakṛti are no dou ctrine of Release. we have shown before, also related. Purur properly the question all-pervading, i.e., they mutually included before, namely, the related as subject and object—as whole and P Bandha (i.e non is eternal and irresolvable; they are interdependentent voo on. (Vide preceding chapter.) Purusa and Prakrti are therefore both distinct and identical at the same time; that is to say, they are relatively distinct and identical, not absolutely so. But, the reason why the Sānkhya calls the knowledge of the identity between Purusa and Prakrti erroneous is evident. Purusa and Prakṛti are not absolutely identical or entirely the same thing, and if we regard them so, as all the worldly people do, our knowledge must be erroneous; and so long as we continue to do so, we may be said to be under the influence of the delusion caused by Avidyā. Therefore, Avidyā is false and delusive, not because it is the knowledge of the identity between Puruşa and Prakrti, but because such identity is conceived by all individualised Purusas (i.e., jîvas) to be absolute until they attain Vidyā and the consequent release.

From the above it is evident that the real cause of $Avidy\bar{a}$ is the differentiations of the Absolute Puruşa into individualised Puruşas effected through His specific unions with Prakṛti which result in the so-called twenty-three categories, beginning with Mahat and ending with the $Pa\bar{n}cha$ $Mah\bar{a}bh\hat{u}tas$, including all other objects composed of them. But the differentiating activity of the Absolute Puruşa is eternal, as we have shown before; therefore the consequent $Avidy\bar{a}$ is also eternal. Now, another important question suggests itself: If $Avidy\bar{a}$ is eternal, how can it be destroyed? The Sānkhya says it can be destroyed by $Vidy\bar{a}$ or discriminative

with Prakrti and her evolutes, I also Sānkhya-Kārikā, ver. 44, or Aviveka. In other words, Vition of Avidyā by the attainment knowledge, while Avidyā or How then can an event in time knowledge, about Furusa and, Avidyā affect the latter which, is given in the Yoga-Sûtrame, or more appropriately, embraces non-eternal to be eternal to say, Avidyā, which is eternal,

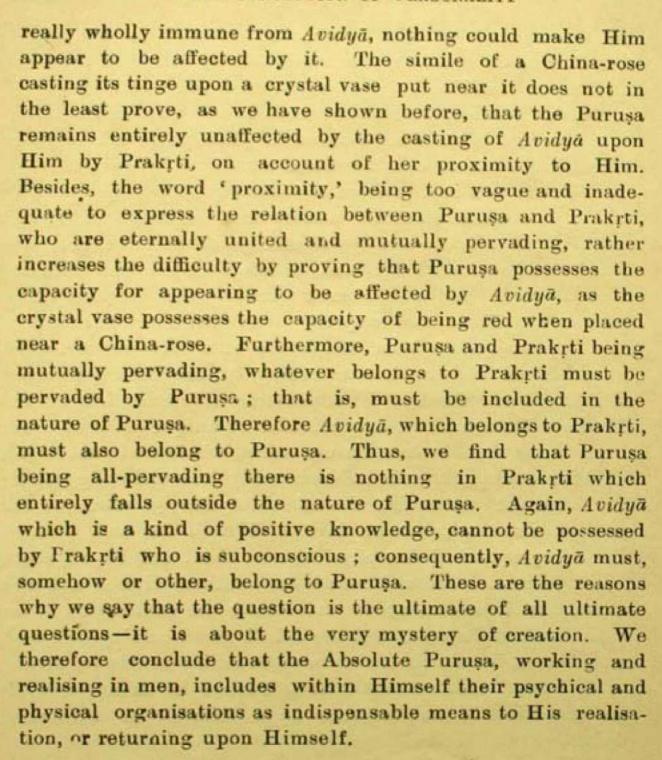

or pure, of the painful tor put to an end. How can we reconcile the piritual." 1 Yositive assertion of the Sankhya that Vidyā is capa bove: "spelling Avidya, just as light is capable of dispelling darkness? (Vide Sānkhya-Pravachana-Sútram, Chap. I, aph. 56, " नियतकारणात् तदुक्ति चिन्तवत्.") In this way: Avidyā, which consists in the confusion of the relative identity with the absolute identity between Puruşa and Prakrti (including her evolutes), may be put to an end only by attaining the understanding of the true nature of the confusion. And such an understanding is nothing but the knowledge that the identity is relative, not absolute; that is to say, it implies also distinction between Purusa and Prakṛti. Thus, in fact, Avidyā is not entirely destroyed but only transformed or modified, or assumes a form quite different from that which it had before; for, the knowledge of identity is not and cannot be wholly destroyed, it being partially or relatively true. Therefore, when the Sankhya says that Vidyā is capable of dispelling Avidya, what it really means to say is that the consciousness of the distinction between Purusa and Prakrti transforms or modifies, not altogether destroys, the erroneous consciousness of the absolute identity between them. And the transformation or modification of Avidyā is not inconsistent with its eternal nature. For, according to the Sankhya dectrine of causality, nothing is created out of nothing, or comes to nothing, but everything undergoes a process of evolution, ie., a process of transformation or modification, which process also is eternal. Similarly, Avidyā undergoes a process of transformation or modification without changing its nature altogether,

and appears to be a quite new thing when it is completely transformed at the time of release: this its complete transformation or modification is designated in the Sānkhya as its complete dispelling or disappearance, because under its influence Puruṣa is no longer deluded. This point will be made more clear when we consider the Doctrine of Release.

We are now in a position to answer properly the question which we raised and left unanswered before, namely, the question, How is the reality of Avidyā and Bandha (i.e., nondiscriminative knowledge and bondage) consistent with the eternally free and enlightened character of Purusa? The answer is: These two opposite assertions represent the two opposite standpoints from which we view His nature. We have proved before that according to the Sankhya every individualised Purusa is a perfect differentiation of the Absolute Purusa from a particular or unique point of view. In as far as the Absolute Puruşa exists, whole and undivided. in Him we may be said to be eternally free and enlightened; but in as far as, again, the Absolute Puruşa expresses and realises, i.e., embodies or invests Himself in and through His unique and finite physical organism and its adjuncts, He appears deluded and bound or confined. Hence a double conception is necessary to understand the real nature of an individualised Purusa; and the delusion and bondage are real, not illusory, inasmuch as they are the indispensable conditions by means of which the Absolute Purusa in man gradually realises Himself and returns upon Himself as a liberated Being.

Why the Absolute Puruşa imposes upon Himself such limitations is a question which is unanswerable, because unmeaning. The attempt to answer such a question by using words like Avidyā or Aviveka, or some other similar words, is bound to be futile. The difficulties are not obviated by saying that Avidyā really belongs to Prakṛti and is transferred to Puruṣa by virtue of her proximity to Him, for, if He were

(3) The Doctrine of Release.

That Prakṛti in mạn is not something wholly foreign and antagonistic to the Absolute Puruṣa in him may be shown to be true, if we consider the Sāṅkhya Doctrine of

Release. What then is Release? It is the complete liberation from the three kinds of pain. How is such liberation attained? It is attained through Vidyā or Viveka, i.e., by the possession of true knowlege of Purusa, Prakrti and other categories. But that saving knowledge is not attained in one life; Purusa has to migrate from life to life for an indefinitely long period before He can attain it. What is the nature of the knowledge which saves him from the bondage? It is the knowledge of the distinction between Him and Prakrti including her manifestations. In the state of bondage, Puruşa, as we have found, is completely self-forgetful and entirely ignorant of such distinction from Prakṛti; but through moral and spiritual cultures gone through for a period extending over numerous successive lives He gradually rises to the level of that consciousness of Self and of its distinction from Prakrti and her manifestations, which is the only means by which He returns upon Himself, contemplates His true essential nature, regains everlasting peace and contentment, and does not migrate any longer. This state is called by the Sānkhya one of liberation or release. But it should be carefully remembered here that the state of release is not a state of complete separation of Purusa from Prakrti; that is, as we have shown, impossible. This conclusion will be further confirmed if we carefully examine the behaviour of Prakṛti and Puruṣa towards each other in the state of release as it has been described in the Sānkhya by means of various kinds of similes.

Consider, for instance, the following: (A) "As a dancer, having exhibited herself on the stage, desists from the dance, so does Prakṛti čease, when she has manifested herself to Puruṣa." (Sānkhya-Kārikā, verse 59; also the Sānkhya-Prava-chana-Sūtram, Chap. 3, aph. 69.) Here it is stated that when

[&]quot;रक्स्य दर्शियत्वा निवर्तते नर्तको येथा चत्यात्। परुषस्य तथात्मानं प्रकास्य निवर्तते प्रकृतिः ॥"

Puruṣa has experienced or enjoyed all the manifestations of Prakṛti to His satiety, she ceases to act, that is, to manifest herself any more to Him and thereby to bind Him further. And consequently He attains liberation, because He has nothing more to experience and enjoy, and therefore to be bound up with. This does not imply that Prakṛti completely separates herself from Puruṣa, or vice versa, because, both being all-pervading, and for several other reasons described before, a complete separation is impossible. They still remain united, but their behaviour towards each other is wholly different from that which was found during the state of bondage. What that behaviour definitely is, is not expressly stated in the Sānkhya.

- (B) "My opinion is, that nothing exists more bashful than Prakṛti, who knowing that 'I have been seen' does not appear again before Puruṣa." [Ibid, verse 61, also Sānkhya-Pravachana-Sūtram, Chap. 3, aph. 70.) This does not mean to say that Prakṛti cuts herself completely asunder from Puruṣa, after she has been completely experienced and enjoyed by Him, but it simply means that she appears before Him no longer as a binding agency—she no longer manifests herself in such a way as to delude and bind Him, as she used to do-in the state of His bondage. This meaning is confirmed by the following verse.
- (C) "So by a study of the principles is the final, incontrovertible and only one knowledge attained that I am not, nought is mine, and the ego exists not." (Ibid, verse 64.) Here in a short compass the form of the saving knowledge is described. There are three parts of the sentence, and we should carefully examine them. (1) I am not (नाइक्स): What does

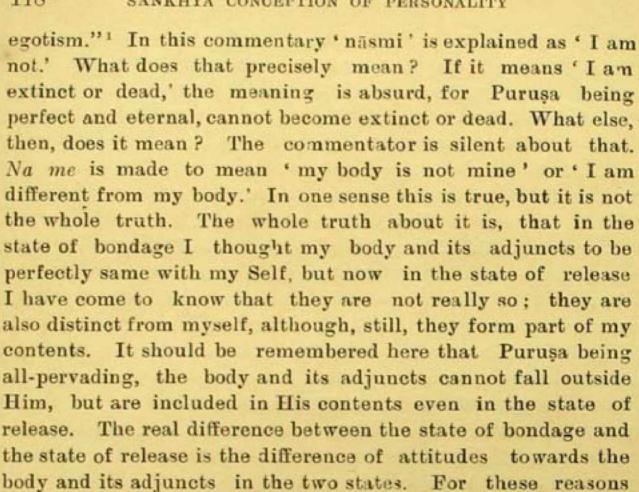

[&]quot;प्रकृति: सुकुमारतरं न किञ्चिद्स्तीति में मित्रभविति। या इष्टाइस्मीति पुनर्ग दर्शनसुपैति पुरुषस्य॥"

 [&]quot;एवं तस्वाभ्यासाझास्त्रि न मे नाडमिलपरिशेषम्।
 पविपर्ध्यमादिग्रञ्जं वेवलमुलदाते ज्ञानम्॥"

this exactly mean? It does not mean, of course, that I (i.e., Purusa) am non-existent, for that is absurd. What it really means is that I am not now what I thought myself to be under the delusion during the state of bondage. During that state I forgot myself and completely identified myself with Prakṛti and her evolutes; now, in the state of release, I have attained the knowledge of my distinction (relative) from them,-I am the Self, they are the Not-self, although they are also the parts of my content. (2) Nought is mine (न में): This does not mean that I have no content-that I am a bare undifferentiated unity, for that is self-contradictory. It really means that my present contents are entirely different in kind from those which I thought myself to have during the state of bondage; or the very same contents which I have had during the state of bondage have now been so transformed and modified that they appear to me in a wholly different guise, and my attitude towards them has become also entirely different, so that I may now say that I have no such content as I had in the state of bondage. (3) The ego exists not (नाइन्): This does not mean that I am now extinct or dead. What it really means is this: I am no longer a selfish egoist, my particular individuality has been completely transformed into the universal personality. My deluded and confined Self-the Self under bondage-is now dead, and what now lives is the delivered and free Self. My false Self has died and my true Self now lives. So that what is denied here is not the true Self-hood, but the "short, brutish, selfish individuality." Some, as M. Cousin for instance, suppose that this verse declares "an absolute nihilism, the last fruit of scepticism." 'This is evidently wrong, because it is against the entire tenor of the Sankhva Philosophy.

Other commentators explain the above in different ways. Gaudapāda offers the following explanation: "Neither I am: I am not. Not mine: not my body; that is, I am one (thing), body is another. Nor do I exist: that is, exempt from

Vāchaspati offers the following explanation: "I am not precludes action only. Indeed, 'as,' the root, together with 'bhû' and 'kṛ,' are said to signify action in general. 'Nāsmi' therefore signifies, not 'I am not,' but 'I do not.' Thus, all acts whatever, whether external or internal, ascertainment, consciousness, reflexion, perception and all others, are denied as acts of soul: consequently, there being no active functions in soul, it follows that neither do I (as an individual agent) exist. Aham here denotes 'agent'; as, I know, I sacrifice, I give, I enjoy, or so on, implying uniformly the notion of an agent—nor is aught mine. An agent implies mastership; if there be no agent there can be no abstract mastership (or possession). Or 'nāsmi' means 'na asmi,' I am male' or Puruṣa unproductive of progeny, of acts.

Gaudapāda's interpretation seems to me to be unsatisfactory.

^{&#}x27;नाचि नाइमेव भवामि, न में मम गरीरं तत्, यतोऽइमन्यः गरीरमन्यत्, नाइमिति चपरिशेषम् चह्रहाररिहतम्।"

'Nāham' indicates 'absence of agency,' for what is unproductive cannot be also an agent: 'Na me' means I am not a master, because I am not an agent." The above interpretation seems to be strained. We have already proved conclusively that Purusa cannot be absolutely inactive, devoid of all agency; He is rather the ultimate source of all activity which is supposed to belong to Prakṛti.

Vijnana Bhikşu offers the following explanation: "Neither I am denies the agency of the soul, nor (is aught mine), denies its attachment (to any objects); nor do I exist, denies its appropriation (of faculties)." 2 The Sānkhya-Pravachana-Sûtram offers the same explanation: "Through constant cultivation of the categories in the form of the abandonment (of abhimana or conceit), expressed as (that the Self is) not (Prakrti), (that it is) not (Mahat, etc.), (there takes place) the perfect development of Viveka or Discrimination." (Chap. 3, aph. 75.) The Sānkhya-Chandrikā offers a similar explanation: "I am not means I am not agent; therefore I am distinct from the principle of intelligence. Not mine is pain: Exemption from being the seat of pain and the rest thence determined. Nor do I exist: By this difference from egotism is expressed. " The gist of all these explanations is that in the state of release Purusa becomes conscious of His absolute inactivity or indifference, of His absolute separatedness from Prakrti and her manifestations, etc. But we

[े] नास्तीत्यात्मनि कियामार्व निषेधित, यथाहु: 'क्रश्वस्तय: किया-सामान्य-वचना' इति । तथा चाध्यवसाया-भिमानसङ्ख्यालीचनानि चान्तराणि, बाद्याय सर्वे व्यापारा:, बाक्मनि प्रतिषिद्धानि बोहव्यानि । यत्यात्मनि व्यापारावेगी नाष्यतो नाहसू, बहमिति कर्मपदम्, 'बहं जानामि, बहं जुहीमि, बहं ददे, बहं भुन्ने' इति सर्वेष कर्मु: परामर्थात् । अतएव न में, कर्मा हि स्वामितां लभते. तदभावानु कुत: स्वाभाविकी स्वामितित्ययं:। बथवा 'नाम्बि' इति पुरुषोऽस्ति, न प्रसवधन्तां, बप्रसव धर्मत्वाश्वाकम्त्वमाह नाहमिति । बकर्मत्वाश्च न स्वामितित्याह 'न में' इति ॥"

[&]quot;नाखीत्यस्य न कत्तांबात्यवंश्लेन बुह्मिन्नोऽइमिति प्राप्तं न मे दुःखमिति प्रिष्मेन दुःखाद्यारीपाभावी लखी नाइमित्यनेनाइंकारमेदयहः॥"

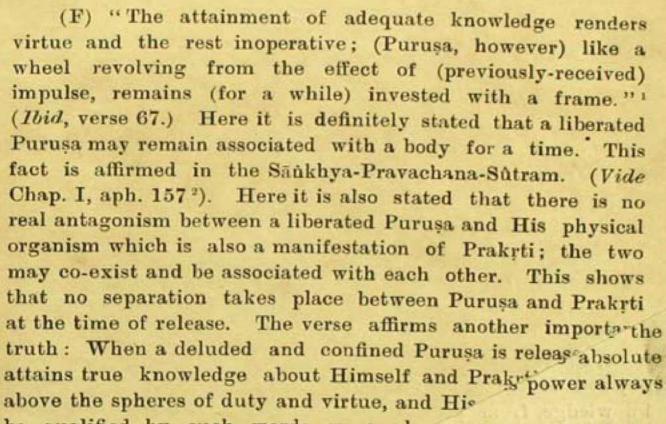

have already proved by citing several texts from the Sāṅkhya that such expressions are only partially true, and false and misleading if taken unconditionally. We may therefore conclude that the interpretations we have given to the expressions Nāsmi, Na me and Nāham are the correct and consistent ones.

- (D) "With this (knowledge) Puruşa, unmoved and self-collected, as a spectator, contemplates Prakrti, who has ceased from production (and) consequently reverted from -the seven forms (to her original state)." 1 (Ibid, verse 65.) Here it is clearly stated that Puruşa still contemplates Prakrti, but as something completely transformed, i.e., as no longer binding and deluding Him. Prakrti does not cease to exist for nor separates herself completely from, Him; but she is not contemplated now in just the same way as before. Purusa is still the all-pervading subject and Prakrti the all-pervading object; and the theoretical relation between them is just the same now as it was before, but their practica! relation has become different and transformed. In the state of bondage Prakrti used to delude and bind Purusa by her various manifestations. Now in the state of release, she has ceased to do so, but still she is an inseparable element of Purusa. This point is made very explicit in the following verse.
- (E) "The one disregards because 'I have seen'; the other desists because 'I have been seen'; (and) notwithstanding their conjunction there is no occasion for (further) evolution." (Ibid, verse 66.) Here it is explicitly asserted that the conjunction between Purusa and Prakṛti is still intact; but what has been changed is the psychical delusion under which Purusa thought that the evolutes of Prakṛti were His own productions and identical with Himself.

[&]quot;तेन निव्चप्रस्वामधैवयात् सप्तरपविनिव्चाम्। प्रकृति प्रयति पुरुषः प्रेचकवदवस्थितः सस्यः ॥"

[&]quot; इटा मयेलुपेचक एको इटाऽइमिल्परमल्या। सति संयोगेऽपि तयो: प्रयोजनं नास्ति सगैस्य॥"

be qualified by such words as good kaivalya means absolute freedom from pain; it is also called the establishment of the conscious power of Purusa in its own essential form on account of the cessation of the union or relation between Him and the Intellect. These two definitions do not at first seem to be identical. But closer examination shows that though they are not strictly identical there is no inconsistency between them; for the former is the necessary consequence of the latter. So that it is immaterial whether

^{&#}x27; तस्यादर्शनस्याभावात् वृद्धिपुरुषसंयोगाभावः बात्यन्तिको वश्वनोपरम इत्ययः; एतद् हानं, तह्यः केवल्यम्, पुरुषस्याभियोभावः, पुनरसंयोगो गुणैरित्यर्थः। दुःखकारणनिवकी दुःखोपरमो हानं, तदा स्वरप्रतिष्ठः पुरुष दत्यक्रम्॥ ''

[&]quot;पुरुषायंग्रनानां गुणानां प्रतिप्रसवः केवल्यम् सद्पप्रतिष्ठा वा चितिगकिरिति ।"

[&]quot; "क्रतभोगापवर्गाणां पुरुषार्थय्नानां यः प्रतिप्रसवः कार्यकारणायानां गुणानां तत् केवल्यं, खदप-प्रतिष्ठा पुनर्वृद्धिसञ्चाऽनभिसम्बन्धात् पुरुषस्य चितिशक्तिरेव केवला, तस्याः सदा तथैवाऽवस्थानं केवल्यमिति।"

affected and deluded as before. The lives of those jivanmuktas are instances in point. But the following verse appears to raise some difficulties.

- (G) "When owing to gratification of ends, (its) separation from the body takes place and Prakrti ceases to act, (Purusa) obtains both absolute and final release from the three kinds of pain." 1 (Ibid, Verse 68.) Here the word 'Kaivalya' seems raise some difficulties. With some commentators the word न्त isolation (प्रथमाव:), while with others, Vachaspati, for , it means liberation from the three kinds of pain त्रमः). I agree with the latter commentators, because station is consistent with the fact that separation ween Puruṣa and Prakṛti is out of the question. the true meaning is further confirmed if we wruṣārtha, or the ultimate object of an Purusa is a them is just the san & The Sankhya-Pravachana-Sûtram says: relation has become different and the three-fold pain is the of bondage Prakrti used to delude and bind Purusa by her various manifestations. Now in the state of release, she has ceased to do so, but still she is an inseparable element of Purusa. This point is made very explicit in the following verse.
- (E) "The one disregards because 'I have seen'; the other desists because 'I have been seen'; (and) notwithstanding their conjunction there is no occasion for (further) evolution." (Ibid, verse 66.) Here it is explicitly asserted that the conjunction between Purusa and Prakṛtl is still intact; but what has been changed is the psychical delusion under which Purusa thought that the evolutes of Prakṛti were His own productions and identical with Himself.

^{। &#}x27;'तेन निवत्तप्रस्वामयंवयात् सप्रद्यविनिवत्ताम्। प्रकृतिं प्रयति पुरुषः प्रेचकवदवस्थितः सस्यः ॥ ''

[&]quot; इटा मयेलुपेचक एको इटाइइमिल्परमत्यन्या। सति संयोगेइपि तयो: प्रयोजनं नासि सर्गस्य॥"

freedom of the Seer (Purusa) and His intrinsic splendour. This means that He does not unite with the gunas again; hanam is the cessation of pain on account of the disappearance of the cause of pain. It is said that, then Purusa is established in His own essential form." 1 Consider also the following with this: "The absolute freedom (from pain) takes place when the gunas become latent, i.e., do not act any more for fulfilling the object of Purusa, or when the Conscious Principle is established in its own essential form." 2 (Kaivalya-Pāda, aph. 34.) Vyāsa comments on this in this way: "The absolute freedom (from pain) is attained when the gunas as causes and effects become latent, on account of their completing the enjoyment and thereby achieving the release of Puruşa, and of their thus having no need of acting for the fulfilment of His object. Again, the establishment of Purușa in His essential form takes place when His conscious power becomes absolutely free on account of the cessation of its relation with the pure Intellect. The absolute freedom (from pain) arises when the conscious power always exists in that state." 3

From the above it is plain that kaivalya means absolute freedom from pain; it is also called the establishment of the conscious power of Purusa in its own essential form on account of the cessation of the union or relation between Him and the Intellect. These two definitions do not at first seem to be identical. But closer examination shows that though they are not strictly identical there is no inconsistency between them; for the former is the necessary consequence of the latter. So that it is immaterial whether

^{ं &#}x27;तस्यादशैनस्याभावात् वृद्धिपुरुषसंयोगाभावः भाव्यन्तिको बन्धनोपरम इत्ययः ; एतद हानं, तहः : कोवत्यम्, पुरुषस्यामित्रीभावः, पुनरसंयोगी गुणैरित्ययः। दःखकारणनिवकौ दःखोपरभी हानं, तदा खकपविततः पुरुष इत्यक्तम्॥ "

[&]quot; पुरुषार्थग्रन्थानी गुणानी प्रतिप्रसवः कैवल्यम् खरूपप्रतिष्ठा वा चितिगक्तिरिति।"

^{* &}quot;क्रतभीगापवर्गाणां पुरुषार्थय्कानां यः प्रतिप्रसवः कार्य्यकारणाकानां गुणानां तत् कैवल्यं, सदप-प्रतिष्ठा पुनर्वृद्धिसच्याऽनिभसम्बन्धात् पुरुषस्य चितिशक्तिरेव केवला, तस्याः सदा तथैवाऽवस्थानं केवल्यमिति।"

kaivalya is defined as the establishment of Puruşa in His own essential nature, or as His absolute liberation from pain.

But one thing requires explanation. The establishment of Purusa in His own essential form is said to be caused by the disappearance of the union or of the relation between Him and the Intellect. We have proved before that such a union or relation cannot cease absolutely. As we have shown, the Sānkhya-Kārikā explicitly says that even after the liberation of the individual Purusa such a union or relation remains intact, but only the attitude of Puruşa and Prakrti towards each other changes and assumes a quite different form. This view is confirmed by the first part of aphorism 34, which is as follows: "Kaivalya is the latency which the gunas attain when they cease to fulfil the object of Purusa." 1 But what is the object of Purusa? What is the puruṣārtha? The immediate object is the Puruṣa's experience or enjoyment of the gunas and their manifestations, the consequence of which is His bondage; the ultimate object is His absolute liberation, by attaining discriminative knowledge, from pain following upon that experience and bondage. It is evident that the gunas cease to fulfil the emise bigeteckty, whom Printiga thains manaingtion... That... is, Puruşa ceases altogether to experience the gunas and their manifestations. What is the true meaning of this? Does Purusa cease wholly to experience the gunas? If so, how does Purusa, as liberated during His mundane life (jîvanmukta), experience them? That is, how can His emancipation co-exist with His experience of the gunas? In his commentary on aphorism 30 of the Kaivalya-Pāda of the Yoga-Sütram Vyāsa holds that the wise yogin becomes free (from pain) even while alive (on this earth).2 The true meaning of the aphorism, therefore, should be that the gunas

[&]quot; पुरुषार्थय्नानां गुणानां प्रतिप्रसवः कीवल्यम्।"

[&]quot; जीवचेव विदान् विसुक्ती भवति।"

cease to bind Him or give Him pain even though they still supply the materials for His experience or enjoyment. Or, otherwise expressed, He ceases to be painfully affected by the experience of the materials, by maintaining an attitude of indifference or aloofness towards them. And even if by kaivalya is meant the permanent rest of Purusa in His own essential form, it does not imply that He exists alone, i. c., absolutely separated from the gunas, but that He has now regained the knowledge of His distinction from them; which He wholly lost in the state of bondage. And in this sense He may be said to rest in His own essential form-a form which is not painfully affected by the experience of them, which is wholly immune from pain arising from such experience. This interpretation is confirmed by the fact that even a liberated Puruşa has a body, though quite different in nature and constitution from that which He has in the state of bondage.

Consider also the following aphorisms: "Although destroyed in relation to him whose objects have been achieved, it is not destroyed, being common objects to others." (Sādhana-pāda, aph. 22.) Read also Vyāsa's commentary along with this: "Although it (chitta or mind) is destroyed to the Puruṣa who is Kuśala or has attained wisdom, it is not destroyed in relation to the Puruṣas who have not attained wisdom, as it has not done its duty to them, yet, it still exists as the object of their observation, for its very existence as such object is necessitated by the need of the percipient Puruṣa. For these reasons Puruṣa and His objects are both eternal, and consequently their union is so too. As has been said: On account of the eternal conjunction between Puruṣa and the three guṇas, there is eternal conjuction between Him and their manifestations (i.e., the categories beginning with

[&]quot;कतार्थं प्रति नष्टमधनष्टं तदन्यसाधारणलात्।"

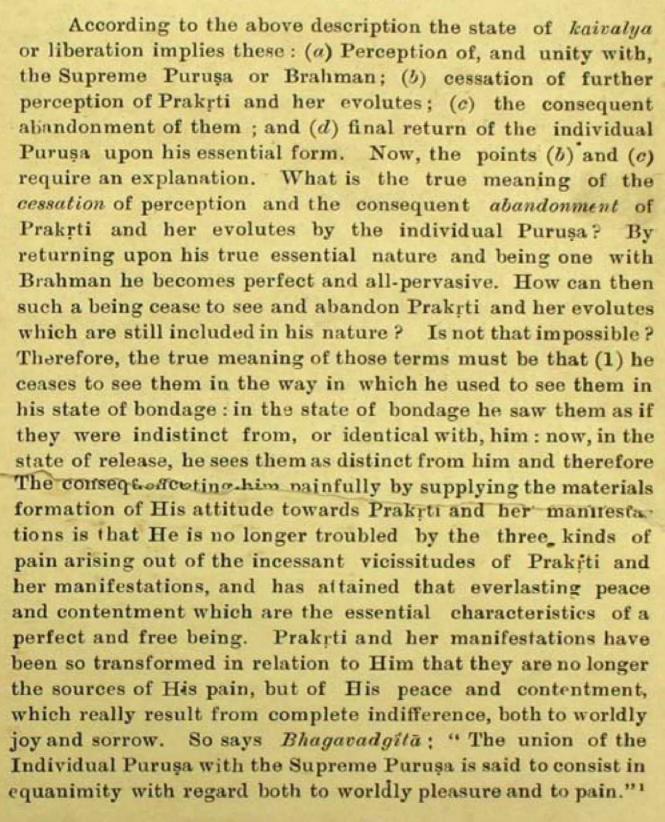

Mahat and ending with the five gross elements)." Here it is very clearly stated that absolute separation does not and cannot take place between Puruṣa and Prakṛti and her evolutes at the time of his emancipation; what really takes place is this: That Prakṛti ceases to painfully affect the liberated Puruṣa with her manifestations as she used to do in his state of bondage; that she no longer binds him, as he has attained the knowledge of his distinction from her, and therefore has altogether ceased to delude him.

In the Santiparva of the Mahabharata the state of kaivalya is described in this way: "The twenty-fifth (i. e., the individual Puruşa), when becomes free, no longer sees the twenty-fourth category (Prakṛti), and when he considers himself different from her he becomes enlightened, (i. e., knows the Supreme Purusa). When the Unmanifest Purusa understands that pure, stainless, supersensible Intelligence (i.e., the Supreme Purusa), he becomes possessed of his own essential nature. In that way he gets enlightened and is called the Twenty-sixth (i. e., the Supreme Puruşa) and he, then, abandons that Unmanifest Prakrti who is the cause of creation and destruction. Knowing Prakṛti to be unconscious and possessed of gunas, the Individual Puruşa, who is himself destitute of any gunas, becomes absolutely free by virtue of his beholding the Unmanifest Supreme Purusa. And being emancipated by his becoming united with the absolutely free Supreme Purusa he returns to his own true essential form." 2 (Chap. 308, vers. 9-13.)

[&]quot;कुशलं पुरुषं प्रति नाशं प्राप्तमध्यकुशलान् पुरुषान् प्रतिनक्तार्थमिति तेषां हशे: कसंविषयतामापत्रं समत एव प्रदिषणात्मदपिति। अतय हुन्दर्शनश्रक्षोनित्यत्वादनादिः संयोगो व्याख्यात इति तथा चीक्षां धिसंशासनादिसंयोगावसंमाताणासध्यनादिः संयोग' इति।"

[&]quot;केवलं पद्मविश्व चतुर्व्विशं न पराति । बुध्यमानो यदात्मानमन्योऽक्तमिति मन्यति ॥ तदाप्रकृतिमानेष भवत्यव्यक्रलोचनः । बुध्यते च परां दृढ्धिं विग्रह्माममना यदा ॥

^{&#}x27; 'सखे द:खें सभी भूला समल' योग उच्चते।"

The above explanation is confirmed by the following verse of the Srimad-Bhāgavata: "Prakṛti, the materials of enjoyment supplied by whom have been enjoyed, who has been abandoned and whose faults are being constantly seen, is unable to do any harm to Purusa who has established himself in his own greatness." 1 (Skandha, 3, Chap. 27, ver. 22.) From this it is evident that Purusa does not altogether cease to see Prakṛti; but He still sees her in a different light, i.e., as faulty or incapable of giving Him any peace or contentment. He abandons her, not in the sense of separating Himself from her wholly, but in the sense that the materials supplied by her for His enjoyment have been fully enjoyed, and nothing remains to be enjoyed any more, and therefore, she is now wholly needless for that purpose. In the second part of the above verse it is explicitly stated that when Purusa attains liberation and becomes established in His own greatness, Prakṛti is not separated from Him, but simply ceases to do Him any harm, i.e., to give Him any pain as she used to do in the state of His bondage. It is then clear that the that in unconscious and possessed or gunas, the individual Purusa, who is himself destitute of any gunas, becomes absolutely free by virtue of his beholding the Unmanifest Supreme Purusa. And being emancipated by his becoming united with the absolutely free Supreme Purusa he returns to his own true essential form." 2 (Chap. 308, vers. 9-13.)

[&]quot;कुमलं पुरुषं प्रति नाणं प्राप्तमप्यकुणलान् पुरुषान् प्रतिनक्तरार्थमिति तेषां हणे: कम्मंविषयतामापत्रं सभत एव प्ररूपेणात्मरूपमिति। अतय हम्दर्भनमत्र्योनित्यलादनादिः संयोगो व्याख्यात इति तथा चौकां धिकाणामगदिसंयोगाहर्ममावाणामप्यनादिः संयोग' इति।"

 [&]quot;केवलं पद्यविश्व चतुर्त्विशं न प्रयाति । बुध्यमानो यदात्मानमन्त्रोऽहमिति मन्यते ॥ तदाप्रकृतिमानेष भवत्यव्यक्रालोचनैः । बुध्यते च परा बृद्धिं विग्रहाममलां यदा ॥

real cause of all His earthly troubles and affliction; while, in the former state, He gets out of such entanglement on account of His attaining true discriminative knowledge. Thereby He regains His freedom and absolute release from the three kinds of pain which beset Him so much in the state of bondage. But His union with Praketi remains equally intact in both the states.

But it may be asked, why, then, does Prakrti cease to torment Him in the state of release, if her union with 'Purusa is still intact? The main reason for such cessation is that the attitude of Purusa towards Praketi in the state of bondage is completely changed and transformed in the state of release; in the former state He used to take one view with regard to His relation with Prakṛti; now, in the state of release, He takes an essentially different view. In the former state, He completely identified Himself with Prakrti, forgetting His distinction from her; now, in the latter state, He comes to know His distinction, though not altogether forgetting His identity with Prakrti. Or, in other words, He comes to know that He is both distinct from and identical with Prakṛti; that His distinction and identity are both relative, not absolute. The consequence of this essential change and complete transformation of His attitude towards Prakrti and her manifestations is that He is no longer troubled by the three kinds of pain arising out of the incessant vicissitudes of Prakṛti and her manifestations, and has attained that everlasting peace and contentment which are the essential characteristics of a perfect and free being. Prakrti and her manifestations have been so transformed in relation to Him that they are no longer the sources of His pain, but of His peace and contentment, which really result from complete indifference, both to worldly joy and sorrow. So says Bhagavadgitā: "The union of the Individual Puruşa with the Supreme Puruşa is said to consist in equanimity with regard both to worldly pleasure and to pain."1

^{। &}quot;सुखे दु:खें समी भूला समल' योग उच्यते।"

After this long and elaborate discussion we are in a position to determine whether the individualised Puruşa (i.e., man) is a person or not. We have, let us hope, satisfactorily proved that being specialised differentiation or individualisation of the Absolute Puruşa, he is not a bare identity, or undifferentiated or homogeneous unity which is absolutely shut up within itself, does not go to its other and therefore has no element of difference contained within itself, but is a 'system' or 'world'-a differentiated or heterogeneous unity, which goes to its other and contains within itself the ground and condition of both identity and difference, unity and variety. Thus he is a self-conscious being,-the systematic unity of Self and Not-self, of Puruşa and Prakrti: he is the Self eternally united with Prakrti, the Not-self; his concrete, real nature is the organic synthesis of Purusa and Prakrti. Again, he is not a mere self-conscious being; he is also the ultimate source of all activity and effort. His nature, therefore, satisfies the two essential conditions that constitute personality, viz., self-consciousness and will. He is consequently a person.

CHAPTER V.

OTHER FORMS OF PERSONALITY.

(A Personalistic Conception of Nature.)

Does the Sankhya recognise other forms of personality than the human and the divine? This is the next important question which we propose to consider here. The Sankhya view regarding this point may be deduced from its view with respect to the nature of the Absolute Purusa as well as that of evolution. According to the Sānkhya, as we have found, the Absolute Purusa is an all-pervasive Subject and therefore includes Prakrti as an element of His nature. Consequently, whatever is in the latter is pervaded by, or included in, the former. Or, in other words, everything in Prakṛti is, thus, a subject-object. It is a subject inasmuch as the Absolute Purusa is in it; but the Absolute Purusa is in it, whole and undivided, for He cannot be conceived to be divided into parts, each of which exists in each of the objects that constitute Prakrti, just as our mind cannot be conceived to be divisible into parts which separately exist in our ideas, thoughts, feelings and volitions. In other words, just as the whole mind exists in each of its states from the point of view of that state, so the whole Absolute Purusa exists in each object that He pervades or includes. Thus, everything in Prakrti partakes of the nature of the Absolute Purusa and is perfect; but it is perfect from a particular or limited standpoint: for it is also an object, a particular or limited thing. So that everything in Prakrti is, from its own point of view, a perfect subject-object. This fact becomes more clear if we consider the nature of the evolution of the world. It

is a well-known Sankbya doctrine that everything-every evolute—is a result of the conjunction of Purusa and Prakrti: consequently, in everything both Purusa and Prakrti are present; that is, thus, everything is a self and a not-self-a subject and an object-a Purusa and Prakrti-at the same time. But the subjective side of it is represented by the Absolute Purusa in as far as He is in it; so that it is a perfect subject-object from its own point of view. Thus, being such, it is a person. This is perhaps the grandest and the loftiest of all the teachings that we can learn from the Sānkhya. The Sānkhya maintains that the world is a system of spirits and thus preaches Panpsychism. In this respect, at least, it is in perfect agreement with the Vedanta as interpreted by Ramanuja and Nimbarka.

But we should consider one difficulty here. The Sankhya calls Prakrti and her manifestations unconscious or unintelligent. (Vide Sānkhya-Kārikā, verse 11.) How can, then, the manifested world be a world of spirits or conscious beings? We must, therefore, carefully examine the sense in which the Sankhya calls Prakrti and her manifestations unconscious. In this connexion we should read verse: "Therefore, through union therewith, the insensible products seem intelligent; (and Purusa, though) indifferent appears like an agent, though the activity is of the cosmic factors." 1 (Ibid, verse 20.) Gaudapāda explains it in this way: "Here Purusa (alone) is sentient, (and it is) owing to union there with that intellect and the other evolutes, invested with an appearance of intelligence, seem sentient. As, in the world a jar through the conjunction of cold feels cold, through that of warmth feels warm, so intellect and the other modes, through conjunction with Purusa, appear as intelligent." 2 Along with these should also be read the

^{&#}x27; तथात् तत्संथीगादवेतनं चेतनावदिव लिङम् गुणक मृत्वेऽपि तथा कर्मव अवन्दासीनः ॥ "

[&]quot; इह पुरुषयेतनाकृत तेन चेतनावभासं युक्तं सहदादिलिङ्कं चेतनावदिव भवति यथा लीके घटः श्रीतसंयुक्तः श्रोतः उत्थसंयुक्त उत्थ एवं सहदादिलिङ्कं तथा संयोगात् पुरुषसंयोगाञ्चेतनावदिव भवति।

following aphorisms: "The evolving power of Prakṛti is due to her proximity to Isvara, as in the case of a load-stone." (Sānkhya-Pravachana-Sūtram, Chap. I, aph. 96.) "The evolving power of Antaḥ-karaṇa is due to its being lighted up by Isvara as in the case of the iron." (Ibid, aph. 99.) "The agency of Puruṣa is due to the influence of Prakṛti, and the consciousness of Prakṛti is due to her proximity to Puruṣa." (Ibid, aph. 164.)

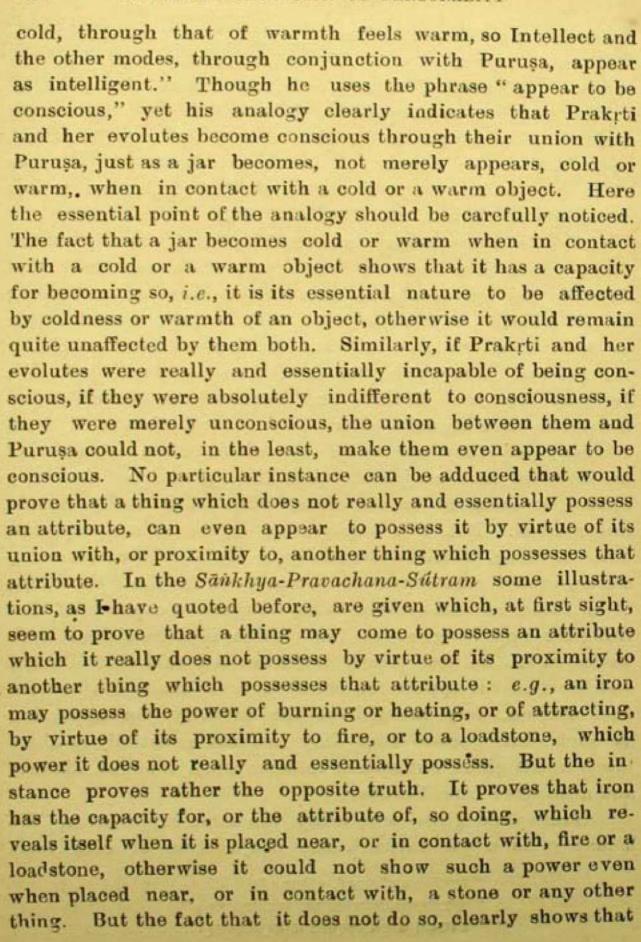

In the above statement we find two apparently contradictory assertions on the one hand, it is asserted that Prakrti and her evolutes are unconscious or insentient; on the other, it is asserted that they acquire consciousness or sentience through their conjunction with, or proximity to, Purusa. Are these two assertions reconcilable? We believe they are. Prakṛti and her evolutes are called unconscious when thought of as distinct and abstracted from Purusa; and they are called conscious, when thought of as identical and conjoined with Him. Some say that they appear or seem to be conscious, while they really remain unconscious. But this explanation seems to me preposterous. A thing, which is essentially or by its nature, unconscious, cannot even appear to be conscious, for the appearance of a thing as some other thing indicates a capacity of that thing for appearing so-a fact which is inconsistent with its essential nature. Therefore, when it is said that Prakrti and her evolutes appear conscious through their conjunction with Purusa, they must have the capacity for appearing as such: this means that they are not essentially or absolutely unconscious, but appear to be so when thought distinct and abstracted from Purusa.

Gaudapāda gives practically the same explanation. He holds: "As a jar through the conjunction of cold feels

^{&#}x27; " तत्मन्निधानादधिष्ठावलं, मणिवत्। "

[&]quot; अन्तः करणस्य तद्ञ्चलितलामो इवद्धिष्ठावलम्।"

[&]quot; उपरागात् कर्त्तं चित्साविध्याचित्साविष्यात्।"

it does not accidentally come to possess that power, but possesses it really and essentially under the condition that it can operate only when placed near or in contact with fire or a loadstone. It is a well-known fact that all things reveal their powers or attributes under definite conditions : fire burns only when in contact with a combustible thing; a loadstone attracts only when put sufficiently near a piece of iron; a man can see an object only when it is in a position to excite his visual organ. Similarly, an iron can burn, heat or attract, only when placed near or in contact with fire or a loadstone. Take another example. A rope appears to be a snake in the dark; and it may be said that this is an appropriate instance to show that a thing may appear to possess a power which it really and essentially does not; but it is not so. The rope which appears to be a snake in the dark, has a capacity or power to appear as such, and such a capacity or power is not merely accidental, but inherent in its nature; for, otherwise, it could appear to be a quite different thing, such as a log, or a tree, or a block of stone, etc. The fact that it appears to be a snake indicates that there are some important points of resemblance between itself and a snake which do not fail to be perceived in the dark, while its points of difference from the snake fail to do so. This is the real reason why it is mistaken for a snake. It may be said that its confusion with a snake is due to the misinterpretation of the sensations excited by it in the mind of an observer, not to its possessing a capacity for appearing as such; but our reply will be that such a misinterpretation is possible because the rope is capable of producing those sensations which only a snake can produce. Thus its capability or power is inherent in its nature, not a merely accidental or adventitious acquisition. Therefore, the fact that Prakrti and her evolutes appear conscious or sentient by virtue of their conjunction with, or proximity to, Purusa clearly proves that they possess the capacity or power of being so; that is to say, they are

conscious. This conclusion is further confirmed by the fact that if Puruṣa and Prakṛti were absolutely opposite to each other—if there were no tendency inherent in their nature to be conjoined with each other, they could not be conjoined at all—they would remain as apart from each other as the two poles of the earth. But the Sānkhya tells us that they are eternally conjoined—that their conjunction is the cause of the evolution of the world. These two facts,—namely, (a) that Prakṛti and her evolutes appear conscious by reason of their conjunction with Puruṣa, and (b) that such conjunction being eternal, they eternally appear conscious—conclusively prove that consciousness is an essential attribute of them, inasmuch as they never part with it, they possess it eternally.

But yet another difficulty remains to be explained. If Prakrti and her evolutes are really conscious, why does the Sankhya, then, call them unconscious? I have offered one reason above: they are called unconscious, when thought of as distinct and abstracted from Purusa. For they are conscious in as far as they are conjoined with Him; but in as far as they are thought of as distinct and abstracted from Him, they must be unconscious; for if, still, they are conscious, no meaning is left in the fact that they are conscious in as far as they are conjoined with Purusa. Or, in other words, they are conscious because they are differentiations, modes, or moments of Purusa - because Purusa exists, works, realises Himself in and through them-because Purusa is their very being or lifeprinciple. And if that Purusa, that life-principle, is abstracted from them, or they are abstracted from Him, nothing remains of them that may be called conscious; they become unconscious.

There is another reason for calling them unconscious. It is necessary to understand the meaning of unconsciousness if we want to understand the meaning in which Prakrti and her evolutes are called unconscious. Unconsciousness may be used to mean the total absence of consciousness; or it may be used

to mean a very low degree of consciousness-consciousness whose intensity or degree falls below the threshold or the level of distinct and vivid consciousness. In the former sense unconsciousness is absolutely opposite to consciousness, whereas in the latter sense, it is a kind of consciousness and is called, in modern psychology, subconsciousness. But can we conceive of an absolutely unconscious thing? How do we know that a thing is absolutely unconscious? We can know a thing to be absolutely unconscious only by relating it to our thought or consciousness. But how can we relate a thing which is absolutely unconscious to a thing which is conscious? How can we relate what is absolutely unconscious with our thought or consciousness? Is it not impossible? Two things. which are absolutely opposite, cannot be related, for relation implies affinity of nature, some characteristics in which they agree; and two things, which have nothing in common, must fall absolutely asunder and cannot be related. Thus there cannot be anything absolutely unconscious; and even if there were such a thing we could not know it, could not think about it, could not make any assertion whatever about it, i.e., could not say whether it existed or not. We must therefore reject the first meaning of unconsciousness (as it has been rejected by modern psychology), and accept the second meaning. When, therefore, the Sānkhya calls Prakrti and her evolutes unconscious, what it means to say is, that they are sub-conscious; that is, their consciousness has a low degree of intensity-intensity which is not sufficiently high to make consciousness distinct and vivid.

Now subconsciousness also admits of degrees: thus one thing may be more or less subconscious than another, that is, may possess lower or greater degree of subconsciousness than another. Thus, the five subtle and the five gross elements, for instance, are more subconscious, i.e., possess lower degrees of consciousness than the eleven senses, which, again, are more subconscious than Self-consciousness (Ahamkāra),

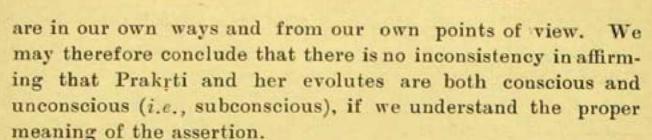

and so on. Even the objects composed of the five gross elements do not possess subconsciousness in equal degrees. This fact may be made more clear if we consider our own subconscious ideas. Those of our ideas which are, at any particular time, subconscious, i.e., below the level of distinct and vivid consciousness, or in other words, of which we are not, at present, distinctly and vividly conscious, do not possess subconsciousness in the same sense and in the same degree. Some of them are just below the level, so that they can be raised to the level of distinct and vivid consciousness by a very slight effort of will, or by a very slight suggestion from outside, while some others require greater effort of will, or more powerful external suggestion; some others, still, require far greater effort or far more powerful suggestion; some, again, cannot be revived even after continuous effort or suggestion; while some others seem to be lost for ever. These different classes of ideas may be regarded as possessing subconsciousness in different degrees and may be called more or less subconscious. The evolutes of Prakrti may be called more or less subconscious in this sense. But the liminal intensity or threshold of consciousness may be lowered by proper practices to such an extent that what is subconscious in normal circumstances may be made conscious, or that what remains imperceivable in normal circumstances may be made perceivable; and in this way the liminal intensity may be so lowered that only very few ideas remain subconscious. In the Yoga-Sütram it is said that yogins may attain powers by virtue of which they may perceive or be conscious of things which remain unperceived by ordinary men, or be conscious of ideas which remain subconscious to the latter. (Vide Vibhüti-Pāda, aph. 33.) And we conceive of a conscious Being in whom such a liminal intensity or threshold is so extremely low that it has altogether disappeared, so that in Him there is no idea or state which is subconscious, to Him there is nothing which is not consciously present. Such a

Being is the Absolute Puruşa. The lives of all other beings are divided into two spheres—the subconscious and the conscious—with different extents and boundaries.

From the above it is manifest that the limits of both consciousness and subconsciousness are fluctuating, and that a being may be called both subconscious and conscious from different points of view. Thus, a being may be called subconscious, i.e., possessing lower degree of consciousness, in comparison with a being possessing higher kind of consciousness; and the same being may be called conscious in comparison with a being possessing still lower degree of consciousness, or more subconsciousness. In this sense, a lower animal may be called subconscious in comparison with a man and conscious in comparison with a plant. Similarly, Prakṛti and her evolutes are called by the Sankhya unconscious (i.e., subconscious) in comparison with Puruşa who possesses the highest degree of consciousness, and are also said to appear conscious, not, of course, in comparison with anything else, because there is nothing else than Puruşa to be compared with, but because their subconsciousness is a kind of consciousness. Or, in other words, though they are unconscious in comparison with Purusa, yet, they may, to all intents and purposes, be regarded as conscious; that is, they are conscious from their own points of view. Just as we are conscious from our own points of view, but subconscious from the point of view of the Absolute, so the physical things are conscious from their own points of view but are subconscious from our points of view. The reasons for such a double point of view from which we view the nature of Prakrti and her evolutes, are that the latter do not reveal their consciousness in the same way as we do. The manifestations of their consciousness being quite different from, or in numerous instances diametrically opposite to, those of ours, we label them with the name of unconscious; but really, they are conscious in their own ways and from their own points of view, as we

In the Yoga-Sútram it is admitted that the world is included in the content of Purusa as the object of His knowledge or consciousness, that in respect of this kind of knowledge there is no difference between Him and the Chitta or the mind, and that this coincidence of knowledge is called experience (भोग:) of Purusa. Let us consider fully the aphorisms in which these admissions are made: "Though Buddhi-Sattva (i.e., purified consciousness) and Purusa are widely different, yet, their knowledge प्रस्था: of the world is perfectly coincident, and this coincidence of knowledge is called experience (भोग:) of Puruşa; but this experience of Puruşa is a part of Buddhi-Sattva and is therefore an object of Purusa's experience (भोग:): the self-consciousness or self-knowledge of Purusa (पोक्षेय. प्रत्यय:) is different from his consciousness or knowledge of the world, the former representing the very essence (acq:) of him, while the latter is a part of Buddhi-Sattva: But, yet, Purusa is the observer of that self-knowledge." (Vibhūti-Pāda, aphor. 35.) (In this connexion, see also Vyāsa's commentary on it.) Here it is stated that Purusa possesses two kinds of knowledge (प्रत्ययः), one of which is the knowledge of the manifested world that comes to Him through Buddhi-Sattva or purified consciousness, and the other is the knowledge of His own essential form (बहुप:); but He is the observer of both-of the manifested world and His own essential form. One thing should be carefully noted here: The aphorism does not assert that Purusa and Buddhi-Sattva are absolutely different, but that they are widely and exceedingly different (अत्यन्तासङ्गीर्णः). If it meant to affirm their absolute difference, it could not say

¹ " सत्तपुरुपयोरत्यन्तासङीर्णयोः प्रत्ययाविशेषो भीगः, परार्थत्वात्, स्वार्थसंयमात् पुरुषश्चानं । "

that their pratyaya, i.e., experience or knowledge of the manifested world is identical (अविशेष:); for two absolutely different things cannot coincide in any respect: two things which know a third thing exactly in the same way and in the same sense, indicate that they have affinity of nature or similar constitution at least in some respects, although in some other respects they may differ. Purusa and Buddhi-Sattva both know the manifested world exactly in the same way and in the same sense; and for this reason their knowledge is identical. Therefore, Purusa and Buddhi-Sattva (an evolute of Prakrti) cannot be absolutely different; they must have an affinity of nature, i.e., in some respects at least they must agree. And in what respects may they be supposed to agree? It is, at least, in respect of consciousness that they must agree, that is to say, both of them are conscious; and in respect of the knowledge of the manifested world they are conscious exactly in the same way and in the same sense; if they were not so, the knowledge of the one could not be identical with that of the other. But Vyāsa in his commentary says: "Purusa is unattached, different (from Buddhi-Sattva) and purely conscious or intelligent, and has, therefore, characteristics widely opposite to those possessed by the changeful Buddhi-Sattva." 1 From these it is evident that according to Vyāsa the aphorism means to say that Buddhi-Sattva is unconscious. It is difficult to see how does he derive such a meaning. The word 'atyantāsamkîrņa' may mean 'widely or very different,' and this meaning is consistent with the assertion that the knowledge of the manifested world on the part of Buddhi-Sattva and Purusa is entirely coincident or identical. If Buddhi-Sattva and Purusa were really opposite to each other in all respects, if they possessed wholly opposite characteristics, there could not be, as I have shown before, any coincidence or identity between their

^{1 &}quot; तसाच सत्तात् परिवासिनीऽत्यन्तविधकां ग्रह्वीऽन्यवितिमात्रहपः पुरुषः। "

knowledges of the manifested world-Purusa could not even think that the knowledge, which was originally attained by Buddhi-Sattva, was His own knowledge. Besides it is difficult to see how an unconscious thing like the Buddhi-Sattva could attain any knowledge at all, inasmuch as knowledge, as is well known, must be a conscious state; and still more difficult it is to see how such a knowledge, even if possible, can be that which the conscious Purusa can consider as His own. It is curious that Vyāsa calls the knowledge attained by Buddhi-Sattva unconscious, and the self-knowledge of Purusa (पौरुषेय: प्रत्ययः) conscious.1 Now a question suggests itself: If the knowledge attained by Buddhi-Sattva about the manifested world be really unconscious, how can it coincide or be identical with the knowledge possessed by Purusa about the same world, having regard to the fact that Purusa's knowledge must always be conscious? Or, in other words, how can an unconscious knowledge, even if possible, coincide with a conscious knowledge? The answer must be that it cannot. The difficulty can however be obviated by the supposition that Buddhi-Sattva is not really unconscious, but subconscious in the sense of possessing far lower degree of consciousness than that possessed by Puruşa. Puruşa's consciousness or self-consciousness always possesses the highest degree of intensity, leaving no margin for subconsciousness, that is, He is fully and distinctly conscious of all things, whereas the consciousness of Buddhi-Sattva possesses different degrees of intensity under different circumstances and conditions; therefore Buddhi-Sattva may be called partly conscious and partly unconscious, i.e., subconscious.

The above conclusion is confirmed by aph. 20 of the Sādhana-Pāda, which runs thus: "Puruṣa is only subject; though he is unattached to anything, yet, he observes the

^{1 &}quot; यन्त तस्माविशिष्टयितिमातकपीऽन्यः पौक्षेत्रः प्रत्ययः। "

functions or modifications of Buddhi as if they were his own." Carefully notice the commentary of Vyasa on this: "The subject only; 'this means that he is nothing other than the power of becoming conscious; that is to say, he is not touched by the qualities.' This Puruşa has cognitions similar to those of Buddhi; he is neither wholly similar nor very dissimilar to Buddhi. He is not wholly similar; why? Buddhi is changeful inasmuch as its objects are (sometimes) known and (sometimes) unknown; (for instance), its objects, such as the cow and the jar, etc., being (sometimes) known and (sometimes) unknown, show its changefulness. Purusa is the constant knower of his objects; and this fact . shows his unchangefulness. How? For, it never happens that Buddhi, which is the object of his consciousness, becomes sometimes known to him and sometimes not; he is always cognisant of it, and this shows his never-failing power of observation and thereby his unchangefulness. Furthermore, Buddhi exists to fulfil another's object on account of its synthetic activity; but Puruşa exists for his own sake. Again, Buddhi is capable of taking the forms of all objects, and is thus constituted of three gunas and therefore unconscious; whereas Purușa is only the observer of the three gunas. For these reasons he is not similar. Let him be so: but, yet, he is not very dissimilar: Why? Even though he is pure or unattached, yet he sees the functions or modifications of Buddhi as if they were his own, and thereby appears to be, as it were, the very self of Buddhi, although in reality he is not so. So it has been said elsewhere: 'The enjoying power (Puruşı) is certainly unchangeful and does not run after objects. But he appears to run after the functionings of Buddhi, as if he himself were connected with the changeful external objects; and thus the reflexion of his consciousness falling upon Buddhi, he appears to imitate

^{1 &}quot; दला हिश्मातः गडीऽपि प्रत्ययानप्रधाः।"

those functionings.' For these reasons the conscious Puruşa appears to be indistinct from, or similar to, Buddhi."

Read with this also the aph. 4 of the Samādhi-Pāda, which runs thus: "Identification (of Furusa) with the modifications or functions (of Buddhi) elsewhere," 2 and also Vyāsa's comments on it which run thus: "How then? On account of his seeing the objects presented to Chitta, identification (of his manifestations) with the modifications (of Chitta) takes place elsewhere, i.e., in the state of the latter's outward activity. In the state of the Chitta's outward activity, whatever may be the modifications of it, the same are the modifications of · Purusa, as if he existed in that state. And similar is the aphorism: 'Though the knowledges of Purusa and Chitta are really distinct, yet they appear to be identical.' Chitta is like a magnet and benefits Puruşa by its proximity to him alone, and becomes his own self as it were by reason of its being his object of experience. Therefore in respect of his consciousness of the Chitta's functions or modifications his eternal relation with Chitta as that of the subject to the object is the cause." 3

The aphorism 22 of the Kaivalya-Pāda is more significant. It runs thus: "Though the Conscious Principle (Puruṣa) is not

गं हिंगमाच इति हक्णिकिरेव विशेषणाऽपराखटेल्यर्थः; स पुरुषो बुढेः प्रतिसंवेदी; स बुढेः न सहपी नात्यलं विहप इति । न तावत् सहपः; कस्मात् ? ज्ञाताज्ञातविषयलात् परिणामिनी हि बुढिः, तस्माय विषयी गवादिर्घटादिवां ज्ञातयाज्ञातयेति परिणामिलं दर्णयति । सदा ज्ञातविषयलम् पुरुषस्य स्परिणामिलं परिदोपयितः; कस्मात् ? नहि बुढिय नाम पुरुषविषयय स्थात् रटहीताऽरटहीता च ; इति सिढं पुरुषस्य सदा ज्ञातविषयलम् ; ततयापरिणामिलिमिति । किच पराधा बुढिः, संहल्यकारिलात् ; स्वाधः पुरुष इति । तथा सर्वाधाध्यवसायकलात् विगुणा बुढिः, चिगुणालादचितनिति । गुणानां त्पद्रष्टा पुरुष इति ; सतो न सहपः । यस्तु तिहं विहप इति ; नात्यलं विहपः ; कस्मात् ? यखोऽप्यसी प्रत्यवानुपस्यो, यतः प्रत्यवं बीडमनुपस्थित, तमनुपस्थव तदात्माऽपि तदात्मक इव प्रत्यवमासते । तथाचीकम्, " अपरिणामिनी हि भोकृयिकरमितसंक्रमा च, परिणामिन्यर्थे प्रतिसंकानीव तक्ष्तिननुपति ; तस्याय प्राप्तचैतन्योपयहरूपाया बुढिवन्यविधिष्टा हि ज्ञानवित्तित्याख्यायते ।"

^{2 &}quot; वित्तमारुप्यमितरव।"

उ ''कयं तर्हि ? दर्शितविषयलात् इत्तिसार्ष्यमितरतः। व्युत्वाने यायित्तवत्त्वयसदिविश्चित्रतिः पुरुषः। तथा च स्तम्। एकमेव दर्शनं व्यातिरेव दर्शनमिति। चित्तमयस्तान्तमणिकन्यं संनिधिमातीपकारि द्यालेन स्तं भवति पुरुषय स्तामिनः। तथावित्तवत्तिविधि पुरुषस्थानादिः सम्बन्धो हेतुः।''

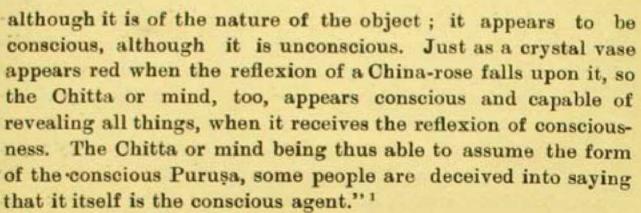

connected with any gunas or qualities and is therefore unchangeable, he assumes the form of Chitta's functions or modifications; and in this way he comes to feel them as if they were his own." Vyāsa comments on it thus: "The experiencing Principle (Puruṣa) is certainly unchangeable and has no motion in the form of entering into any guna or quality; yet it appears to follow the functions or modifications of the changeful Buddhi as if it had entered into the latter; and then it seems to be indistinct from the same upon which the reflexion of its consciousness has fallen, on account of its imitating those functions or modifications. And so it has been said: Nor nether worlds, nor mountain caves, nor darkness, nor seas, nor ravines are the hollows in which is placed the Eternal Brahman. The wise point out Buddhi, which is indistinct from Him, to be that hollow (गुहा)." 2

Read also the next aphorism along with this. "The Chitta (mind) being thus coloured by the nature of both the knower (subject) and the knowable (objects), becomes capable of revealing all things." Vyāsa comments on it thus: "The Chitta or mind is of course coloured by the objects thought of, and is also itself the object of Puruṣa's observation; for these reasons it becomes connected with him as if its functions or modifications were those of his own self. The Chitta or mind, having thus assumed the forms of the observer and the observed, appears to be both the subject and the object; and in this way assuming the forms of both the conscious and the unconscious, it appears as if it were of the nature of the subject,

^{1 &}quot; चितरप्रतिसंक्रमायासदाकारापत्ती खबुद्धिसंवेदनम्।"

^{2 &}quot; अपरिवासिनी हि भोक्रुशक्तरप्रतिसंक्षमा च परिवासिन्यर्थे प्रतिसंकालेव तदृत्तिमनुपतित, तस्याय प्राप्त-चैतन्योपयहस्वद्भपाया बुद्धिवत्तेरनुकारिमावतया बुद्धिवस्थितिश्रष्टा हि ज्ञानवत्तिराखायते। तथा चीक्षं 'न पातालं न च विवरं गिरीवां नैवास्थकारं कुचयो नीदधीनाम्। गुइः यस्यां निहितं बद्धा शाखतं बुद्धिवत्तिमविश्रिष्टां कवयो वेदयन्ते दित ॥ "

^{3 &}quot;द्रष्ट्-हखीपरक्षं चित्तं सव्वांधैम्।"

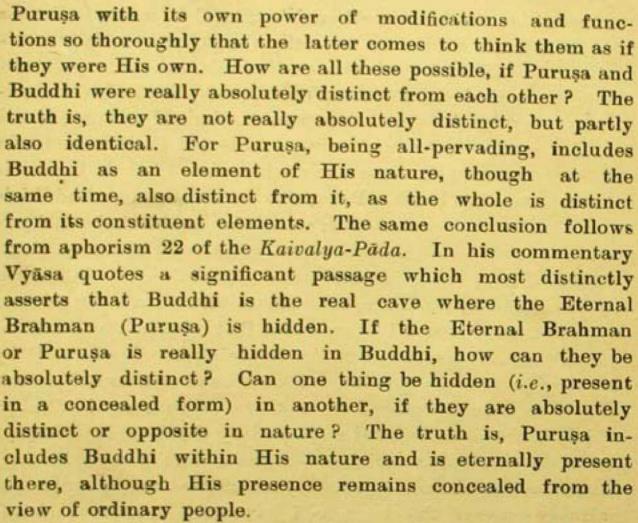

Similar other aphorisms may be cited, but those quoted above are sufficient to prove our contention that Prakṛti (of which Buddhi and Chitta are only evolutes) is not absolutely unconscious. In aphorism 20 of the Sādhana-Pāda it is expressly stated that Purusa sees the functions or modifications of Buddhi (i.e., Intellect) as if they were His own. And Vyāsa in his commentary upon this remarks that Purusa is not very dissimilar to the Buddhi; for, He appears to be the very self of the Buddhi on account of His experiencing its functions or modifications as if they were His own. Now, it is here asserted that the ground of the similarity between Purusa and the Buddhi is the capability of the former for experiencing the functions or modifications of the latter as if they were His own, and for appearing, thereby, to be the very self of it. We have already proved that when one thing appears to be another, it possesses the capacity or power for appearing as such, that is, it is the nature of the thing to appear as such. If it were not the nature of Purusa to appear to be the very self of Buddhi, if He did not contain the capacity or power to appear as such, He could not do so; but the fact that He really does so, proves that He really possesses such a capacity or power. He is, no doubt, also distinct from Buddhi; but that does not debar Him from identifying Himself with it in certain respects.

भनी चि मल्येनार्येनीपरतम्, तत् खयच विषयतात्, विषयिणा पुरुषेणालीयया बच्चाऽभिसल्बन् ; तदेतिबिचनेव इट्-हर्योपरतं विषय-विषयिनिमांसं चेतनाचेतनखरुपापत्तं विषयात्मकमध्यविषयात्मकमिनाचेतनं चेतनिव कटिकमणिकत्यं सर्वार्यमित्यचति । तदनेन चिचसारुथेच भानाः कैचिचदिव चेतनिमत्यादः ॥ "

are no things in the world which are absolutely similar or dissimilar: all things are partially similar and partially dissimilar: we call things similar or dissimilar when the points of their dissimilarity or of their similarity are few and unimportant (at least for a certain purpose). Similarly, Purusa and Buddhi are dissimilar in certain respects and similar in certain other respects. Of course one of the points of their dissimilarity is stated to be that Purusa is conscious and Buddhi is unconscious. And the reason stated for such dissimilarity is that the latter, possessing the three gunas, must be unconscious, whereas Puruşa, who is merely the seer of them, is untouched by them, and is, therefore, conscious. But I am unable to follow the argument: it is true that Buddhi possesses the three qunas, but that is no reason for its being unconscious, if by unconsciousness is meant the total absence of consciousness. We have already proved that there is nothing in Prakrti which is not pervaded and enlivened by the Conscious Purusa, and therefore, not conscious. In fact, here unconsciousness must mean subconsciousness, which is the popular or ordinary sense of the term, as I have said before. And it is no reason to argue that Puruşa is conscious, because He is unconnected with the gunas, being a mere seer of them. Being all-pervading, He is present in them, though distinct Again, He is the seer and they are the from them. objects seen, and this relation of subject and object being eternal, neither of them can exist apart from the other-the very life of the one is inseparably bound up with that of the other. And what I contend here is confirmed by aphorism 4 of the Samādhi-Pāda, read with Vyāsa's comments on it. Here it is very clearly stated that an identification takes place between the manifestations of Purusa and the modifications of Buddhi in the state of the latter's external activity. Again, Buddhi is likened to a magnet. The essential point of the analogy, if there is any, is that as a magnet impregnates a piece of iron with its attractive power, so Buddhi impregnates

The same thing is asserted in aphorism 23 of the Kaivalya-Pāda in a still more emphatic way. Here it is clearly affirmed that Buddhi assumes the forms of both the subject and the object—both the conscious and the unconscious. It becomes conscious by reason of its receiving the reflexion of the conscious Principle (Puruṣa), just as a crystal vase becomes red when it receives the reflexion of a China-rose. The analogy clearly shows that like a crystal vase, Buddhi is not wholly indifferent to such reflexion—it possesses the capacity or power for the receive the reflexion—it possesses the capacity or power for the reception of the reflexion. This shows that it is not absolutely unconscious; if it were really so, it could not even appear to be or assume the form of the conscious. It is true that Buddhi is not itself the Conscious Puruṣa, as some people erroneously suppose, but, still, it is

the conscious instrument or vehicle in and through which Puruşa works and manifests Himself.

According to the Sānkhya, then, everything that is real and a real constituent of the world is a unique centre in and through which the Absolute Self-conscious Spirit realises itself in a unique manner and returns upon itself as a fully-realised Being. In this sense, everything partakes of the nature of the Absolute, and is, therefore, a perfect subject-object from its own point of view. But everything is not perfect from the beginning; it is actually imperfect, but potentially perfect, that is, capable of attaining perfection by gradual evolution. Consequently, everything, except the Absolute, is a subject-object possessing different degrees of the unity of self-consciousness. Thus we get three forms of personality: the Absolute is Super-person; the human beings are persons, and the other forms of being may be called, en bloc, subhuman persons, understanding by the last persons who possess more imperfect forms of self-consciousness. The Sankhya therefore preaches pan-psychism or a personalistic conception of nature, the world being a system of spirits.

> not different in nature from (Absolute) Purusa, 148.

Borrowings of nomenclature as between Sankhya aud Upanishad, 73.

Ospacity of covering and projection, attri-butes of Prakrti, 50. See Prakrti. Category, evolute of Prakrti, 44.

gupa, another name for, 88, 90. See Gunas.

Category, Individual purusa, whether a, discussed, 44.

no category above the twenty-fifth admitted in Sankhya, 32.

Supreme Purusa, the evolvent of, 90. See Supreme Purusa.

Supreme Soul's transcendency and supremacy over, 44, 67 f. See Supreme Soul.

twenty-four, called the abode of Brahman as qualified by gunas, 50. See Brahman and Gunas.

Unmanifest twenty-fourth, called

Prakrti, 42.

Twenty-fifth, called Porușa în Săńkhya, but whether Absolute or Individual Purusa, discussed, 46, 89-90. See Kāla (also called the twenty-fifth category), 51.

whether cosmical or psychical, 90. Causality of Brahman not amenable to proof or disproof by sense-perception, 11-12. See Brahman and Proof.

of Brahman (not His existence), denied in Sruti, 15. See Brahman

(or Isvara) and Sruti.

non-existence of, on Isvara's part, no proof of His non-existence, 17.

of Prakrti, due to influence of Purusa (Absolute) by virtue of her proximity to Him, 59.

Sankbya doctrine of, 29.

whether possible without Raga, 10. See Raga.

Cause, Effect subsists in, 29. See Doctrine of Satkarya.

Chitta, a compound of three evolutes of Prakrti, 71.

a modification of Buddhi-Sattva. See Buddhi Sattoa.

Cognitive senses, 99. See Senses.

Colebrooke, Prof., 31, 99.

Conjunction of Prakṛti and Puruṣa, cause of creation or evolution of the world, 136. See Creation, evolution and world.

of Prakrti, cause of Purusa's bondage, 56.

of Prakrti and Purusa, eternal, 57, 125, 136, and ultimate fact, 57.

Removal of pain (bondage) by removal of, between Purusa and Intellect, 122.

Consciousness, attribute (eternal), of Prakrti and her evolutes, 94-95, 136. See Mahat.

not absolute, but admitting of degrees and sub-consciousness 136-37. See Sub-consciousness. sub-consciousness,

of Purusa (Absolute), full and abso-lute, admitting of no degrees, 142.

of Purusa (Absolute), as distinguished frem Buddhi-sattva, 142. two senses or significations of,

136-37.

Cosmic elements, what are, 95. Cosmos, 87, 88, 91. See World.

of bondage, Purusa's own construc-tion, 87. See Bondage.

Cousin, M., 117.

Creation (same as Evolution). See Evolution.

defined in Sabkhya, 85.

Details of, 85.

Five stages of the process of, 97. .. joint work of Praketi and Purusa, 78 Object, twofold, of, 79.

spontaneous, theory of, 81. 1.1

Supreme Purusa's eternal and inherent nature to engage in acta of, 85.

whether cosmical or psychological or both, discussed, 86-88, 95.

Crystal vase and China-(red) rose, simile of. See Metaphors and Similes in Sankhya.

Devahūti, 49.

Delusion. See Bondage.

Desire, cause of all activity, 8. See Activity. human and divise, distinguished, 84.

either altruistic or egoistic unrealised at the time, S4.

whether predicable of Absolute Purpsa, discussed, 84.

Destruction of the world, not annihilation but absorption into Praketi at pralaya, 43. See Prainya and World.

Details of preation, 85 et seq. Doctrine of Boodage, 106.

of causality, 29, 119. of cause and effect, 105.

of creation, 105

of dualism in Sankhya, whether rigorous or relative, 106.

of genus and species; 87-38. ff. of migration from life to life, 115,

of release, 114.

28 of satkarya, 96. .

of sub-consciousness, 103.

of subtle body, 102.

Double conception as to nature of individual Purusa, 113.

Dualism in Sankhya, 106. See Doctrine of Dualism.

Relative, 106. Rigorous, 106.

Duty, meaning of, 64. whether attributable to Absolute

Effect, pre-existent in cause, 29. See Couse and Docteine of Cause and Effect.

Ekādaša Indriyas, 98, 99. See Senses. Enlightenment, 125. See Viveka or Vidga. Everything in the World, a single Whole constituted by many parts (one-in-

many = unity-in-variety), 30. in the world (except the Absolute Purusa), a subject-object possessing different degrees of the unity of self-consciousness, xiv.

Evidence, as to psychological view of creation in Sankhya. 87. See Creation.

as to existence of lavara (God), internal, 19 et seq. 1.5

as to theistic character of Sankhya Philosophy. See Atheism Sankhya,

not capable of proof or disproof by sense-perception, 16.

not positively denied in Sabkhya,

Evolutes, 11. See Categories.

Evolution (same as creation). See Creation. Deliverance of Purusa from bondage the object of, 78. See Bondager Spiritualistic as opposed to materialistic (in Sankbya), 105.

Existence of God by sense-perception, not provable, 16.

Finite puruga. See Indicidual puruga. Finite Self (same as finite purusa), 32, 41. See Individual puruga.

Five gross elements. See Gross tiements. Fruits of actions, whether attributable to Absolute Purusa or to Karma, 8, 10. See Karma.

Flint, Prof., 105.

Gaudapāda, 26 29, 80, 147, 132, 133. Generic, meaning of, 94.

Genus and species

Different meanings of, in logic and metaphysics, 38, Theory of, 38. See Destrine of Genus and Species.

Godhead, 1.

Great Principles (Mahat), 91.

Great Soul (Supreme Soul-Absolute Puro.

Gross Elements (five), 33, 94, 104, 106, 107. See Pascha Mahabhatas.

(with subtle elements), constituting a system or world (cosmos) for the enjoyment and experience of Purupa, 104. See Subtle Elemente. Gross, elements (five), Element of consciousness whether possessed by, 106.

Gupas, 16, 33, 42, 53, 65f., 66f., 67f., 69, 72f., 76, 88, 90, 93, 123, 124, 147. See Prakrti.

Absolute separation of Supreme Purusa from, whether possible, discussed,

Ahamkara (self-consciousness), whether dominated by, 93.

categories of Saukhya philosophy, 88. Cause of physical embodiments in and through which Prakrti, conjointly with Purusa, works, 33.

Colours of, 72f. Creator of, whether Absolute or individual Porușa, discussed. 90.

Enjoyment and experience of, the imme-diate object of Purusa, 124.

God (immanent in Prakrti) whether possessed of, 147.

(transcendent over Prakrti), above and beyond the reach of, 43, 66f., 67.

divested of, whether Absolute or individual purusa, 44, 49, 50.

whether eternal, 76.

H

Hanam, 123.

Hegel, 38.

Hiranyagarbha, 90, 94. See Mahat.

Human personality, essential characteristics of, 75.
